## INTRODUCTORY NOTES—DEFINITION OF TERMS AND SUMMARY OF EDUCATIONAL REGULATIONS

#### **Definition of Terms**

- Academy.—In Nova Scotia, a pure high school free to all qualified pupils in the county where situated—for which a special Annual ("Academic") grant is payable. In other provinces, academy generally means a private institution such as a boys' or girls' college, etc.
- Affiliated College.—An institution doing work of university grade, and in the case of the professional colleges, work leading to a professional degree; the degrees of an affiliated college are conferred by the university to which it is affiliated. In most Canadian affiliated colleges (not professional colleges), work below university grade is also done; that is, the college often carries on the preparation of pupils from the high school entrance year through the high school grades and matriculation work up to the completion of undergraduate work and a degree in Arts or in some other faculty. Commercial work also is sometimes done in these colleges.
- Annexed College.—In Quebec, a college is said to be annexed when the university merely approves the curriculum and by-laws, is represented at the examinations, and sanctions the diplomas awarded by these colleges.
- Associated College.—In Quebec, an associated college is an affiliated college situated outside the province.
- Assisted Schools.—In British Columbia, a school of which the teachers' salary is paid entirely by the Government.
- Business College.—In Canada the term is generally applied to a private institution teaching any or all forms of commercial work with the literary preparation for that work. These institutions generally confer their own diplomas, while also preparing students for public examinations such as those for the Civil Service, and chartered accountants.
- City School Superintendent.—An experienced teacher appointed by the school board of a city to take charge of all schools under that board and to act as an expert adviser to the board; he bears the same relation to all the schools that the principal bears to one school.
- Classroom.—In New Brunswick, a small room attached to the school room to which pupils are withdrawn from time to time to be drilled by the class room assistant: in other provinces, a school room in which the classes are taught.
- Classical College.—In Quebec this is classed as a secondary institution whose course leads to the degree of B.A. and corresponds fairly closely to the affiliated colleges already described. It is not under the control of the Department of Public Instruction.
- Collegiate Department.—In Manitoba, a school in a town which has three teachers teaching high school work only, in contradistinction to "high school," which has only two such teachers. This "Department" is housed in the same building and under the same principal as the elementary classes. The latter fact distinguishes it from Collegiate Institutes, where only high school and technical classes are housed.
- Collegiate Institute.—In Ontario, Manitoba and Saskatchewan, a pure high school (sometimes technical school) which has attained to a certain standard in equipment and staff; in other provinces, a "college."
- Commissioners, Board of.—In Quebec, where the school legislative unit is the municipality instead of the district or section, the regular school board is called the Board of Commissioners, while the dissentient board (in other provinces called the "Separate School Board") whether Roman Catholic or Protestant is called the board of trustees.
- Commissioners, District.—The Educational unit which is called "school district" in all other provinces except Quebec and Ontario is in Nova Scotia called a school section. All these sections are included in 33 "districts" under district commissioners, whose powers now are mainly confined to altering the boundaries of school sections. The inspector is ex officio the secretary of the district commissioners.
- Commissioners, School.—In Nova Scotia, the name given to members of school boards in incorporated towns.
- Consolidation.—An amalgamation of two or more rural schools or of rural schools with village or town schools, either for the purpose of uniting to strengthen the means of school support, where the original schools were small or poor, or for the purpose of providing a graded school and other advantages such as conveyance, instead of the original one-room school. In some cases (as in Saskatchewan) it need not be an amalgamation. The original district may be a "large district" with a graded school and provisions for conveyance, etc.

- Day Schools, Publicly Controlled Ordinary or General.—A term used in this report (the word "general" school is used in Nova Scotia reports) to define all day schools doing the work of the ordinary school grades (kindergarten and grades I to XII) and under the control of the Department of Education in contradistinction to publicly controlled technical, special and night schools, on the one hand, and private schools on the other; it includes all the publicly controlled primary schools in Quebec and "public," "separate" and "secondary" schools in Ontario, Saskatchewan and other provinces where the terms are used.
- Department of Education.—Department of Public Instruction.—The latter term is used in Quebec, the former term in all other provinces—to define the chief permanent central body in charge of public education; in Quebec the department is not under the direction of the Provincial Government, but linked with it through the Provincial Secretary; in the other provinces it is directly under the provincial government.
- District school.—In all provinces except Nova Scotia, Quebec and Ontario, the smallest legislative school unit locally governed by a board of school trustees (called "section" in Nova Scotia and Ontario); in Nova Scotia, see District Commissioners above; in Ontario it refers to a high school district; in Quebec it is a subdivision of the school municipality.
- District, municipal.—See Commissioners, district.
- District, minor.—Formerly used in Prince Edward Island to define a school district of which the school enrolment and average attendance fell short of the minimum requirements.
- $\label{eq:District poor.} \textit{--In New Brunswick, a school needing a special government and county fund grants for its support.}$
- Division, Inspectorial.—In Nova Scotia, used for "inspectorate."
- Division, School.—In British Columbia, a department or classroom in a school.
- Elementary grades.—In Quebec, the first six "years" in the case of Roman Catholic, and seven "years' in the case of Protestant, primary schools; in all other provinces, the grades up to and including Grade VIII, except in the case of Junior High Schools, where Grades VII and VIII are considered Junior High School grades.
- Elementary School.—A school equipped and staffed to teach the work of elementary grades.
- First Class School.—Formerly in Prince Edward Island, a graded school equipped and staffed to teach high school as well as elementary school grades, and maintaining a certain standard of efficiency.
- General School.—See Day Schools, etc.
- Grade, School.—The subdivisions of the work of ordinary day schools. The elementary "grades" being in most provinces Grades I to VIII and the secondary, Grades IX to XII.
- Graded School.—A school with more than one class room or teacher.
- Grammar School.—The High School which is free to all qualified pupils in the county is in New Brunswick called a Grammar School.
- High School.—Generally a school with at least one teacher devoting most of his or her time to work above Grade VIII; a "pure" high school is an institution where no other work is done below Grade IX (or Grade VIII with high school subjects such as Algebra and Latin). From the point of view of organization and administration, not of function, "high school" has not the same significance in every province. See under "secondary education" in the reviews of each province. In Saskatchewan, a school organized for Secondary Education only, by a district coinciding with the municipal limits of a town or city.
- Independent School.—In Quebec, a school not directly under the control of the Department of Public Instruction. The primary Independent Schools like the publicly controlled schools are classified as primary elementary and primary complementary.
- Inspector.—In all provinces except Ontario, an officer appointed by the Provincial Government to inspect schools in a defined area; in Ontario the county or city inspectors are appointed from among persons holding inspectors' certificates; the county inspectors are paid two-fifths of their salary by the council, the other three-fifths by the Government; the cities receive a grant of six dollars per teacher for Inspection purposes. The inspectors in unorganized areas, also secondary school and chief inspectors, are appointed and paid by the provinces; in Quebec, inspectors are appointed and paid by the Department of Public Instruction.
  - Intermediate School.—In manitoba, a graded school with one teacher employed for high school work; in Quebec, Protestant schools in which the first nine grades are taught.
- Kindergarten Primary.—In Ontario, a school or room, combining the work of the kindergarten and Grade I.
- Official Trustee.—A trustee specially appointed to deal with unusual problems in a school district or section or to take the place of the regular board where the latter refuses or fails to carry out the provisions of the Education Act.

- Primary School.—In Quebec, the name given to the ordinary day schools under the Department of Public Instruction (also to certain independent schools); it is used in contradistinction to Catholic secondary schools, special schools and superior schools (schools of university grade) but the secondary schools mentioned have not the same significance here as in other provinces since they secondary schools mentioned have not the same significant to the light school work preparatory to this course, but do not provide non-professional high school training for teachers for primary schools, which training is given either in the primary schools themselves or in the Normal Schools. Primary training is given either in the primary schools themselves or in the schools of other proschools therefore, correspond in many respects to the elementary and high schools of other provinces. In Prince Edward Island primary school means a one-room school.
- Primary Complementary.—In Quebec, a general two-year course, directed toward commerce, agriculture industry, or, (for girls) domestic economy. They are also called primary vocational schools.
- Public Schools.—In Ontario, elementary publicly controlled schools, as distinguished from elementary denominational schools.
- Rural Municipal Schools.—In British Columbia, each municipality (rural and urban) is a school district and the schools in every municipality are under the control of one Board of Trustees.
- Secondary Grades.—School grades in advance of grade VIII, usually grades IX to XII.
- Secondary Schools.—In most provinces, schools organized to teach work of secondary grades (IX to XII); in Quebec Roman Catholic education, the term is confined to such institutions as the Classical colleges and non-subsidized independent classical schools. Their work may extend to include a full description of the confidence of the co full course in Arts, the degree being conferred by the university to which they are affiliated.
- Section School.—A term used in Nova Scotia and Ontario to indicate the unit corporation for school selfgovernment.
- Section, Poor.—A term used in Nova Scotia to indicate that the "School Section" requires some extra aid from Government or Municipality in order to support school.
- Separate Schools.—Used in Ontario, Saskatchewan and Alberta to describe denominational (sometime scoloured) dissentient schools under public control; in Quebec, they are called trustee schools as distinguished from commissioner or majority schools, the latter being either Roman Catholic or Protestant according as either forms the majority in the community.
- School.—In Nova Scotia, New Brunswick and Saskatchewan, a school room in charge of a teacher; in other provinces the whole school institution (house and grounds).
- $Special\ Schools. Schools\ under\ university\ grade\ other\ than\ the\ general\ schools,\ such\ as\ night\ schools,\ technical\ schools,\ schools\ for\ the\ blind,\ etc.$
- Superior Schools.—In Quebec the Protestant intermediate and high schools are classified as superior; in New Brunswick, a school equipped and staffed to teach high school work and free to all children in grade VII and upwards in the parish or parishes in which the school is located; British Columbia, a school equipped and staffed to teach the upper elementary and two high school grades.
- Technical School.—A school equipped and staffed to teach vocational work, or prevocational work such as manual training.

#### Ages of Free Admission into Schools

(1) Prince Edward Island.—Resident children from the 6th to the 16th year of their age; older children if there is accommodation.

(2) Nova Scotia.—Trustees must provide accommodation for all residents over 5 years of age who wish

school fund.

to attend.

(3) New Brunswick.—Trustees must provide accommodation for residents between 6 and 20; others

(3) New Brunswick.—I rustees must provide accommodation for residents between a late 26, estate may attend if there is accommodation.

(4) Quebec.—Usually 7 to 16 in primary schools. A fee is charged in all cases except where abolished by the municipality and children 7 to 14 have to pay this fee whether they attend school or not.

(5) Ontario.—The public schools are free to all residents (except separate school supporters) between the ages of 5 and 21; the separate schools are free to separate school supporters.

(6) Manitoba.—Accommodation must be provided for all residents between the ages of 5 and 21 in

rural communities, and 6 and 21 in urban. (7) Saskatchewan.—In rural and village districts, between 5 and 21; in towns and cities, between 6 and 21. In order to equalize educational costs in Saskatchewan boards of trustees are allowed to charge

and 21. In order to equalize educational costs in Saskatchewan boards of this test are indeed to entage certain fees when the residents are not taxpayers of the district, and in certain other cases where it is considered that the revenue derived does not provide for the service rendered.

(8) Alberta.—Children are admitted to Alberta schools as soon as they have attained the age of six.

(9) British Columbia.—Accommodation must be provided between the ages of 6 and 16 years. In the discretion of School Boards children may be admitted who are under 6 years or over 16 years.

#### Ages of Compulsory Attendance

(1) Prince Edward Island.—Ages 7 to 13, inclusive; monthly attendance must be sixty per cent of the

days schools are in operation.

(2) Nova Scotia.—Children of ages from 7 to 14 in rural schools; and 6 to 16 in towns and cities. Within the age limits, children in town and country schools must attend regularly; must be reported for discipline when 5 days absent; and parents and guardians in addition to fines may have 2 cents a day added to their taxes for each absence to compensate the section for the loss of the "attendance" portion of the Municipal

(3) New Brunswick.—In districts other than cities and towns under section 105 of the Schools Acts, (on resolution of trustees, but the question must be brought up at every annual meeting until adopted).—age 7 to 12 for a period of 80 days; in cities and incorporated towns under same section, in which the compulsory act has been adopted by city or town council, ages 6 to 16 or grade VII standing if over 12 years old, period 120 days; in St. John, Fredericton, Chatham and Newcastle, 6 to 14. Employment of children under 16 may be forbidden by the school board.

(4) Quebec.—No statutory laws for compulsory attendance.

(5) Ontario-

(a) Children 8 to 14 must attend full time; children from 5 to 8, if enrolled must attend full time to

the end of the school term for which they are enrolled.

(b) Adolescents 14 to 16 who have not attained a university matriculation standing must attend full time; those exempted on the pleas of circumstances compelling them to go to work must attend part time for 400 hours a year in municipalities where part-time courses are provided. This provision came into force in September, 1921. In September, 1922, urban municipalities with a population of 5,000 and over were to be required to provided part-time courses.

(c) Adolescents 16 to 18 who did not attend full time to sixteen and have not attained a university matriculation standing must attend 320 hours a year. This provision was to come into effect in September,

1923, but the date was postponed.

Manitoba.—Children of ages 7 to 14 must attend full time. Any pupil over 14 if enrolled must attend regularly. A child over 12 may be exempted for employment, but only six weeks in the term. Employment under 14 (except as mentioned) is forbidden. Children of ages 14 to 16 must attend school regularly if not engaged in some regular occupation.

Saskatchewan.—All children 7 to 15 who have not passed grade VIII standing subject to certain conditions as to distance from school, etc., must attend full time. Employment of unexempted children under 15 forbidden. Deaf mutes between the ages of 8 and 15 must attend an institution seven months in each year.

Alberta.—All children 7 to 15 must attend full time.

British Columbia.—Children of ages from 7 to 15 must attend full time during the school year.

#### School Year and Vacations

Prince Edward Island.—July 1 to June 30; for financial purposes in Charlottetown and Summerside, calendar year. In Charlottetown and Summerside there are vacations of nine weeks in summer and one week in December; elsewhere there is a summer vacation of six weeks beginning July, a fall vacation of two weeks in October, and a winter vacation of one week in December; or, at the option of the District, there may be three weeks in May, three weeks in October and one week in either July or December, but schools of two or more departments may have a summer vacation of eight weeks and one week in December.

Nova Scotia.—August 1 to July 31. There is a summer vacation of about eight weeks in July and August (but, with the consent of the inspector, trustees may fix these for January and February) and two weeks beginning Saturday before Christmas, also Thursday, Friday and Monday of Easter Season.

 $New\ Brunswick$ .—July 1 to June 30 with a summer vacation of 8 weeks commencing July 1, and a winter vacation of two weeks commencing on the Saturday before Christmas.

Quebec.—July 1 to June 30. The Roman Catholic Committee regulations require schools closed each year, from the 1st of July to the first Monday in September; the Protestant Committee regulations from the 1st July to the 15th August, but in practice schools may open in September.

Ontario.—In public and separate schools the school year consists of two terms: September 1 to December 22 and January 3 to June 29; in secondary schools the school year is the same except that schools open on the first Tuesday in September. In addition to the interval between these terms there is a vacation of one week following Easter. Statistics of the public and separate schools which are shown in this report, however, are for the two terms which make up the calendar year; while those for secondary schools, narrangle schools, tacknical schools are are given for the two terms which make upon the calendar year; schools, normal schools, technical schools, etc., are given for the year beginning in September.

Manitoba.—July 1 to June 30 with the following vacations:-(a) Easter—the full week beginning with Easter Sunday.

(b) Midsummer—from the first day of July to the third Monday in August, both days inclusive, or by a special resolution of the board, to the first day of September.

(c) Christmas, from the twenty-fourth day of December to the second day of January, both days

inclusive.

Saskatchewan.—For finances, calendar year: for statistics, July 1 to June 30. (Up to 1920, however, statistics have been given for the calendar year).

The vacations are as follows:-

In rural and village districts at least seven weeks in the year, of which one to six weeks must be in summer. The summer vacation comes between July 1 and October 1, and the winter between December 23 and February 15. In towns and cities at least seven weeks, six weeks commencing July 2, and nine days commencing December 23. In schools open throughout the year, the week beginning with Easter Day is a vacation, in city, town or village districts an additional holiday of two weeks may be granted.

Alberta.—(1) For finances, calendar year. (2) For scatistics, academic year, that is, from July 1 to June 30. (Up to the year 1920, however, statistics have been given for the calendar year).

The vacations are: in rural districts, seven to ten weeks: summer between July 1 and September 1; December 24 to January 2. In towns and cities, eight to twelve weeks.

British Columbia.—July 1 to June 30. The vacations are: summer, last Friday in June up to the Tuesday immediately following Labour Day; winter, two weeks preceding first Monday in January; Easter, four days following Easter Monday.

## PART 1.—REVIEW OF EDUCATIONAL ACTIVITIES IN CANADA DURING THE YEAR 1925

#### CHAPTER I.—SUMMARY FOR DOMINION

SCHOOL ACCOMMODATION AND PERSONNEL

The number enrolled in all educational institutions in Canada in 1925 or the latest year reported was 2,228,869. This number was distributed among the various educational institutions

as follows:

Publicly controlled kindergarten, elementary and secondary schools, 1,965,832; private kindergarten, elementary and secondary schools (exclusive of such schools as are affiliated with universities or colleges and which are included under preparatory university or college courses), 72,104; Indian schools, 14,222; schools for the deaf and blind, 1,561; agricultural, technical and night schools or courses under college grade, 95,684; schools for teacher-training, including vocational teacher-training and Departmental summer schools, 10,220; private business colleges, exclusive of correspondence schools, 16,046; preparatory courses at universities and colleges, 4,995; short, special and correspondence and extension courses at universities and colleges, 11,941; classical colleges in Quebec (including non-subsidized classical schools), 9,899; regular courses in colleges other than classical, 8,531, and regular courses in universities, 22,723. Of 2,378 students in correspondence courses in universities, 1,233 were reported as being in courses leading to degrees and not elsewhere included with the regular students while the remaining 1,145 correspondence students were clearly doing work of university grade, so that there were

at least 32,000 in regular university and college courses.

The total of 2,228,869 in all educational institutions excludes 3,260 in business colleges and 1,547 in Indian schools who may be elsewhere included under private schools. It includes all provinces and the Indians in the Yukon and Northwest Territories. A certain percentage should be deducted from the total on the score of pupils being counted more than once in changing from one school to another within the year. When it is considered that there are in Canada more than 60,000 teachers involving so many different persons registering the attendance of pupils and students at any and all times throughout the year it is easy to see that a certain amount of duplication of this nature is unavoidable and impossible to trace. Most of the interchange probably takes place between publicly controlled schools in different parts of the country, while a small amount is due to shifting of pupils between public and private schools and other institu-tions. Names once entered on the register of a school are usually not removed until the end of the school year except in cases where pupils are removed from one room to another within the schools in one city or town or under the one school board, when they are transferred to the register of the room or school to which they are removed. When a pupil changes from, say, a rural school to a town school within the year it is assumed that he remains on the register of the rural school and is also entered on the register of the town school and is thus registered twice. If he shifts more than once he is counted more than twice. In some provinces an attempt is made to rectify the enrolment allowing for these duplicate registrations.

#### PROGRESS DURING THE YEAR

In comparing the educational activities of last year with those of the previous year, item by item, and according to type of schools, substantial increases are seen in most cases. The following decreases, however, are found in so many provinces that they may be considered fairly general:

(a) Pupils in Agriculture, Botany, Drawing and Practical Subjects in ordinary, i.e.

non-vocational schools.

(b) Teachers' salaries, especially in the cases of certain classes of certificates.

(c) Plant values, receipts for and expenditures on buildings. Thus by virtue of the decrease in building and site expenditures the total cost of education in one province dropped from \$66.52 per pupil in the previous year to \$61.91 in the last year, although the expenditure on teachers' salaries and other purposes showed increases.

(d) The numbers of pupils in the lower grades. This may mean either less retardation or a decrease in the populations.

A noteworthy decrease occurs in the case of the number of teachers with the lower grades of certificates and of untrained teachers. Many provinces report a sufficient supply of trained teachers. The compensatory increase seems to take place in the case of middle rather than higher grades of certificates, a fact which may possibly be explained by a tendency to pay lower salaries. If so, it would seem doubtful whether the decrease in the lower classes of certificates may be expected to continue. This would be regrettable in view of the fact that the situation respecting the supply and training of teachers is improving with very rapid strides. Table I shows that 10,220 were in teacher-training institutes and 2,593 more were in short courses for teachers at universities and colleges. Most of the latter were teachers who had already been trained in normal schools and were taking these summer courses to improve their academic or professional status and their usefulness generally. The total number thus in training forms a considerable proportion of the total number of teachers (about 62,000). To this information, should be added what cannot be represented in a single table viz. that the number of teachers in training was smaller than it would have been, by reason of more rigid selection in some provinces of the candidates for admission to normal schools than in former years.

#### EDUCATIONAL STATUS OF PUPILS

The last two items in table I show the approximate number in elementary and high school or higher grades. Except in cases of night high schools and a few other cases evening pupils and students were left out of the reckoning, since the status of their work is difficult to determine. A further estimate was made in the case of preparatory students in universities and colleges, only 60 p.c. of these being considered as being above elementary grades, this being the percentage ascertained in other private schools of a similar character. Since this estimate may be somewhat low it will make up for any over estimate in the case of the only other estimate involved in the figures given, viz. the number of pupils in certain technical institutions. The proportions in elementary and secondary or higher grades are, therefore, correct within a small margin of error. The high proportions shown in one province as compared with another depend not only on the respective educational activities of these provinces but also on the age distribution. Taking the age of 7 years as the average age for beginning elementary school and 15 years as the average age for entering high school the following figures based on the census of 1921 will explain this point.

Population at 15 years of age for every 1,000 at 7 years of age—

| Nova Scotia 855 | Quebec | 812 | Alberta. | 654 |  |
|-----------------|--------|-----|----------|-----|--|
|-----------------|--------|-----|----------|-----|--|

According to age distribution, then, Saskatchewan should have the smallest proportion in Grade IX as compared with Grade I while Prince Edward Island should have the largest, but this would not mean that in Saskatchewan a smaller proportion of the population went on to high school than in Prince Edward Island. The proportion in high school grade or higher in the province of New Brunswick is somewhat understated in Table I because the number of high school grade pupils in most of the rural ungraded schools is not known. An estimate shows that it is improbable that this number exceeds 100. Grade VIII or the last elementary grade, however, had 1,816 and Grade VII, 2,169 taking Latin, while the numbers in these grades taking Algebra were 2,565 and 3,221 respectively. Since Latin and Algebra are usually considered high school subjects it is a question whether the last year of elementary school work in New Brunswick is not a genuine high school grade, especially as the amount of Latin and Algebra covered is equivalent to that usually covered in a high school year, and since the arithmetic, history and geography cover the amount of ground usually covered in a high school year. The addition of Grade VIII would increase the high school grade enrolment in the province by over 3,000.

The age distribution of the pupils and students in Table I can only be estimated except in the case of the publicly controlled (for which see sections 2, 3 and 4) and private (for which see section 13) elementary and secondary and some vocational schools, and classical colleges. This reduces the estimate to the very small minority of the total number in educational institutions. In the case of night schools and vocational schools the lower age limit is regulated by statutes or regulations, these schools being provided for only pupils of adolescent or higher ages, while in any case most of such pupils have discontinued ordinary school attendance and may therefore be considered adults. In the case of universities and colleges the enrolment under 16 is negligible except in the case of those in preparatory courses who must be considered separately. If the age of 16 years be taken as the boundary between child and adult education, such a boundary being reasonable, considering that 15 is the upper limit for compulsory education (except in the case of adolescent Acts) and that persons of 16 are outside the jurisdiction of juvenile courts; further that large numbers of persons at 16 are engaged in gainful occupations—the following table will show the extent of adult education in Canada within a small margin of error.

ADULT EDUCATION IN CANADA: Number of persons, enrolled in educational institutions, who are either over 16 years or have discontinued ordinary school attendance.

| 1. Over 16 years in publicly controlled schools (including independent primary schools in Quebec and private schools in Alberta).  2. Over 16 years in classical colleges and independent classical schools, Quebec.  3. Over 16 years in private schools in other provinces.  4. Over 16 years in preparatory courses in universities (estimated).  5. Business colleges (private).  6. Evening technical schools, and other night schools.  7. Over 16 years in full time vocational schools in Ontario.  8. Over 16 day and part time pupils in Ontario and full and part time vocational pupils in other provinces (estimated).  9. Regular, extension, short and correspondence courses in universities and colleges.  10. Teacher training institutes. | 106,921<br>4,337<br>3,142<br>2,500<br>16,046<br>71,547<br>4,130<br>4,530<br>43,295<br>10,220 |

| 11. Frontier college (approximate). 12. International correspondence schools (approximate). 13. Shaw's correspondence schools (1924).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 266,672<br>5,000<br>5,000<br>1,144                                                           |
| Grand total—estimated as over 16 years or as having discontinued ordinary school attendance                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 277,816                                                                                      |

Item 9 contains the registration in Workers' Educational Association courses. The gap in the above table is a number of systems of private trade schools and correspondence schools of which statistics have not been compiled to date, also educational work carried on by business firms among their employees and apprentice schools. Some at least of the students taking such classes are also included in one or other of the above thirteen items; e.g. certain apprentices

are taking correspondence courses, others are in the publicly supported vocational part-time classes. Taking this into consideration and the fact that the numbers in individual trade schools, correspondence schools, etc., are small as compared with the enrolments of the systems mentioned, it would seem that an estimate of the total number of adults being educated is very close to the truth when placed at 280,000, without taking into consideration the educational influence of public and other libraries which, of course, can not be estimated. Of these 280,000 about 245,000 are taught in institutions either publicly controlled or publicly supported to some extent, while about 35,000 are in purely private institutions.

Grade Distribution by Ages.—A summary for eight provinces of the standing of pupils in ordinary schools at each age is shown in Table 13 for publicly controlled schools, and Table 149 for private schools. The comparative standing in rural and urban schools is shown in Tables 22 and 23; and of the sexes in Tables 45 and 46. A summary of this kind has certain defects composed as it is of aggregates of items which are not comparable in every respect. In analyzing these tables, however, it is difficult to detect fundamental differences between provinces which are not also found between different sections of the same province. In other words, differences due to provincial systems of grading are difficult to detect. On one point only can a serious error arise in adding up the pupils of all the provinces by age and grade, viz. that in Ontario elementary schools the age and grade are shown for the calendar year and in other provinces as well as for the secondary schools of Ontario they are shown as on June 30. On the other hand differences between rural and urban areas, or rather, the graded and ungraded schools of these areas of the same province are very great. A separate study of rural and urban areas is difficult in view of the fact that pupils trained in elementary rural or ungraded schools, as a rule, complete their high school training in urban or graded schools. To cut short the study at the end of the elementary grades would deprive it of one of its most important features, viz. the attainments of bright pupils who are in high school work at the ages of eleven to fourteen. With all its faults, then, it is probable that the general aggregate represents general conditions better than any other presentation, and that departures from these conditions by different provinces, by rural or urban areas and by the different sexes are typical of the area under survey.

A study of the progress of pupils at school is very similar to the study of a running or swimming race, three phases being of paramount interest, viz. the handicap at the start, the speed during the race and the endurance to reach the goal. The three phases may be seen in a general way by a look at the tables mentioned, but the mass of figures is so great and the irregularities from year to year so many that to obtain anything approaching an accurate conception of them it is necessary to resort to approved statistical measurement in order to smooth out these irregularities and determine rates, etc. which are the most typical of an irregular course. Thus if one watched a runner going at one moment at the rate of four miles an hour, at another moment at five miles and at another at six miles, he might wish to determine the average speed of that runner. This would not be difficult if there were only one runner, and if he reached the goal and the observer knew the time at starting and finishing, it would simply be the distance travelled divided by the time taken. It would be very difficult if there were more than one runner going at different rates at different instances and it were required to find a rate that would be typical of all the runners. It would be especially difficult if some of these runners started later than others and some fell out at all stages of the course. This is exactly the situation presented by the age-grade tables and it is desired to estimate average rates, etc. from the mass

of figures presented.

The main conclusions to which we are led by a careful statistical analysis of the figures may be briefly stated as follows:

1 The rate of progress in urban public schools seems to be approximately (about 0.89 grade per year) the same for all grades of mentality, and at all school ages

2 Retardation can be almost entirely explained by poor attendance.

3 On the average, pupils who begin attendance at urban schools after the normal age, can never make up for the lost time. It is true that the highest quarter of the boys in the public schools progress a little faster than the lowest quarter, but the greater part of their advantage is due to an early start and regular attendance.

4 For comparison with the results in public schools, a study of the school grades of (a)

juvenile de inquents and (b) boys in one of the best private schools, has been made.

5 The chart on page xvii is a summary of this study. There is some reason for suspecting that, taking the eight provinces as a whole, the brighter children are being held back by the fact that the grades are adapted to the capacity of the average child, and the inelasticity of the system of promotions.

The analysis of figures from which these conclusions have been deduced is given below. The age-grade tables lend themselves admirably to statistical measurements; i.e. very carefully weighted averages are found to yield predictions which are justified by later data used to verify these predictions. Thus if a prediction is made on the basis of the calculated rate and starting point of the general average of children at 7 to 13 years (when practically all have started and practically none have dropped out of the race, as it were), as to where the general average of children are going to be at age of 16, the actual average at 16 is found to come so close to this prediction that any difference may be due to an accident. This is shown in the following figures which give in column 1 the prediction on the basis of the regression equation of the correlation between age and grade at 7 to 13 and column 2 the actual mean grade at each age at the ages of 7 to 16.

CANADA URBAN SCHOOLS, 1925: GRADE OR FRACTION OF A GRADE AT EACH AGE OF 768,464 PUPILS OF BOTH SEXES IN EIGHT PROVINCES

| Age | Predicted<br>grade on<br>basis of<br>regression<br>equation | Mean<br>grade | Grade of<br>first<br>decile | Grade of<br>first<br>quartile | Grade of<br>third<br>quartile | Grade of ninth decile |

| 7   | 1.47                                                        | 1.49          | 1.15                        | 1.42                          | 2 · 49                        | 2.96                  |
| 8   | 2.36                                                        | 2.28          | 1.42                        | $2 \cdot 05$                  | 3.50                          | 4.18                  |
| 9   | 3.24                                                        | 3.22          | 2.09                        | 2.80                          | 4.65                          | 5.43                  |
| 10  | 4 · 13                                                      | 4 · 13        | 2.67                        | 3 - 65                        | 5 · 64                        | 6.42                  |
| 11  | 5.01                                                        | 5.02          | 3.41                        | 4.54                          | 6.59                          | 7.43                  |
| 12  | 5.90                                                        | 5.89          | 4.19                        | 5.36                          | 7.57                          | 8.48                  |
| 13  | 6.79                                                        | 6.78          | 4.97                        | 6.16                          | 8.60                          | 9.47                  |
| 14  | 7.67                                                        | 7.69          | 5.72                        | 7.12                          | 9.49                          | 10.28                 |
| 15  | 8.56                                                        | 8.56          | 6.62                        | 8.12                          | 10.33                         | 11.06                 |
| 16  | 9.44                                                        | 9.47          | 7.88                        | 9 · 14                        | 11.17                         | 11.73                 |
| 17  | 10.33                                                       | 10.27         | 9.08                        | 10.14                         | 11.65                         | 12.01                 |

The first two columns should be studied first. An explanation of the remaining columns will follow.

The prediction on the basis of the regression equation of the correlation between age and grade of the pupils 7 to 13 years of age is as close to the mean at 15 and 16 years as at the other ages and is closer at the age of 17 than at the age of 8. There was no necessity for this prediction to coincide so nearly with the mean grade. It surely cannot be wrong, therefore, to conclude that the figures in the first column represent the true average rate of all the children between 7 and 17 or during eleven years of school life. This average rate is 0.89 of a grade a year and the accumulated progress up to the age of 7 represents only 0.47 of a grade. In other words, while some pupils at 7 (as is shown in column 6) may have reached almost as far as Grade III. what might safely be considered as the average pupil had covered less than half a grade, chiefly because he had not attended school long enough to cover more.

This is borne out by the Census figures of 1921. In that year the following figures will

illustrate what actually took place:-

At the age of 5 in Urban Canada 15·11 p.c. were at school of whom, 20·67 attended less than 3 months; 13·21 from 3 to 6 months and 66·12 attended 7 months or more.

At the age of 6 years 55·87 p.c. were at school of whom 9·91 attended less than 3 months; 10·44 from 3 to 6 months and 79·65 attended 7 months or more.

At the age of 7 years 86.55 p.c. were at school of whom 2.50 attended less than 3 months; 4.56 from 3 to 6 months and 92.94 attended 7 months or more.

On the average it would seem safe to say that of the  $86 \cdot 55$  attending at the age of 7 years  $15 \cdot 11$  had begun at 5;  $40 \cdot 76$  at 6 and  $30 \cdot 68$  at 7. The average time spent at school then by the  $86 \cdot 55$  would be  $6 \cdot 76$  months at the age of 5 by  $15 \cdot 11$ ;  $7 \cdot 54$  months at the age of 6 by  $40 \cdot 76$ ; 8.20 months at the age of 7 by 30.68.

This would give the average time spent at school at the beginning of the year in which

the 86·55 had reached the age of 7 years as follows:— 15·11 had attended 14·30 months

40.76 had attended 7.54 months. 30.68 had attended 0 months.

The 86.55 had attended on an average 6 months.

Assuming 10 months as a full year and that no promotions for the year had been yet given at the age of 7, when their age and grade were reported, the mean grade should be around 1.60. The actual is 1.49.

Now at the beginning of the year in which they were 8 years 7.51 more came in at the age of 8 so that these up to this time had put in no attendance. The average time then put in by

all  $94\cdot06$  at the beginning of the eighth year was:—  $86\cdot55$  had attended an average of  $14\cdot25$  months. 7.51 had attended an average of 0 months.

94.06 had attended an average of 13.11 months.

As the year is about 10 months, the time spent at school at the age of 8, then, was 1.31years and at a grade a year, assuming that the children at 8 had received no promotion for the year when their age and grade were reported, their mean grade ought to be  $2 \cdot 31$ . The actual it is seen is 2.28 and the predicted grade is 2.36.

While the foregoing is not free from fallacies—at least a priori fallacies, it would seem that the time spent at school is the main factor determining the grade at a given age. This ought not to be so. The differences in the mentality of the pupils ought to bring about different rates of advancement; one or more promotions within the year ought to upset calculations on the basis of a school year of ten months as the time required for a grade. The question is whether

sufficient allowance is made for different grades of mentality.

The point that the grade predicted for the age of 16 is so close to the actual mean grade (although the ages used for the prediction were 7 to 13) while interesting is not startling. The important fact is that the grades at each age between 7 and 17 are almost exactly on a straight line; i.e. that the rate of advancement within these age limits is uniform. This may not be a good feature—indeed it may be a very bad one. Even on the false assumption that pupils are all of the same mentality it is inconceivable that the system of grading should be so perfect as to give exactly the right amount of work for each age, and there is no doubt that capacity varies according to age. The suspicion is that the adherence to a yearly promotion is too rigid and the allowance made for the different levels of mentality is too small. The rate of 0.89 of a grade a year means a loss or retardation of 0·11 of a grade a year. This could be easily accounted for by irregularity of attendance and new pupils coming into the system at each age. It has been seen that this explains the situation at the age of eight years.

To the inference that rigidity and artificiality in the practice of promotions are extreme -i.e. that no matter what different types of mentality are represented by the pupils at the age of 16 or 17 as compared with those at the ages of, say, 12 or 13, a certain percentage is promoted and no more nor less—there is an alternative possibility, viz, that the same average type of mentality is represented at these different ages. While it is practically a certainty that a certain proportion of the dullest type drop out before 17, it is possible that these are at least partially balanced by the brightest pupils who have passed through the system and dropped out by that age. Out of 63,178 pupils at the age of fourteen 1,432 were in Grade XI and 24 in Grade XII. Most of these would be likely to pass out before another year—either into the university or elsewhere; out of 49,802 at the age of 15 years, 5,074 were in Grade XI and 219 in Grade XII; out of 34,575 at the age of 16 years, 9,149 were in Grade XI and 1,033 were in Grade XII. These dropping out at the end of the year would balance a large proportion of the backward pupils dropping out at these ages. On the other hand, if a large proportion of average pupils as compared with brighter pupils were dropping out at these ages, these comprising the great bulk of the total number of pupils, it would follow that the rate of progress of the remainder would be accelerated, or else that the increasing difficulties of the grades would just exactly balance the effects of the types of mentality weeded out.

#### PERCENTAGE IN EACH GRADE

| 1 EICEN 12          | ZOTE TIA     | EACH GRADE         |               |
|---------------------|--------------|--------------------|---------------|
|                     | Years        |                    | Years         |
| Grade III and under | 4.7          | Grade VI and under |               |
| Grade IV            | $5 \cdot 5$  | Grade VII          | 5.3           |
| Grade V             | $11 \cdot 9$ | Grade VIII         | 11.5          |
| Grade VI            | 18.0         | Grade IX           | $21 \cdot 0$  |
| Grade VII           | $21 \cdot 4$ | Grade X            | $27 \cdot 4$  |
| Grade VIII          |              | Grade XI           |               |
| Grade IX            |              | Grade XII          | 3.0           |
| Grade X             |              |                    |               |
| Grade XI            |              |                    |               |
| Grade XII           | -            |                    |               |
|                     |              |                    |               |
| Total               | 100.0        | Total              | $100 \cdot 0$ |
|                     |              |                    |               |
| Grade III and under | 4.7          | Grade VI and under |               |
| Grade IV            | $5 \cdot 5$  | Grade VII          |               |
| Grade V             |              | Grade VIII         |               |
| Grade VI–XI         | 77-9         | Grade IX-XII       | $77 \cdot 9$  |
|                     |              |                    |               |

The median grade at the age of 13 is 7.47; the mean grade is 6.78. The median grade at the age of 16 is 10.22, the mean grade is 9.47.

The rates between 13 at 16 indicated by the medians and means are practically identical. Taking all the grades into consideration as in the case of the mean, the standard deviation at the age of 13 is 1.76; at the age of 16 it is 1.59. This means that it would typify the age of 13 to say that the standing was between Grade 5.02 and 8.54 and the age of 16, between Grade 7.88 and 11.06. At the age of 13 about 10 p.c. are below this limit and 21 p.c. above; at the age of 16 about 10 p.c. are below and 29 p.c. above. When it is considered that a number of the very most advanced have left school there is a decided bias outside the upper limit in the case of the age of 16, but the rate between 5.02 and 7.88 the lower limit is a little greater than that between 8.50 and 11.06 the upper limits, although there are more to draw from at the upper than at the lower. In other words it would not seem that the average rate at 16 was kept down to that at 13 by reason of the fact that the grades at the age of 16 were cut off at the upper limit. In the eight provinces under survey in 1921 in urban schools there were at school at the age of 13 years 95.7 p.c. of the population at this age and at the age of 1 6there were 45.1 p.c. This means that about 50.6 p.c. of the total population at the age of 13 or 52.8 p.c. of those who were at school at 13 dropped out before they were 16 years. It follows, then, either that the 52.8 p.c. who dropped out were of the same average mentality as the 47.2 p.c. who remained or that the latter were artificially kept down to the same rate of progress as the former; or that the grades were so scientifically designed that each grade fitted exactly the type of mentality remaining at school to reach it. The last conclusion can be dismissed at once. There is some evidence in favour of the first on the score that compulsory attendance operates against a selection of mentality; i.e. the pupil compelled to remain at school up to the age of 16 was as likely to be of average mentality as above it—indeed compulsory attendance operates in favour of the average, since pupils who have not reached a certain age but have reached a certain grade are often exempt from further attendance. This is true of the ages below 16 but at 16 the compulsory period is past in all provinces and the pupils at school at this age are attending voluntarily while more than half have left school. It is difficult to believe, therefore, that a ter the age of 16 there is no selection of mentality in the case of those remaining and yet there is no evidence of it. The inference from the grade distribution of pupils at 16 and 17 would seem to be that there is an artificial process of retardation which keeps all types of pupils down to a grade a year.

The figures for deciles and quartiles are not weighted averages but rather divisional points; e.g. the 1st decile is a division of the lowest tenth from the remainder; the 1st quartile is a division of the lowest quarter from the remaining three quarters; the 3rd quartile is a division of the upper quarter from the lower three quarters and so on. If instead of taking the quartiles we take the mean grade of each quarter the following will result:-

| Age                                  |                                                                              | Mean C                                                                       | Grade of                                                                      |                                                                                | Lines plot                                                                   | ted (by le<br>mean                                                           | ast square                                                                    | s) through                                                                     |
|--------------------------------------|------------------------------------------------------------------------------|------------------------------------------------------------------------------|-------------------------------------------------------------------------------|--------------------------------------------------------------------------------|------------------------------------------------------------------------------|------------------------------------------------------------------------------|-------------------------------------------------------------------------------|--------------------------------------------------------------------------------|

The line plotted through the first quarter gives a starting point of 0.12 instead of the actual 0.92 but this is capable of explanation. The 0.92 is the mean grade of those actually at school at 7 while a large number came in after the age of 7 who, it is assumed, have made no progress. The 0.12 might be interpreted as the mean grade of those actually at school and those not yet

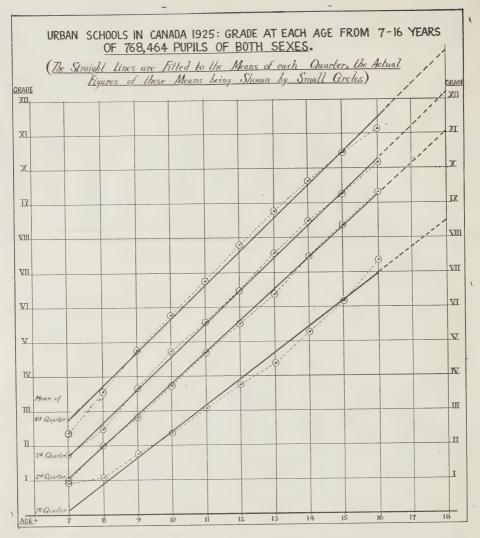

at school at the age of 7.

It is noticeable that the second or third quarters are almost perfectly linear progressing at average rates of 0.91 and 0.95 of a grade respectively. These are the pupils just above and just below the average. The 1st and 4th quarters are not quite so linear showing that they do not proceed at rates quite so uniform as the other quarters. They might suggest that the brightest and dullest pupils are not kept rigidly to the rates of the average, but it is difficult to understand why the rate of the 4th quarter is only 0.97 or very little more than that of the second. The high school grades might be responsible for this more than a rigid rate of promotion in the elementary grades. A study of the 1st quarter is particularly interesting. Without doubt its slow rate (0.76 of a grade) is partly due to coming in late to school. Notice also a speeding up after the 13th year in the case of the 1st quarter due no doubt to the dropping out of the slower pupils and probably also to the fact that a full attendance is probably not reached until about this time. It would seem that the personnel of this quarter changes after the 13th year. Likewise there is a slowing up of the 4th quarter about the same time which seems to be due to the break between elementary and high school and at a later age to the fact that the more advanced pass through the system. However, the break between the elementary and high school does not seem to affect the 2nd and 3rd quarters who might be expected to be affected more than the 4th quarter. Since the 4th may not be free from fallacies, it is probable that the actual situation can be best studied from the conditions of the 2nd and 3rd quarters or those just below and just above the average also from the 1st quarter. The rate of the 2nd is 0.91 of a grade and of the 3rd 0.95 of a grade a year. The difference is only 0.04 or enough to cause a difference of one grade in 25 years—i.e., it is negligible. Yet at the age of 16 years there is one grade between them. This grade is clearly due to the start. It would seem that the pupils of the 3rd quarter are those who have had practically a full enrolment at school about the age  $6\frac{1}{2}$  years while the 2nd quarter have not had a similar enrolment till a year later.

It is evident that in the case of all four quarters the starting point is the most important. If the 1st quarter had the start of the 4th, viz.  $2\cdot77$  at the age of 7 years, it is clear that at their own rate of progress  $(0\cdot76)$  their standing would be Grade  $9\cdot61$  at the age of 16, as compared with Grade VII, their actual standing, or Grade XI the actual standing of the 4th quarter; i.e. they have lost three grades because of their poor start. With the start of the 4th quarter and their own rate, they would be through the elementary grades at the age of  $14\frac{1}{2}$  years and this is probably as far as a large proportion of them are capable of going. Thus compulsory attendance would not be necessary beyond the age of 14 years even for the poorest quarter of the pupils. With their actual start and their actual rate they would not be through the elementary school until the age of 18 years. It is clear, then, that the great cause of retardation is late attendance and poor attendance before the age of 9 or 10 years, and that the regulation of the attendance of pupils at these ages is the most important feature of compulsory attendance laws. With the start of the 4th quarter, the 2nd and 3rd quarters would be through the elementary school system, before the age of 14 years.

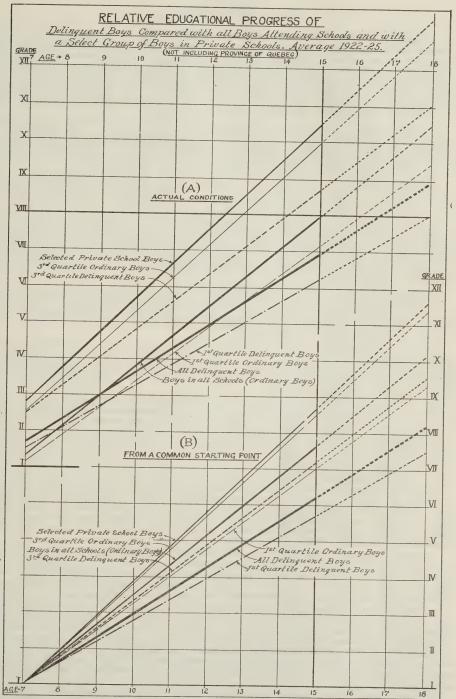

It is remarkable that the rate of the 2nd and 3rd quarters (and, of course, of the 4th quarter, only that this may contain certain fallacies) are so close together. The uniformity of these rates throughout the ages observed might point to the fact that on the average the same type of material attend at the earlier and later ages and from this it would follow that the average type of mentality is capable of handling the high school grades; but there is danger that this is not what it points to, but rather to an extreme rigidity in the system of promotions by which, no matter how bright a pupil may be, he is kept down to the rate of the average.

The following chart shows graphically the facts given in the above table:

The following chart, it is believed, illustrates the same general truth. The standing of boys in all classes of schools is compared with the standing of boy delinquents convicted of major offences during the years 1922 to 1925; and also with the standing of boys during the same years in a private school which seems to select the brightest class of boys. It was impossible to use the means of the four quarters owing to the fact that the delinquents in high school grades were not reported by grade but merely as "Secondary." Consequently the divisional points or "Quartiles" were used instead. There is little doubt that the delinquent boys lose ground fast. Their start is better than that of the average of all boys, and indeed than that of the 3rd quartile of all boys, but the average delinquent boy falls below the average boy at 9 and below the lowest quartile of all boys at 13. The reason for their better start is, no doubt, the fact that most of the delinquents represented are urban boys, while the generality of boys represent both rural and urban areas. It would not be safe to infer that the delinquents under the age of 9 are brighter than other boys and lose ground afterwards through a change in personnel. The real reason would seem to be that ordinary boys lose at the start through poor attendance and afterwards are pushed ahead at a uniform rate, whereas the delinquent boys lose steadily probably because of poor attendance. The best quartile of the ordinary boys proceeds almost at the same rate as the average of the selected boys. A large number of them are in rural schools where the system of promotion is not so rigid as in urban schools; consequently there is a greater differentiation between the rates of different quartiles of all boys than in the case of urban boys and girls combined.

Notice, however, the part a good start plays in all cases except that of the delinquent boys. The second part of the chart ("B") shows the actual differentiation in rates of progress by giving to all a common starting point, viz. Grade I at the age of 7.

"1st Quartile" is the division between the lowest 25 p.c. and the highest 75 p.c. "3" Quartile" is the division between the lowest 75 p.c. and the highest 25 p.c. NOTE

## CHAPTER II.—REVIEW OF PROVINCIAL EDUCATIONAL **ACTIVITIES**

#### PRINCE EDWARD ISLAND

Summary of all Institutions.—During the school year 1924-25 the number of pupils and students in all educational institutions in Prince Edward Island was 18,074. These were distributed as follows: 17,427 in 472 elementary and secondary schools; 297 in Prince of Wales college; 171 in agricultural and technical institutions; 165 in the University of St. Dunstan's; 14 in the schools for the blind and deaf at Halifax; 221 reported in private, elementary and secondary schools; and 30 in Indian schools. In addition to these there were 143 residents of Prince Edward Island in Canadian universities and colleges outside the province. This brings the total up to 18,303. In 1924 this total was 18,780.

Publicly controlled Elementary and Secondary Schools.—The 17,427—8,847 boys and 8,580 girls—enrolled in publicly controlled elementary and secondary schools were accommodated as follows: 11,101 in 415 primary (ungraded) schools and 6,326 in 57 graded including high schools. These were in addition to 297 in Prince of Wales college. It is interesting to see that

the proportion in primary schools shows an increase over the figure of 1924.

Average Attendance.—The average daily attendance in the elementary and secondary schools outside of Prince of Wales college was 12,259 or 70·3 of their enrolment as compared with 68·2 p.c. in 1924. This average was distributed as follows: 7,287 or 65·6 p.c. of their enrolment in

primary schools and 4,972 or 78.6 p.c. in graded schools.

Grade, Age and Sex Distribution.—The distribution by grade, age and sex of the pupils in the publicly controlled schools of Prince Edward Island is given in sections 2, 3 and 4, the grading system being uniform with that of nearly all the provinces of Canada. There is a remarkable symmetry shown in the distribution of the pupils of this province which makes the data, especially those given in Table 14 interesting. Attention is drawn particularly to the distribution at the age of 12 and 13 years.

Secondary Education.—The number of pupils in Grades IX and X in secondary schools other than Prince of Wales College was 1,459 while the secondary and higher grades in the college enrolled 297 making a total of 1,756 or 9.4 p.c. of the total enrolment in elementary and secondary schools. The technical pupils and the preparatory pupils of St. Dunstan's University raise

this to  $10 \cdot 2$ . This percentage in 1924 was  $11 \cdot 1$ .

Teachers.—The number of teachers in 1925 was 616 of whom 135 were males and 481 females. Of these 201 were in graded and 415 in ungraded schools. The average salaries showed an increase over those of 1924 in the case of Class I male and Class III female teachers and a decrease in the other classes. The number of Class I teachers increased by 18 while the number of Class III teachers decreased by 36.

Teachers in Training.—The teachers in training in Prince Edward Island are in attendance at Prince of Wales College and take professional work at the same time as the academic work. Every first year student (110 in 1925) is required to take pedagogical as well as academic training.

Agricultural and Technical Education.—These two activities are under one organization both coming within the scope of the Dominion Technical Education Act of 1919. The institution is called the Prince Edward Island Agricultural and Technical School and is now in its sixth year. It is under the administration of the Department of Agriculture but subject to inspection by the Chief Superintendent of Education who also acts with the Commissioner of Agriculture in an advisory capacity touching matters relating to the school. During the year it had 141 in the day classes and 30 in the night classes as compared with 97 and 196 respectively during 1924. Students who successfully complete the two years' course are admitted to the second year at the Nova Scotia Provincial Agricultural College. Fifty-seven school fairs were held in 1925 in which 277 schools and 6,675 pupils participated. The number of exhibits was 20,961, a considerable increase over the number in 1924.

Medical Inspection.—One hundred and eighty schools were medically inspected in 1925 and 4,432 pupils were examined, weighed and measured as compared with 93 schools and 3,334 pupils in 1924. Every public school in the province and one private school have had a health inspection. In addition to the number of pupils mentioned as examined, 1,405 children in 49

classrooms in Charlottetown and Summerside were given partial examinations.

Higher Education.—Prince of Wales College which, especially in its third year does work of university grade showed in 1925 a registration of 297. St. Dunstan's University had a registration of 165. The number of residents of Prince Edward Island registered at other Canadian universities in 1925 was 122 and in other Canadian Colleges was 21. The second and third year students of Prince of Wales and the students of university grade at St. Dunstan's added to those in other universities and colleges make a grand total of about 450 students of university grade to say nothing of residents of the province attending universities in the United States and elsewhere.

School Support.—The expenditure during the year was \$452,699 as compared with \$449,847 in 1924. Of this \$167,597 was contributed by the districts and \$285,102 by the Government. The cost per pupil enrolled was \$25.80 as compared with \$23.32 in 1924 and per pupil in average attendance, \$36.70 as compared with \$34.17 in 1924. In addition to the foregoing the sum of \$4,319 was expended in the operation of Prince Edward Island Agricultural and Technical School at Charlottetown.

#### NOVA SCOTIA

Summary of All Institutions.—During the school year 1924-5 Nova Scotia had in all her institutions an aggregate of 121,811. This enrolment included 112,352 in general schools; 412 regular students and 348 summer students in Normal College; 4,559 in Vocational Schools including all night schools and all but the regular students in the Technical and Agricultural Colleges; 276 in preparatory courses at universities and colleges; 6 in short, special and correspondence courses at colleges exclusive of those mentioned in connection with Vocational schools; 412 in regular courses at colleges; 1,401 in regular courses at universities; 1,117 in private elementary and secondary schools; 446 reported in business colleges (private); 170 in the schools for the deaf and blind, exclusive of the pupils from outside Nova Scotia and 312 in Indian schools. This total corresponds to 120,609 in 1923-24.

General Schools.—Of the enrolment of 112,352 in ordinary day schools (Grades I to XII) 73,104 were in 1,627 village, town and city schools (class rooms) and 39,248 were in 1,435 rural schools. These figures correspond to 72,714 in village and other urban schools and 38,880 in rural schools in 1924. The number of graded schools decreased to 1,627 in 1925 from 1,635 in 1924 while the ungraded increased from 1,418 in 1924 to 1,435 in 1925, the direct opposite of what happened between 1923 and 1924.

Average Daily Attendance.—The average daily attendance of 80,319 or 71·5 p.c. of the enrolment corresponded to 79,510 or 71·6 p.c. of the enrolment in 1924. Improvement was shown by rural schools which rose from 64·2 p.c. in 1924 to 64·6 in 1925. The percentage attending 140 days or more, that is, 7 months or more, was 63·4 in 1925 and 61·2 in 1924, the absolute number attending this period having increased from 68,099 in 1924 to 71,122 in 1925. Thus while the general percentage of attendance shows a slight decrease from that of 1924, the index of attendance which probably has a greater bearing upon school progress than the general percentage of attendance, showed a substantial increase. The general percentage of attendance was slightly lowered by a decrease in the proportions attending 200 days and over.

Note.—The increases in enrolment between 1924 and 1925 may be compared with the decreases between 1923 and 1924 as follows:—

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 1924             | 1925             | Increase<br>1924-25 | Increase<br>1923-24 |

The increase in enrolment between 1924 and 1925 was due entirely to pupils over 15 and under 7 years of age, while the regular school ages (7 to 14 years) showed a decrease of 465. Boys over 15 years contributed largely to the increase in 1925 as they did to the decrease in 1924. The above and the following tables are probably good illustrations of how little reliance may be placed upon school enrolment figures as indices of the increase or decrease of the population.

CENSUS OF ALL CHILDREN 4 TO 17 YEARS IN THE ACTIVE SCHOOL SECTIONS AS ENUMERATED BY THE SCHOOL BOARDS (FOR YEARS ENDING JULY)

| Ages | Population                                                                                                              |                                                                                                                                   | Incre                                                                                | ease                                                                                         | Increase in school<br>enrolment                         |                                                                                          |  |

Grade, Age and Sex Distribution.—The tendency to shift the weight from the first to later grades mentioned in last year's report, was continued in 1925. Grade I formed a still smaller proportion of all grades than in 1924. This is no doubt due to many causes, but improvement in average attendance is no doubt an important factor in bringing about a decrease in the repeaters in Grade I as compared with the beginners. In 1925 there were actually 445 more beginners than repeaters reversing the condition of 1923 and overwhelmingly reversing that of each of the preceding years. Village and rural schools, however, still show a balance in favour of repeaters so that the credit for the change belongs entirely to urban schools.

Secondary Education.—The enrolment in secondary grades increased from 11,632 in 1924 to 11,859 in 1925. The proportion to the total enrolment, however, was about the same for the two years, namely about 10½ p.c. The proportion of boys to girls in high school work increased in 1925 being 1 to 1.64 in 1924 and 1 to 1.52 in 1925. Of the 11,859 in high school grades, 6,574 were in urban, 2,129 in village and 3,156 in rural schools.

Teachers in Ordinary Day Schools.—The number of teachers in 1925 was 3,331 being an increase of 52 over that of 1924; of these 301 were male and 3,030 were female teachers. This forms a slight increase over the previous year in the proportion of males to females. Increases were generally shown in the higher and decreases in the lower classes of certificates. The net increase, therefore, has a tendency to eliminate the low class teachers. There is also a slight decrease shown in the number of teachers whose total service was one year or under while there was an increase in the number of normal trained teachers (1,827 as compared with 1,738 in 1924).

Teachers in Training.—The number of students attending the provincial normal college was 412 in the regular courses and 348 in the summer courses. The number in the regular courses makes a new record for the province exceeding the enrolment of 1924 by 28. Of these 71 were in the university graduates' course training for Academic certificates. The enrolment was made up of 63 males and 349 females as compared with 57 males and 327 females in 1924.

The summer courses during four weeks of July and August enrolled 348 students. The purpose of this summer course is nerely to provide a minimum of training to candidates for license who have not yet attended the regular courses. It qualifies only for the two lowest classes of license and even these licensees receive no diplomas. It take the place of the local training schools which ceased to function in 1922. In addition to car dislates for licenses other teachers attend these courses which include classes in scientific and cultural subjects and in handicrafs as well as pedagogy.

Rural Schools.—During 1925 there were 1,435 rural class rooms in operation; while there were 1,627 village and urban class rooms. It may be interesting to repeat the comparative table of subjects of study in rural and urban schools inserted in last year's report in order to note any tendencies characteristic of the year 1925.

|                                                                                                                                                       |                                                                                | Ru                                                                             | ral                                                                                |                         | 7                                                                             | illage and                                                                                            | Urban                     |                                                                                                             |

The tendency towards ancient and other languages to which attention was drawn in the last two reports was still more marked in 1923 in village and urban centres. As compared with English the compulsory subject, the proportion taking French in 1923 was 78·3; in 1924, 82·8; in 1925, 84·9; the proportion taking Latin in 1923 was 50·8; in 1924, 54·2; in 1923, 54·9. A susbtantial increase is also shown in German. On the other hand, the proportions in Physics in 1924, 1924, 1924, 1924, 1924, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1925, 1923, 1924 and 1925 were 47·3, 46·7 and 44·1 respectively; in Chemistry 21·9, 20·9 and 22·4 respectively and in Botany 19·4, 16·0 and 14·3 respectively. The decrease in Botany is especially marked. The drift in rural centres seems to be similar to that in urban centres. The decrease in Botany is

The number of pupils medically inspected in rural schools was 6,585 as compared with 27,408

in other schools.

Agricultural and Technical Education.—The rural science summer courses taken largely by licensed teachers in former years have been discontinued as such. The summer courses are now attended especially by young candidates for the lower class teaching licenses who have not yet had normal school training. The work in rural science is carried on during the regular normal school session, also by means of lecture tours, etc. Under the auspices of the Agricultural College a farm course consisting of two terms each of three months duration was inaugurated to commence in January, 1925. During the first session the enrolment was 30 students. The enrolment in the regular degree course at the college was 24. The enrolment in short courses was 230; that in the summer courses at the normal college was 348; that in the regular courses of the normal college, 412. The last two should be mentioned in connection with the subject of agricultural instruction since training in agriculture is considered part of teacher training.

Technical Education.—Under the direction of Manual training there were 15 centres with departments in Domestic Science with 3,116 pupils. In Mechanic Science ("Manual Training") there were 14 centres with 2,326 pupils. These departments are in the cities and towns only. In some centres this work is begun in Grade VI, but in most centres in Grade VII and is carried

through Grades VIII and IX

Under the Director of Technical Education, who is also the principal of Nova Scotia Thecnical College, are carried on the regular university grade engineering courses, also short courses to provide some advanced technical training for men who cannot avail themselves of the regular courses. In affiliation are the Halifax Navigation School and the Victoria School of Art and Design. The college also carries on university extension work under: (A) correspondence study division and (B) Secondary technical schools including coal mining and engineering schools in five counties and Evening technical schools in the principal industrial communities of the province. These secondary technical schools receive a Federal grant under the Dominion Technical Education Act. The registration of the college is given in full in Table 132. The data on provincial technical education in Table 97 refers to the enrolment in the secondary technical courses which is also given in Table 133.

The registration of engineering students was 66. Among the achievements of the year 1924 and 1925 was a successful mechanical separation by one of the professors of the college of the oil producing matter in oil shale, called Kerogen, from the rock with which it is intimately associated. This opened up a new line of investigation in the treatment of oil shales. The results led to application to the Honorary Council for Scientific and Industrial Research for assistance in carrying on this work and a sum of money was granted for continuing the work for one year. The generel line of investigation that is being followed is to determine the characteristics of typical Nova Scotia oil shales and by treating the shales under different conditions of restoring to establish criteria that will be of value in the design and operation of commercial plants. In 1924 for the first time the colleges of Acadia, Dalhousie, King's, Mt. Allison and St.

Mary's joined the Technical College in a co-operative effort to give all of the engineering students their instruction in surveying in a United Summer Survey Camp. In previous years each college used to conduct its field work in its own camps. (Note—The different universities and colleges train the engineering students for two years after which they are admitted to the Technical College.)

The short courses are held during the first three months of the calendar year. The student enrolls for one special subject. The work is dovetailed with the regular engineering courses. At the end of the courses each student who has attained the required standard is given a short

course diploma.

From the Halifax Navigation School, a joint enterprise by the Dominion Department of Marine and Fisheries and the N.S. Technical College, passed 41 successful candidates at the government examination in Navigation in 1925. The Nova Scotia College of Art, another affiliation of the Technical College, had 147 students during the year.

The correspondence division enrolled during the year 356 students, of whom 49 p.c. took industrial courses, 27 p.c. commercial courses, 20 p.c. college preparatory courses and 4 p.c.

home making courses.

The coal mining and engineering schools in Cape Breton North, Cape Breton South, Inverness, Pictou and Cumberland Counties, had 524 students, a decrease from 1924. The Evening Technical Schools had 2,530 students. (Note.—In Table 97 the figures for Nova Scotia include the College of Art, the short courses of the Technical College and the local technical schools and the coal mining and engineering schools, but not the manual training schools, the pupils of which are included with the general enrolment, nor do they include the regular degree course students of the Technical College nor any of the students of the Agricultural of Normal Colleges.)

Universities and Colleges.—For Statistics See Section 12.

#### NEW BRUNSWICK

Summary of all Education Institutions.—During the school year 1924-25 the number enrolled in all educational institutions in New Brunswick was 85,247 of whom 80,145 were in ordinary day schools; 2,626 in technical schools; 450 in normal schools; 30 in technical teacher-training courses; 577 reported in business colleges; 317 in private elementary and secondary schools; 764 in universities; 60 in the schools for the deaf and blind at Halifax, N.S. and 278 in Indian schools. At the same time 493 residents of New Brunswick attended universities and colleges The total enrolled corresponds to 83,507 enrolled in 1923-24. elsewhere in Canada.

Enrolment in Ordinary Day Schools.—As most of the data connected with ordinary day schools have been reported separately for two terms (the first closed on December 31, 1924 and the second on June 30, 1924) instead of for the whole year, particulars which could not be calculated for the whole year are entered in the statistical tables of this report for the long term ended June 30, 1924. Of the 74,681 enrolled during this school term 36,866 were boys and 37,815 were girls; 23,314 were enrolled in cities and incorporated towns; 15,712 in other graded schools and 35,394 in ungraded schools. The number of graded departments was 989 and of ungraded schools 1,286. Increases in all the items mentioned were shown over the figures of 1924 the greatest relative

increase being shown on the enrolment of other graded schools.

Average Daily Attendance.—The 80,145 pupils enrolled during the whole year attended a grand total of  $11,763,205 \cdot 5$  as compared with  $11,216,890 \cdot 5$  days in 1923-24. The schools were in session an average of  $194 \cdot 9$  as compared with  $192 \cdot 8$  days in the previous year. These figures show an average number of days attended by each pupil of 146.8 days in 1925 and 141.5 in 1924. Table 8 giving the attendance of nearly all the pupils by 20 day periods show that the median number of days attended by each pupil in 1925 was 159 and that 62 5 p.c. of the pupils attended more than 140 days. The same table shows that in 1924 the pupils attended a median of 158 days. The average daily attendance for the year was 60,356 and the per cent of the enrolment in daily attendance was 75.3. The attendance record, therefore, shows marked improvement over that of 1924 which in turn showed still more marked improvement over that of 1923.

Grade, Sex and Age of Distribution.—See Tables 16, 29 and 51.

Secondary Education.—The majority of pupils in secondary grades in New Brunswick (3,669 in 1925) are taught in grammar schools situated in the county towns and free to all the pupils of high school grade of the county. About 1,123 high school grade pupils were taught in superior schools free to all pupils in Grade VII and upwards in the parish where the school is situated. As will be seen in section 5 the number of secondary pupils in other graded schools was about 507. It is impossible to give the number in ungraded schools as they are included in Form V. comparison with previous years which gave the high school pupils by half years only, the number in Grades IX to XII in 1926 was 3,696 during the first term as compared with 3,320 in the corresponding term in 1925, and 3,445 in the second term as compared with 3,204 in the corresponding term of 1924. The enrolment in the secondary departments of grammar schools was 1,996 in the first term of 1924-25 as compared with 1,862 in the first term of 1923-24. The figures for yearly enrolment as given in Table 10 are incomplete because of the non-inclusion of most of the ungraded schools. In the graded schools and some ungraded schools the total for the whole school year in Grades IX to XII in 1924-25 was 3,669. Academic work is also done in the Normal schools which had 450 students so that in all 4,000 pupils were doing work of secondary grades during the year. Further particulars may be seen in Section. 5

Teachers.—The number of teachers during the second term was 2,484, an increase of 89 over the corresponding term of 1924. The classification, average salaries and experience of these may be seen in Table 111. The chief superintendent reports that the supply of licensed teachers now equals the demand with the result that temporary licenses have been abolished and trustees have been induced to employ teachers of a higher class. The number of Superior and Class 1 teachers increased during the year by 72 and of Class II teachers by 24 while Class III teachers decreased by 11. The number of teachers now with certificates of Class I and nigner is 898 and of Class III, 335. The fact that there is a steady decrease in the number of teachers removing that the further exchange of increasing stability in teachers. to new districts during the term would seem to be further evidence of increasing stability in teaching conditions. Out of the 2,390 teachers (over and above 94 class room assistants) during the second term only 3 were untrained.

Teacher Training.—The provincial Normal School had an enrolment of 450. This number does not represent the number of applicants for admission which is so large as to admit of a process

of selection.

Rural Schools.—See Table 90. Among the recent provisions there is an arrangement to pay a portion of the board of pupils in unorganized and isolated school districts.

Technical Education.—The status of technical education in New Brunswick may be seen in Table 97. This refers to the features of technical education which are assisted under the Dominion Technical Education Act. Manual Training and home economics are carried on under a director of manual training.

Medical Inspection.—During the year there were 6 medical officers attached to centres and The number of pupils examined during the year was 58,530 or over 70 p.c. of the

total enrolment.

Special Classes.—Seven opportunity schools for retarded pupils were opened in St. John city in 1924. Free kindergartens have also been authorized in St. John.

Enrolment.—During the year in which the latest statistics of all educational institutions could be brought together for summarizing (1924) the total enrolment excluding duplicates in all educational institutions in Quebec was 583,905 pupils and students, of whom 506,848 were in Catholic and 77,057 in Protestant institutions. This enrolment included 541,485 in publicly controlled and independent primary schools, 5,407 in nursery schools, 1,623 in normal schools, 9,899 in Catholic secondary institutions, which in this province extend the work to a degree in Arts, 7,770 in universities and independent superior institutions, 637 in schools for the deaf-mutes and blind and 17,084 in various other institutions including technical, agricultural and commercial colleges of university grade, as well as ordinary technical and night schools. The 583,905 represents an increase of 6,501 over the enrolment of the previous year.

The 583,905 were accommodated in 8,014 schools including 7,246 elementary schools, 551

complementary and high schools, 17 normal schools, 27 nursery schools, 21 classical colleges, 9 independent non-subsidized secondary institutions, 4 universities, 8 independent non-subsidized superior institutions, 5 schools for the deaf-mutes and blind, 2 schools of fine Arts, 14 schools of

arts and trades, 61 night schools, 6 technical schools, 1 polytechnic school, 33 dress-making schools, 3 agricultural schools, 1 school for higher commercial studies and 1 dairy school.

Primary Schools.—The primary school in Quebec is so called in contradistinction to (1) superior schools (universities and professional colleges); (2) secondary schools (classical colleges, non-subsidized independent schools where classical education is given, and one institute of modern secondary education affiliated with Montreal offering secondary education to girls); and (3) special schools, such as technical schools, agricultural schools, etc. The normal schools are connected with the primary schools in the sense that they train teachers for primary school teaching. The primary schools reporting to the Department of Public Instruction are either (1) publicly controlled, that is, under the control of Boards of Commissioners, or Trustees, or (2) subsidized or non-subsidized independent, that is not under commissioner or trustee control. Both classes of primary schools have hitherto been divided, into three grades, viz., elementary, model or intermediate, and academy or superior, primary schools. The Catholic primary schools on Sept. 1, 1923, were divided into nursery or maternal, primary elementary, and primary complementary schools. The primary elementary, in future statistics will replace the old elementary and model schools. The statistics of Protestant primary schools include those of intermediate and high schools, the high school course being within the meaning of a secondary institution.

In 1923-24 the enrolment in all primary schools in Quebec was 541,485 of whom 265,116

were boys and 276,369 were girls. These were distributed as follows:—

|                                                                                                                                                                                                                                                     | Under<br>control of<br>Commis-<br>sioners                | Under control of Trustees                                                 | Independent                                                              | Total                                                                                     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------|---------------------------------------------------------------------------|--------------------------------------------------------------------------|-------------------------------------------------------------------------------------------|

Average Attendance.—In all institutions the average daily attendance was 454,317 (exclusive of universities) or 79.5 p.c. of the enrolment.

Secondary Schools.—The secondary schools in Quebec are represented by (1) the 21 Catholic classical colleges; (2) by 10 Catholic non-subsidized independent institutions where classical education is given; and (3) by 52 Protestant high schools. In addition to these are certain institutions

offering secondary education to girls.

In 1924-25 eleven classical colleges and little seminaries with 1,220 students in Arts were affiliated to the University of Montreal while 9 with 1,111 students in Arts were affiliated to Laval. One superior school for girls with 50 students in Arts was affiliated to Montreal and 1 with 29 to Laval, 1 institute of modern secondary education with 16 students was affiliated to Laval and 1 with 177 students was affiliated to Montreal. Thirty-one convents and household science schools and 2 music schools aggregating 1,972 students in Arts were also affiliated to the two Catholic universities.

Teachers.—The number of teachers religious and lay in 1923-24 was 21,682, representing an increase of 674 over the previous year. This staff included 5,495 male and 16,187 female teachers.

Normal Schools.—There are now (1925) 18 normal schools including the new Gaspé School. Of these 17 are Catholic and 1 Protestant. These admitted 1,771 students and granted 814 diplomas in 1924-25. There are no more elementary diplomas granted and normal school students now can not obtain a diploma before a two years' course has been completed. The teachers who have trained outside the normal schools and have to pass a board of examiners must reach the same standing as that attained in the normal schools.

Special Schools.—These special schools in 1924-25 included 1 polytechnic school; 7 technical schools; 1 school for higher commercial studies at Montreal; 3 agricultural schools; 1 dairy school; 62 night schools; 17 schools of art and trades; 1 school of fine arts at Quebec and 1 at Montreal; 34 dress-cutting and dress-making schools; 27 nursery schools; 2 schools for the blind and 3 schools for the deaf-mutes, one Ranger's school founded in 1923; the Monument National (Montreal) school with a course composed of 350 public lectures and the school for Historic Guides (Quebec). Several of these schools are of university grade. The following is a list of these schools with their enrolment in 1925.

#### ENROLMENT

|                                                    | Day Courses   |               |              |              |             |             |                   | Night     |                   |

Domestic Science Schools and School Gardens.—In addition to all the above but included with special schools were 82 domestic science schools situated in 46 counties and in the cities of Quebec and Montreal and having in 1925 an enrolment of 11,281. The enrolment in these schools has already been included with that of primary controlled and independent schools. Six domestic science schools were founded in 1924 at the centres of St. Stanislas, St. Tite, St. Alphonse de Thetford, Montreal (RR.SS. De Jésus-Marie), Yamachiche, and Notre Dame du Lac. The number of school gardens in 1925 was 1,501 with 33,676 pupils operating.

Graduates of this institution receive degrees as Civil engineers and chemical engineers.
 These schools train students in architecture and special courses as sculpture, painting, etc.
 This school situated in Montreal prepares for degrees in commercial science and accounting. Sixteen degrees in com-

mercial science and one in accounting were issued in 1924.

4 The regular students of these train for degrees in agriculture of which 27 were issued in 1925.

5 The courses consist of an English course during December and a French course in each of the four following months also an inspector's course and a course at La Malbaie. Graduates receive diplomas as expert milk testers, butter makers, cheese makers and dairy inspectors.

Maternal Schools.—The number of maternal or nursery schools in 1925 was 27 with 110 technical schools of whom 3,376 were boys and 2,031 were girls. Twenty-two of these

schools were under control of commissioners and 5 were independent.

Superior Education.—Superior education in Quebec refers to the work of the two Catholic Universities (Laval and Montreal) with their affiliated institutions and of the two Protestant Universities (McGill and Bishop's College) also to 8 non-subsidized independent superior institiutions and 4 Protestant theological colleges. A number of the institutions already listed as special schools are affiliated schools of the Universities. Thus the Polytechnic school, the school of Higher Commercial studies and the Oka Agricultural school are affiliated schools of Montreal University; Ste. Anne's Agricultural school is affiliated to Laval; while Macdonald Agricultural School is a faculty of McGill. Six Grand Seminaries (Theological Seminaries) where they are not included with the Faculty of Theology of the Universities are listed among the schools affiliated or annexed to Laval; 12 little seminaries and 8 classical colleges are affiliated or annexed for the Faculty of Arts only with Laval and Montreal; that is, they have such courses as commercial, etc., which are not affiliated. The number of arts students in these little seminaries and classical colleges mentioned as affiliated for Arts was 2,331 in 1925. Since there were 6,560 in the classical course (that is, a course consisting of the regular high school course plus the four years in regular Arts work) the high school students of the colleges were evidently not included among the 2,331 mentioned as being affiliated for Arts. There are also affiliated or annexed to the Catholic Universities 2 secondary schools for girls, 2 institutes of Modern Education, 31 convents and Household Science schools and 2 music schools. Two other colleges are said to be associated for Arts only, that is, they are affiliated but situated outside the provinces. The faculties and schools which are combined or annexed to the Catholic Universities are Law, Medicine, Philosophy, Arts, Letters (graduate work), Science, Dental Surgery, School of Comparative Medicine and Veterinary Science, Pharmaceutical School, School of Social Economy and Political Science, Land Surveying School and School of Forestry, Superior Normal School, Superior School of Chemistry, Commercial Course, Course of Modern Languages, School and Conservatory of Music, Dietetic Courses in Nursing and Pedagogy.

In 1925 in the faculties and schools above stated as being combined or annexed to the two Catholic universities were 3,761 students; in the affiliated or annexed schools were 5,456 and in the associated schools were 129 students, making a total of 9,346 students in Catholic institutions of superior education. In the Protestant Universities were 3,714 students. Adding to these 409 in the eight non-subsidized independent institutions where superior education is given and 194 in the four Protestant Theological Colleges we have 13,664 in superior institutions in Quebec. These evidently do not include any preparatory or pre-university students. The full enrolment of the classical colleges and little seminaries may be seen in Table 138. It is to be remembered that only the regular arts students of these are counted above with the universities and that the remainder of the "Classical course" and those in commercial and primary courses are not counted.

The enrolment of each university in 1925 is to be found in Table 127.

Expenditure.—The expenditure of all institutions in 1924 was \$27,917,738 of which \$3,776,674 was contributed by the Government, \$13,860,167 was raised by annual assessment, \$989,148 by special assessment, \$612,311 by monthly contributions (a fee is required for every child between the ages of 7 and 13 inclusive unless this fee has been abolished by a resolution of a board of commissioners or trustees) and \$8,679,437 by contributions of independent subsidized institutions.

Libraries and Museums.—The Provincial Statistician's second last report contained interesting information on Libraries and Museums. The Libraries included 15 public and society libraries containing 518,961 volumes, 37,413 pamphlets and subscribed to 1,738 reviews and Newspapers; 225 parochial libraries containing 140,668 volumes and 14,982 pamphlets and 1,659 school libraries containing 3,141,791 volumes for the use of pupils. The total number of libraries is therefore 1,899 containing 3,855,815 volumes and pamphlets. In 56 museums replying to a questionnaire there were 386,309 specimens of which 140,467 pertain to botany, 88,513 to zoology, 49,956 to geology and mineralogy, 5,122 to anthropology, 5,346 to paleontology, 5,523 specimens of art, 54,145 numismatics and 37,237 other specimens. The sum of \$23,695.47 was expended for the purchase and care of these specimens.

#### **ONTARIO**

Summary of All Educational Institutions.—During the school year last reported (calendar year 1924 for public and separate schools; school year 1924-25 for other schools), the total number attending educational institutions in Ontario was 767,599. Of this number 515,126 were enrolled in 6,361 public schools (including 435 enrolled in 5 Protestant separate schools); 93,524 in 708 Roman Catholic separate schools; 10,545 in 198 continuation schools; 30,706 in 50 collegiate institutes; 21,410 in 133 high schools; 2,130 in 24 night elementary schools; 3,000 in 18 night high schools; 11,595 full time pupils in 27 day vocational schools; 1,739 part time pupils in the same schools; 18,75 special pupils in the same schools; 133 in English-French Model Schools; 2,279 regular and 282 summer students (in Kindergarten Primary Course) in normal schools; 143 Vocational teachers in training; 135 in the school for the blind at Brantford of whom 47 were from the prairie provinces; 300 in the school for the deaf at Belleville; 20,922 in 7 universities and 14 affiliated and professional colleges; 5,906 in 29 private elementary and secondary schools

reporting; 6,282 in private business colleges reporting; and 3,729 in 90 Indian schools. There were also certain extra-mural students in Model schools and a small number of students in secondary Agriculture schools. The above list does not include the students of Correspondence schools and of the Frontier College, as it is difficult to assign these students, especially the Correspondence students, to any province. This total of 767,599 corresponds to a total of 764,114 during the

previous year.

Elementary and Secondary Day Schools.—(Public, Separate and Secondary Day Schools). Of the 515,126 public school pupils, 216,362 were in rural schools; 202,466 were in city schools; 73,321 in town schools and 22,977 in village schools. Of the 93,524 in Roman Catholic separate schools, 22,216 were in rural schools; 44,693 in city schools; 24,715 in town schools and 1,900 in village schools. Thus, in what might be termed elementary schools in Ontario (that is, in contradistinction to organized secondary schools), there were 238,578 in rural schools; 247,159 in city schools; 98,036 in town schools and 24,877 in village schools. As seen in the first paragraph there were 74,256 pupils in organized day secondary schools including the full time pupils in Technical schools.

Average Daily Attendance.—The average daily attendance in elementary schools during the year was 433,872; in continuation schools 8,772; in high schools and collegiate institutes, 44,836 and in vocational full time classes 9,263; the total average daily attendance being 496,743. This represents an increase of 14,675 or 3.5 per cent over that of the previous year. The dis-

tribution of these increases may be seen as follows:-

|                      | Average Attendance<br>1924–25          |                                     |                                        | Incre                                                        | Per Cent<br>Increase        |                               |                           |

| Grand total          | -                                      | -                                   | 496,743                                | -                                                            | ano                         | 14,675                        | 3.5                       |

During 1925 attendance officers were appointed in all the municipalities of the province, 858 having been appointed by township councils, 426 by urban school boards, and 34 by boards in territories without municipal organization. In each of 34 municipalities the Separate and Public School Boards chose the same individual.

Age-Grade-Sex distribution.—During the year, statistics of distribution by age, grade and sex were compiled by the department for both elementary and secondary schools and for rural, city town, and village, both public and separate. These statistics are reproduced in this report in sections 2, 3 and 4. A comparison between rural and urban schools should not be made without taking into consideration the statistics of secondary schools which are given in section 4. The statistics of secondary schools, however, are as on June 30, 1925, while those of elementary schools are for the calendar year 1924, so that the ages in the two grades of schools are not exactly com-

parable.

Secondary Education.—Secondary education should not be confused with secondary schools. Table 63 on page 48 shows that there were in attendance in secondary grades in Ontario during the calendar year 1924, 10,105 pupils in public and separate schools, of whom 4,278 were in cities, 547 in towns, 349 in villages and 4,913 in rural schools. These were all in addition to the pupils in secondary schools which now exist under four names: continuation schools, providing facilities for secondary education to village and rural pupils; high schools; collegiate institutes; and day technical schools. In all institutes offering secondary education, then, there were 83,361 pupils, of whom 10,105 were in graded or ungraded "elementary" schools; 30,706 in collegiate institutes; 21,410 in high schools; 10,545 in continuation schools; and 11,595 full time pupils in day technical schools. This corresponds to 76,522 in the previous year. The secondary grade pupils in elementary schools are called fifth class pupils. These included pupils of 193 special organizations called fifth classes with an enrolment in 1924-25 of 1,878 pupils. The fifth class includes the work of Grades IX and X and corresponds to the lower form of secondary schools. Except perhaps in cities it eventually evolves into a continuation school, then into a high school and finally into a collegiate institute, according to the growth of the centre in which it is established

Among the factors contributing to the general increase in enrolment in secondary schools, special mention should be made of the continuation schools. In 1925 there were 9 of these schools open for the first time. The continuation schools are divided into three classes; "C" or one teacher schools (that is, one teacher devoting full time to high school work or one full time and one part time teacher); "B" or two teacher schools; "A" or three or more teacher schools.

Of the 10,545 pupils in continuation schools in 1924-25, 5,807 or 55 per cent were children the heads of whose families were occupied as agriculturalists; 1,282 were from the trades, 1,129 from commerce, 1,048 from labouring occupations and 335 from professions; the remaining being from miscellaneous occupations or no occupation.

This shows that the continuation school functions to a great extent as a rural secondary school.

Table 78 shows the proportion of children from the different occupations in all secondary schools.

Teacher-Training.—The training of teachers in Ontario is organized under a director of professional training. His sphere includes the college of education with an enrolment of 528 students; 7 normal schools with an enrolment of 2,279 students; and 8 Summer model schools with an enrolment of 210 besides 133 in 4 English-French Model Schools, and 19 in extra mural

courses in model schools and 143 in Vocational teacher-training courses.

The year 1925 saw a decrease of 479 in the enrolment of which 431 occurred in second and third class courses, an increase of 66 being shown in the number of candidates for first class certificates. No students were trained in the Autumn Model Schools. In the English-French Model Schools the regular and Summer Sessions had enrolled 311 students in academic courses in addition to their enrolment in professional courses.

Rural Schools Organization and Consolidation.—(See Table 90 page 64). As shown above and on page 7 during the calendar year 1924 there were 238,578 pupils in rural schools in Ontario. These were accommodated in 6,015 schools with 7,270 teachers, 854 male and 6,416 female. Of the schools more than 5,000 were one-room schools. Of all the rural schools, 623 had school medical inspection; 117 nurse inspection with medical supervision; 218 inspection by nurses only; and 73 dental inspection. The nurse inspection was done by a staff of 34 nurses. In the matter of special subjects taught 58,682 pupils were instructed in agricultural subjects; 20,536 in manual training; 10,060 in household science and 71 in commercial subjects. There were 5,654 of the rural schools with libraries. The daily average attendance of these rural schools was 155,952 or 65 4 per cent. of their enrolment as compared with 70 per cent in all public and separate schools.

There are now 27 consolidations in Ontario. In these consolidations there were in 1924-1925. 3,577 pupils in 111 graded classrooms and 44 in a one-room school. Of the 3,621 in consolidated schools, the average daily attendance was 2,970 or 82 per cent of the enrolment, 270 being in continuation classes. As already mentioned the Continuation Schools and Fifth classes serve rural communities with facilities for secondary education. In summary of rural schools in

Ontario the following figures may be of interest.

|                                                                                                         | Total                                                   | Number in<br>high school<br>grades |
|---------------------------------------------------------------------------------------------------------|---------------------------------------------------------|------------------------------------|
| Pupils in Rural Schools— Public Separate.                                                               | 216,362<br>22,216                                       | 3,994<br>937                       |
| Children of Agriculturists in— Continuation Schools. Collegiates or High Schools. Full-time Vocational. | $\begin{array}{c} 5,807 \\ 12,310 \\ 2,214 \end{array}$ | 5,807<br>12,310<br>2,214           |
| Total                                                                                                   | 258,909                                                 | 25,262                             |

While "children of agriculturists" are not in all cases rural children the above figures may serve to give a general idea of the proportion of rural school children in high school grades.

Agricultural, Industrial and Other Technical Education.—The various phases of vocational or prevocational and cultural work in the schools included the following activities: 1, elementary agricultural classes; 2, manual training and domestic science in the ordinary schools; 3, agricultural secondary schools; 4, industrial and technical education in vocational schools; 5, work of college grades in agriculture and applied science.

Elementary Agricultural Classes.—During the year 1925 there were 2,121 ungraded public schools and 60 ungraded separate schools with classes in agriculture. In the same year there were 254 graded public and 74 graded separate schools with classes in agriculture. The schools with classes in agriculture have increased from 4 in 1903 to 2,509 in 1925. The number of pupils taking agricultural work in public and separate schools in 1924 was 83,196; in the continuation schools 332; in the high schools and collegiate institutes 2,046. The school fair organizations to the number of over 7,500 are directly under the charge of agricultural representatives, who co-operate with teachers and inspectors. Courses are provided at the Ontario Agricultural College covering two consecutive summers of five weeks each. These courses were introduced in 1913, and since 1914, 214 teachers have qualified for Intermediate certificates in agriculture 12 of these qualifying in 1925. In the normal schools, teachers in training for first class and second class certificates receive regular instruction in methods and have some practice-teaching in agriculture. Schools are affiliated with the normal schools for this purpose. Summer courses at the Ontario Agricultural College in 1925 had 167 students of whom 3 were inspectors.

Manual Training and Domestic Science.—These activities are carried out by means of the centre' system. Rooms are equipped in some central schools and pupils from other schools

attend this centre at stated times. The morning classes continue for a period of one and a half hours and the afternoon classes for a period of two hours. In the larger schools Manual Training and Household Science teachers take charge of their subjects throughout the whole school,

and spend their whole time with the pupils of one school.

At present there is no provision made for qualifying Manual Training instructors other than that of the Summer Schools which continue for five weeks every summer. Such provision is under consideration in connection with the college for training industrial teachers. Training classes which continued for one year were formerly held at the Ontario Agricultural College. An experiment was initiated two years ago of holding classes for teachers in service at the normal schools on Saturdays throughout the year. Previous to this year Part I only of such course was given at the normal schools, and teachers attended in Toronto for the second part of the course. Commencing with 1923-24, Part II has also been given at the normal schools in addition to the summer schools annually held in Toronto. Household science teachers are trained at the College of Education and at Macdonald Institute, Guelph. Students entering these schools are required to possess a Second Class teacher's certificate. Successful completion of this course entitles a student to what is known as the "Ordinary" certificate. The "Specialist" certificate in household science is obtained by a four-year university course.

There are now in actual operation 121 manual training and 122 household science centres

in 37 cities and towns.

In all day schools except the vocational schools, there are 131,991 pupils taking manual training and 81,199 taking household science.

Industrial and Technical Education.—The activities in manual training, and household science discussed above are in addition to what is known in Ontario as industrial and technical ducation. The former courses are either included with the ordinary school courses or consist of regular or short summer course given for the purpose of training teachers for the work in ordinary schools. On the other hand "Technical" education is carried on in a distinct system of schools (called technical or vocational schools). The day vocational schools are co-ordinate with secondary schools. Pupils qualified to enter day high schools are admitted to full time day courses in commercial or technical high schools; pupils of at least Fourth Form standing (Fourth Form = Grades VII and VIII) are admitted to a general, special or part-time course in an industrial, a home-making or technical high school; workmen or work women employed during the day may be admitted to a vocational evening school if competent to receive instruction therein. The vocational day schools, therefore, include all day technical work except (1) manual training and domestic science in the ordinary elementary schools and in the normal and agricultural schools; (2) agricultural work in the ordinary schools and in the agricultural high schools; (3) any kind of technical work, whether agricultural or industrial, above secondary grade. During the year 1924-25 there were in the 27 vocational schools, 11,595 full time pupils, 5,481 of whom were admitted for the first time to secondary school. In 6 of these vocational day schools there were 1,739 part time day pupils. In 15 of the day vocational schools there were 1,875 special pupils. The subjects of instruction were ordinary academic high schools studies (English, History, etc.) and over 50 different kinds of practical vocational subjects. Among these were included housekeeping and commercial subjects. In 52 evening vocational schools there were 35,675 pupils. Among the interesting items of information given by the director of Technical Education is the fact that of the 35,675 evening pupils 23,170 were born in Canada; 9,024 in the British Isles and 3,481 in other countries. The number of teachers employed were 416 full time and 108 part time teachers in day schools and 1,182 teachers in evening schools.

The direction of vocational education includes also the training of teachers for vocational

subjects.

A new feature of technical education in Ontario was initiated during the year in the form of rural evening schools. Classes were opened in 5 villages with an enrolment of 258 pupils. They were instructed by itinerant teachers who carried their equipment with them and with the aid of some locally provided equipment were able to offer a practical course to those in attendance. A similar feature was introduced in New Brunswick about four years ago.

The scheme of training vocational teachers, i.e., teachers of shop or practical subjects in summer courses terminated on September 1st, 1924. A new institution called the Ontario College for Technical Teachers has been established in Hamilton to train vocational teachers. The new course is a more extended and comprehensive one than the one replaced. Each teacher-intraining is required to take 20 weeks training, 10 of which may be taken in two summer courses of 5 weeks each, and 10 of which may be taken in an autumn or spring term. The Hamilton Technical Institute is used for observation work and practice teaching.

A step forward in the matter of co-operation between the school and industry in the training of apprentices has been taken in Hamilton where arrangements have been made with certain firms whereby the apprentices may attend the schools for four hours a week during the day or

two hours a week during the evening.

The condition under which the apprentices from one of the firms attend the Technical Institute are as follows:-

- 1. All apprentices taken on are to have an educational standard equivalent to High school Entrance standing;
- 2. All apprentices are to attend classes at the technical school for the required number of hours per week;

3. All apprentices are to be paid the regular rate of pay for the time in attendance at day school. Pay is to be deducted in the case of absence from school on the same basis as absence from work;

4. The Technical Institute is to submit a weekly absentee report to the Company;

5. All apprentices are required to write on an examination every six months, the examination to be set jointly by the Company and the school;

6. The results of the examination will be taken into consideration in fixing rates of pay; 7. The Company will pay the registration fees for the evening classes at which regular attendance is required, and non-attendance without reasonable excuse or permission, will be considered cause for dismissal.

8. The schedule of the work will be prepared jointly by the principal of the school and the

representative of the Company.

The Hamilton Technical Institute has had for some time a similar arrangement with the local branch of a typographical union. In Ottawa a co-operative scheme for making use of the technical school for the training of plumbers and steamfitters has been arranged. The City Inspection department makes use of the equipment of the school shop in conducting the examination for civic licenses. Certain other similar co-operative arrangements have also been made in Ottawa.

A new navigation school was opened at Midland in January, 1923, this being the third centre in the province in which day navigation schools are carried on during the winter.

Further progress in the co-operation between the technical school and industrial plants was reported for 1925. During the spring (of 1925) the Ford Motor Company decided to supplement their apprenticeship system further by accepting graduates of the Windsor-Walkerville Technical School. Ten graduates in the tool and die departments and four in the electrical department were accepted. Towards the close of the year a new apprenticeship agreement was drawn up by the Canadian Consolidated Rubber Company at Kitchener under which apprentices are requested to attend the evening classes of the Kitchener-Waterloo vocational school during the term of their apprenticeship. The agreement applied to the machinist, the pattern-making and the tinsmithing trades. (As an example of the co-operation between technical schools and industries in other provinces might be mentioned an advanced stage of co-operation reached in Montreal.).

Medical Inspection.—A school Health Division under a medical director reports the existence of some twenty units made up of a combination of rural and urban schools, for the purpose of employing a competent school nurse. There were in 1922 in the province 63 centres equipped with full time school Health service, employing in all six physicians, 12 dentists and 95 nurses.

Auxiliary Classes.—There are now (1925) in Ontario 145 auxiliary classes of which 115 are for backward children, an increase of 22 classes during the year. Of the classes 19 were auxiliary vocational classes in connection with the technical schools in Toronto with 410 pupils. During the year a regulation was approved which provides that, in areas where such auxiliary vocational school does not exist, promotion classes may be formed within the public school panel for children over thirteen years of age. Seven such classes have been established.

Higher Education.—In the State University of Toronto, and its federated universities, and one college in affiliation, and 4 other universities and 14 colleges, all higher institutions, there was a net total of 10,778 regular students, exclusive of Short Correspondence and Preparatory students.

*Private Schools.*—The number reported in elementary and secondary private schools was 5,906. The analysis of these institutions may be seen in Table 150. Tables of business colleges will be found on page 122.

School Support.—The expenditure on education during the year was \$45,030,685, of which \$23,687,557 was on teachers' salaries in public, separate, continuation, high and vocational schools. The corresponding figures for 1924 were: the total expenditure, \$48,034,564 and teachers' salaries \$22,483,377. Full particulars of these receipts and expenditures may be seen in Table 122.

#### **MANITOBA**

Summary of All Education Institutions.—During the school year 1924-25 the enrolment in all educational institutions in Manitoba was 161,332. Of this number 145,834 were enrolled in state controlled elementary and secondary schools, exclusive of vocational schools; 695 in schools for teacher training; 1,479 day pupils and 3,579 night pupils in vocational schools; 25 pupil teachers in summer schools for the training of vocational teachers; 81 Manitoba pupils in the school for the deaf in Winnipeg; 14 Manitoba pupils in the school for the blind in Brantford, Ont., and 7 in Nazareth school for the blind, Montreal; 5,108 in universities and colleges; 1,840 in business colleges; 524 in private elementary and secondary schools; and 2,153 in Indian Schools.

The a commodation for this enrolment was 1,991 elementary and secondary school buildings with 3,912 departments and 4,028 teachers; 5 Normal schools with 17 teachers; day vocational schools in 3 municipalities and evening in 1 municipality with 100 day and 63 evening teachers; 1 school for the deaf in Winnipeg; a school for the blind situated in Brantford, Ontario, to which Manitoba pupils are sent by interprovincial arrangement; 1 industrial school for delinquents at Portage La Prairie; 1 provincial university; 5 affiliated colleges (Brandon College being

affiliated with McMaster in Ontario and the others, including St. Boniface with the university of Manitoba); 1 law school; 1 agricultural college in affiliation with the provincial university; 5 private business colleges reporting, with a teaching staff of 25; 3 private elementary and secondary schools reporting, with a teaching staff of 22 and 52 Indian schools (See Tables 1 and 2).

Public Elementary and Secondary Schools.—Enrolment.—Of the 145,834 pupils enrolled in elementary and secondary schools, 132,467 were enrolled in elementary and 13,367 in secondary grades. The accommodations for these were as follows: over 3,500 elementary departments with 132,467 elementary grades pupils and 1,415 secondary grade pupils; 119 intermediate departments (that is schools having one teacher available for high school work) with 2,594 doing high school grade work; 45 high schools (schools with 2 teachers available for high school work) with 90 high school departments and 2,352 high school pupils; 9 junior high schools (schools doing work of grades VII, VIII and IX) with 1,181 doing high school work; 10 collegiate departments (schools with 3 teachers available for high school work) with 940 pupils doing high school work, and 11 collegiate institutes (4 or more teachers available for high school work) with 4,875 pupils doing work of high school grade.

The increase in enrolment in these schools over the previous year was 1,343 or about 0.9 p.c. The number in secondary grade increased 4 per cent. making an increase of 55 p.c. since 1921.

Average Attendance.—The number of pupils in average daily attendance was 104,312, an increase of 537 over the previous year. The average attendance formed 71.5 per cent of the enrolment, as compared with 71.8 per cent in 1924. This is a slight decrease, but an increase is revealed by analysis of the number of pupils attending by day groups from which the median attendance can also be deduced. Even since 1921, the census year, the percentage of the enrolment attending for 150 days or more has increased over 13 per cent.

The percentage of the total enrolment attending certain periods since 1917 can be seen in

Table 8.

Secondary Education.—The number in secondary grades was 13,367 or 9.2 per cent of the total enrolment. This proportion of the total enrolment is now as high as the highest in Canada six or seven years ago. There is, however, more than one way in which high school enrolment may grow, one being an increase in those entering grade IX work and taking only a year of high school work and another in an increase in those who complete the high school course. Analysis of the high school enrolment since 1918 shows that 1924 and 1925 were considerably in advance of previous years in respect to the latter form of increase, and that there is some evidence of an upward trend since 1918.

| ${ m Year}$                  | Actual                    | Per cent             | Per cent of total |                                        |
|------------------------------|---------------------------|----------------------|-------------------|----------------------------------------|
|                              | enrolment                 | total                | high school       |                                        |
|                              | Grades                    | enrolment            | enrolment in      |                                        |

| 1925                         | 13,367                    | 9·17                 | 56                | 26                                     |

The enrolment in grade XI has increased from about 40 p.c. of grade IX in 1918 to 55.5 p. of grade IX in 1925. This is the natural final year of high school, for the number proceeding to grade XII is small owing partly to the fact that it overlaps to a certain extent the first year in Arts at the Universities and colleges. There is little doubt that the regulations governing teachers' certificates have contributed largely to this continuation on the part of pupils through the high school course instead of dropping out in grade IX or X.

Teachers.—The number of teachers during the year was 4,028. A slight drop between 1923 and 1924 occurred in the proportion of male to female teachers. The males decreased in absolute numbers by 93 while the females increased by 137. This movement continued in 1925, the males decreasing by 138 and the females increasing by 186. While the total number of teachers increased only by 92 since 1923, the First Class teachers increased by 153, the second class by 89, while there was a decrease of 194 in the number of teachers with third class certificates. The number of teachers' residences has now increased to 327, several towns and villages having a principal's residence.

Teachers in Training (see Table 120).—In the provincial normal school in Winnipeg the enrolment was 399 students including 277 in the course for Second Class teachers, 77 in the year course for first class teachers and 45 in the course for university graduates. In the provincial normal school in Brandon were registered 123 students training for Second Class certificates. In the 3 local normal schools there were 173 in the course for Third Class teachers.

The Manitoba Teachers' Summer School, a joint enterprise of the Department of Education and the University of Manitoba, had an enrolment of 610 students. A list of 36 subjects taken

during the year included 24 Academic subjects, of which Grade XII and First Year Physics attracted the largest number of students (83), four professional (teachers') courses and 8 technical courses of which Home Economics attracted 37 students.

Rural Schools.—The Miniota Municipal School District in 1925 completed its sixth year of operation under the (rural) municipal system of organization. The work of education in this municipality was carried on at 8 centres with 20 teachers, the aggregate enrolment being 492. The percentage in daily attendance was 89.6. The council of the municipality collects taxes for five union school districts within its borders. These five include a one-room rural school, a two-room, a three-room and a five-room consolidated school and the municipal school district.

No new consolidated districts were formed during the year, the existing number of consolidations being 110. In the cases of both the consolidated and the municipal school district the methods of financing are evidently a definite step in advance of the single rural one-room school

board.

An amendment was made to the public schools Act in 1924 to provide that "whenever the average attendance of children in any school district for any time is five or less than five the trustees of such a district shall not engage a teacher for the ensuing term nor make any arrangements to open the school therein but shall make provision for the transportation of the children of the district to some adjoining district or districts, or shall make satisfactory provision for and pay the living expenses of such children in some other district and report the circumstances to the Department....."

School Support.—The expenditure on education during the year was \$10,671,328 (\$8,547,445 excluding promissory notes). Of this \$1,310,067 was contributed by the government and \$9,361,261 by ratepayers, etc. (\$7,237,379 excluding promissory notes); \$4,838,723 was expended on teachers' salaries. The corresponding figures for 1924 were as follows: total expenditure \$11,284,095; amount contributed by the Government, \$1,096,010; by ratepayers, etc., \$10,188,085; while \$4,849,712 was expended on teachers' salaries (See Table 122).

#### SASKATCHEWAN

Summary of Attendance in All Schools.—During the school year 1924-25, there were 216,303 enrolled in all educational institutions. Of this number 199,579 were enrolled in public and separate elementary and continuation schools; 7,016 in high schools and collegiate institutes, 1,929 in agricultural and technical schools of secondary grade; 1,702 in teacher-training institutes; 71 in the school for the deaf at Winnipeg and in the school for the blind at Brantford Ontario; 1,416 in universities and 180 in colleges; 360 reported in private business colleges; 2,344 in private elementary and secondary schools; and 1,707 in Indian schools. There were also 523 residents of Saskatchewan attending Canadian universities and colleges outside the province.

Publicly Controlled elementary and Secondary Schools.—The 206,595 enrolled in publicly controlled elementary and secondary schools were distributed among the various types of schools as follows: 118,741 in rural schools; 23,011 in city elementary schools; 21,533 in town elementary schools; 36,294 in village elementary and continuation schools and 7,016 in high schools and collegiate institutes. (See Table 2, page 10).

Average Attendance.—The average daily attendance in 1925 in public and separate schools was 139,096 and in secondary schools 5,554 or a total of 144,650, as compared with 139,782 in 1924. The average attendance formed 70·1 p.c. of the enrolments as compared with 68·5 in 1924 and 67 in 1923. The percentage in rural schools was 65·3; in village schools 72·8; in town schools 77·4; in city schools 80·1 and in high schools and collegiate institutes 79·2. Since the data of 1921 can be compared with the census data for minute details of attendance it will be interesting to see in what respects 1925 differs from this year in attendance by groups of 20 days each.

| Number attending                                                                                                              |                                                                                                          | Absolute<br>numbers                                                                                     |                                                                    | Per 1,000<br>enrolled                                            |  |

There are two features to be noticed in the above figures which do not seem to be peculiar to any one province but to the general drift of school attendance. In spite of the general improve-

ment there is no improvement in the case of those attending less than 60 days. Those attending 140 days and more (that is 7 months and more comparable with the period of attendance ascertained by the census of 1921) increased from 450 per thousand in 1921 to 608 per thousand in 1925, but those attending less than 3 months decreased only from 185 in 1921 to 178 in 1925. The census gave 733 per thousand at the ages of 5 to 19 as attending 7 to 9 months in 1921. There are many reasons for the difference between this and the 450 above, one being that other institutions than publicly controlled schools are included in the census figures, another being that 140 actual days attended as given by the provincial reports is different from "7 to 9 months" as given by the census. If a child had attended a few days during a month it is likely that he would be reported to the enumerator as having attended "a month". Thus the 450 would represent 7 or more full months, while the 733 would not necessarily do so. Perhaps a greater cause of discrepancy is the fact that children changing schools during the year and registered more than once cause an understatement of attendance. If in the above table median figures be used it will be seen that half the children in 1921 attended more than 130 days, while in 1925 half attended more than 162 days so that attendance from this point of view has increased an average of 32 days in 4 years. It is here considered more important, however, that the attendance for a period approximating to a full year has improved from 450 in 1921 to 608 in 1925, or 35 per cent. The rapid attrition of the 60 to 150 day attendance shows elimination of a waste which interferes with school progress more perhaps than any other feature.

Grade, Age and Sex Distribution.—See Tables 19 and 37-40.

Secondary Education.—The number of pupils reported in high school grades in 1925 was 17,545. Of this number 6,756 were enrolled in high schools and collegiate institutes, 2,461 in rural schools, 5,121 in village schools, and 3,207 in town schools over and above the town pupils enrolled in organized high schools and collegiate institutes. The number of boys was 7,259 and of girls 10,286. The enrolment of 17,545 corresponds to 15,996 in 1924. This is an increase of 9.7 p.c. As there were 938 in day technical schools, it will be seen that there were over 18,483 pupils of secondary grade in publicly controlled schools in the province. Also there might be added 558 high school pupils in private schools, and about 80 in Indian schools not included with these private schools, bringing the pupils of secondary grade up to about 19,100. Since Grade VIII also increased from 14,020 in 1924 to 15,651 in 1925 it would seem that the material exists for a further increase in secondary grades in 1926. The enrolment in high school grades now forms 8.5 p.c. of the total enrolment, or 8.9 p.c. if we include the day technical schools.

Teachers.—The number of teachers in 1925 was 7,520, 2,014 males and 5,506 females. Of these 1,911 males and 2,500 females were in rural schools; 1,917 males and 2,500 females were in urban elementary and continuation schools; and 131 males and 85 females were in high schools and collegiate institutes. Their classification and salaries may be seen in Table 116.

#### ALBERTA

Summary of Enrolment in All Institutions.—During the school year 1924-25 the enrolment in all educational institutions in Alberta was 158,063. Of this number 145,692 were in ordinary day schools; 4,468 in vocational schools; 631 in teacher-training institutes; 1,354 in universities and 275 in colleges; 46 in the school for the deaf in Winnipeg, in the school for the deaf at Belleville, Ont., in the school for the blind in Brantford, Ont., at Nazareth institute for the blind, Montreal, and at the school for the deaf and blind, Point Grey, B.C.; 2,209 in private business colleges; 2,104 in private elementary and secondary schools; and 1,284 in Indian schools. The number mentioned in vocational schools does not include students in agricultural schools.

Publicly Controlled Elementary and Secondary Schools.—The 147,796 enrolled in publicly controlled and private elementary and secondary schools were accommodated in 4,759 departments of 3,033 schools. Of this enrolment 55,598 were in 66 cities and towns, 4,977 being in ten separate schools; 24,023 were in departments of other graded schools; the total number of departments in 306 graded schools being 2,032; 68,175 were in 2,727 ungraded schools.

Average Daily Attendance.—The average daily attendance in these schools was 107,880 or 72·9 p.c. of the enrolment, this being an improvement even on the record of 1924. The average daily attendance was 8·1 times that of 1905. This improvement in regularity of attendance over last year is still more evident when it is seen that although the total enrolment was about the same in 1925 as in 1924 the aggregate days attendance was 20,306,183 in 1925 as compared with 19,642,394 in 1924; the number of pupils attending 140 days and more was 92,412 in 1925 as compared with 85,991 in 1924. A large decrease in enrolment occurred in the case of pupils attending less than 120 days or about 6 months. The number of these was only 44,860 in 1925 while it was 50,258 in 1924 and 54,231 in 1923. It is clear therefore that the effective enrolment was considerably greater in 1925 than in 1924.

The increase in the aggregate attendance and in the proportion attending more than six months is, no doubt, slightly—very slightly—due to the fact that the average length of the school year was slightly greater in 1925 than in 1923. This point, however, is apt to be misconstrued. Increase in the average length of the school year, that is, of the number of days schools were opened, is not due to increase in the number of days in the school year, which is an incidental matter, but to decrease in the number of schools which keep open less than the full year. This point has an interesting bearing upon the cost of education, a point which is apt to be overlooked. In 1905 the average length of the school year was 174 days, or taking a lower year, 1907, it was

159.6 days or a still lower year, 1911, when it was 157 days; in 1925 it was 184.7. This shows a difference of 27.7 days or an increase of more than one-sixth over 1911. This increase is not shown in the increase in percentage of attendance. Increased cost of education is almost directly proportional to this increased length of the school year, since short-term schools which were chiefly responsible for the shorter year in 1907 and 1911, cost in teachers salaries only according to the time they were open, while in fuel they cost practically nothing since they were open only in the summer. Thus by virtue of the increased length of the school year alone the current expenditure would be increased by one-sixth since 1911. By virtue of the cause which has increased the length of the year it follows that this increased length means increased efficiency. In the meantime it is seen that the average daily attendance has increased more than 8 times since that period which increase is independent of the increase in the length of the year, except in so far as the latter encourages regularity of attendance.

Grade, Age and Sex.—The pupils in public and private schools were distributed by grade as follows: Grade I, 26,952; II, 18,169; III, 18,953; IV, 17,976; V, 15,922; VI, 14,015; VII, 10,744; VIII, 10,352; IX, 7,034; X, 3,855; XI, 2,959; XII, 865; total 147,796. The increase in the upper grades as compared with lower since 1912, the year in which grade system was introduced, may be seen as follows:—

#### P.C. OF TOTAL ENROLMENT

| Year                       | Grade I                                                                                                                    | Grades<br>IX to XII                                                                                          | Grade<br>VII to XII                                                                                                                  |
|----------------------------|----------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|

Grades IX to XII or the high school grades, have now increased in proportion to the lower grades so that the proportion is now equal to that found in old provinces, cities, etc., and near to what seems to be a limit. The proportion above Grade VI, it is seen, passed the proportion in Grade I in 1923. The increase in this proportion and the decrease in that of Grade I are probably more significant than even the increase in the high school grades. The upper limit of the age of compulsory attendance is about the average age of the pupils in Grade VIII (15 years is limit of compulsory attendance; 14.5 years is average age of Grade VIII). On the average, therefore,

there is not compulsion to attend the high school grades so that the increase in the proportion in these is voluntary. The increase in the proportion in the upper elementary grades, therefore, has a different significance. It might mean that children are compelled to remain at school longer and therefore reach grades VII and VIII in greater proportions than formerly. That this might explain the improvement in 1925 over 1924 may be seen from the following:—

| Age —             | Percentage of<br>enrolment at<br>age                                                                                             |                                                                                                                          | Average (median)<br>Grade at each<br>age                                             |                                                                    |  |
|-------------------|----------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|--------------------------------------------------------------------|--|
| **50              | 1924                                                                                                                             | 1925                                                                                                                     | 1924                                                                                 | 1925                                                               |  |
| 5 years and under | 0·51<br>6·04<br>10·35<br>11·31<br>11·52<br>11·21<br>9·85<br>9·54<br>8·38<br>7·84<br>5·99<br>3·59<br>1·83<br>0·87<br>0·39<br>0·13 | 0·44<br>5·19<br>9·94<br>11·04<br>11·12<br>11·28<br>10·33<br>9·73<br>9·17<br>7·89<br>6·39<br>2·06<br>0·97<br>0·42<br>0·18 | 1.50<br>1.52<br>1.73<br>2.52<br>3.42<br>4.28<br>5.13<br>5.97<br>6.87<br>7.76<br>8.50 | 1.5<br>1.6<br>2.4<br>3.3<br>4.2<br>5.1<br>5.9<br>6.8<br>7.7<br>8.5 |  |

The pupils were on the whole older in 1925 than in 1924 while the median grade at each age remained practically the same. A comparison of 1924 with 1923 in last year's Survey showed results of a somewhat different nature. In 1924 the standing at each age was higher than in 1923. The median grade of those leaving school at 15 was practically the same in 1925 as in 1924. However, there was a smaller proportion leaving school below grade V in 1925. This would seem to be an important form of improvement. The contrast between 1924 and 1925 and previous years in this respect is striking. In 1925 about 7 p.c. of those leaving at 15 were below Grade V; in 1923 11·7 p.c., while in 1921 over 12 p.c. left below this grade.

Secondary Education.—The high proportion of 9.95 p.c. of the total enrolment in secondary grades has already been mentioned. The absolute number in Grades IX to XII increased from 13,446 in 1924 to 14,713 in 1925. The distribution of these by grade in 1924 and 1925 was:—

#### PERCENTAGE IN EACH GRADE OF TOTAL SECONDARY

| •   | 1924         | 1925         |
|-----|--------------|--------------|
| IX  | 43.8         | 47.8         |
| X   | 30.4         | $26 \cdot 2$ |
| XI  | $19 \cdot 4$ | $20 \cdot 1$ |
| XII | $6 \cdot 4$  | 5.9          |

A revised course of studies was introduced into Grade IX in 1923 and into Grade X in 1924. Under the present regulations students in these two grades are required to secure fifty per cent in each subject in order to be granted credit. Six units of work are considered a minimum requirement for Grade IX and seven for Grade X, and students are permitted the choice of certain options in the subjects selected. It is anticipated that the new course will be introduced into Grades XI and XII during the year 1925-26 in which case a student may obtain matriculation to the provincial university or entrance to normal school on the basis of twenty-one units of work selected according to the requirements of the revised course.

Teachers.—The number of teachers in elementary and secondary schools in the June term of 1925 was 4,864—1,260 male and 4,864 female. The distribution by class of certificate was 1,431 first class; 3,101 second class; 200 third class; 45 permit; 48 pending (that is, with certificates from other provinces); and 39 special, such as manual training, domestic science, etc.

 $\it Teachers~in~Training.$ —Over 600 students received certificates from two normal schools, of which the total enrolment was 631.

Summer School for Teachers.—The thirteenth session of the summer school for teachers was held at the University of Alberta from July 2 to August 5, 1925 with an attendance of 109 teachers in the courses put on under the direction of the Department of Education.

Agricultural, Industrial and other Special Studies.—The statistics of these activities may be seen in Section 7. The report of the Provincial Institute of Technology and Arts, is to be found in Tables 132 seq.

Higher Education. See Section 12.

School Support.—The expenditure on education during the calendar year 1924 was \$12,739,976 (less promissory notes, \$11,012,173) of which \$5,443,248 was in teachers' salaries. were \$12,739,576 of which \$1,054,733 was contributed by the government. The cost per pupil enrolled in ordinary schools was \$59.27; in average daily attendance \$81.20. (See page 88 for historical table of receipts and expenditure of Department; page 109 for financial statistics of the university, and page 110 for financial statistics of colleges).

## BRITISH COLUMBIA

Summary of Enrolment in all Educational Institutions.—During the school year 1924-25 the enrolment in all educational institutions in British Columbia was 115,618. Of this enrolment 97,954 were in ordinary day schools (elementary and high); 6951 in teacher-training institutes; 9,704 in technical and night schools; 80 in the school for the deaf and blind, already included with the ordinary school enrolment; 2,1732 in the university and colleges; 1,010 in private business colleges reporting; 1,001 in private elementary and secondary schools reporting; 350 in a departmental summer school for teachers; and 2,736 in Indian schools. The total enrolment in similar institutions during the previous year was 110,915. The year 1924-25, therefore, shows an increase

of 4,703, or 4 per cent on the previous year.

There was an increase of 708 or over 7 p.c. over the enrolment of 1924 in high schools, 948 or 3.6 p.c. in rural municipality elementary schools, while the enrolment in elementary city

schools and in rural schools remained practically stationary.

Elementary and Secondary Schools.—The 97,954 enrolled in elementary and secondary schools were accommodated as follows: 7,373 in 36 city high schools, 2,855 in 21 rural municipality high schools, 369 in 14 rural district high schools, 41,290 in 94 city elementary schools, 27,178 in 201 rural municipality elementary schools and 18,889 in rural district elementary schools. Besides the high schools should be mentioned a number of superior schools and rural schools giving high school instruction. The superior schools are schools which teach high school work and the upper elementary grades.

Average Daily Attendance.—The average daily attendance was 82,721 an increase of 3,459 or about  $4\cdot 4$  p.c. over that of 1923-1924. This attendance formed 84.5 p.c. of the enrolment which

is the highest in the history of the schools in the province.

Teachers.—The number of teachers in elementary and secondary schools in 1925 was 3,294— 847 males and 2,447 females. Of these 378 were in high schools; 1,173 in city elementary schools; 842 in rural municipality schools; and 901 in regularly organized assisted rural schools. The classification of these teachers was 535 academic; 780 first class; 1,597 second class; 187 third class; 19 temporary and 176 special. The male teachers increased by 68 or more than 8½ over the previous year. An increase of 9 academic and 63 first class certificates and a decrease of 48 third class and 21 temporary continue the trend in teachers' classification mentioned in last year's survey. A retrospect of the changes in the status of teachers within the last ten years may be interesting. The composition of teachers in 1915 and 1925 was as follows:—

| Class Certificate and Sex                                                                    |                                                          | )15                                                 | 1925                                                    |                                                           |
|----------------------------------------------------------------------------------------------|----------------------------------------------------------|-----------------------------------------------------|---------------------------------------------------------|-----------------------------------------------------------|
|                                                                                              | Number                                                   | Per cent<br>of total                                | Number                                                  | Per cent<br>of total                                      |
| Academic 1st class. 1st class. 2nd class. 3rd class. Temporary Special. Male. Female. Total. | 416<br>592<br>530<br>322<br>106<br>521<br>1,445<br>1,906 | 21·2<br>30·1<br>26·9<br>16·4<br>5·4<br>26·5<br>73·5 | 535<br>780<br>1,597<br>187<br>19<br>176<br>847<br>2,447 | 16·2<br>23·7<br>48·5<br>5·7<br>0·6<br>5·3<br>25·7<br>74·3 |

A striking change is shown in the decrease in Third Class and Temporary certificates from 21.8 p.c. in 1915 to 6.3 p.c. in 1925. The apparent decrease in Academic and 1st class may be partly or wholly misleading since the "Special" certificates displace these in part and since the raising of the standard for academic and First Class certificates, especially the requirement of normal school training, might account for the remainder. Since the standard has actually been raised the decrease in the lowest certificates is genuine. The superintendent reports that for the first time in several years the supply of fully qualified teachers was found equal to the demand for them. This is reflected in the above figures, especially in the figures for Temporary Certificates which are a sort of barometer of the balance between current supply and demand. The decrease in Third Class Certificates would seem to indicate a more appropriate to the belaise. in Third Class Certificates would seem to indicate a more permanent trend since teachers holding

<sup>1</sup> Including 47 students qualifying as teachers of Vocational Schools.
2 Including 315 in short course.
3 Including 170 in Victoria colleges and 143 in other colleges. See page 94.

<sup>4</sup> These were in addition to an enrolment of 300 teachers and other students in the summer session of the university of British Columbia.

these are "fully qualified" for certain positions and consequently are more difficult to eliminate. Notwithstanding the above considerations the gravitation towards the middle class certificate is perhaps the most striking feature of the figures compared. The teachers' Bureau, organized in connection with the Department of Education in 1923 continued to give free service to boards of school trustees and to teachers.

Teachers in Training.—In all, 648 students (116 men and 532 women) were enrolled in the two Normal schools at Vancouver and Victoria. In addition, 47 took the teacher-training

course to qualify as technical teachers.

The sixth summer session of the University of British Columbia was held in Vancouver in July and August. About 300 teachers and other students were in attendance. A summer school for teachers was held in Victoria at the same time. Eleven courses were offered. There were in attendance 350 teachers. A demonstration school of five divisions with an enrolment of 150 pupils was organized. The pupils comprised for the most part those who had been reported at the end of June as scarcely ready for promotion. In so far as possible the teachers in charge gave special attention to the subjects in which the children were backward. The additional instruction enabled pupils to obtain promotion in September. This feature was, of course, only incidental to the real purpose of organizing the classes, namely to provide a means of demontrating to students and teachers approved methods of presenting the various subjects.

Agricultural, Technical and Other Special Education.—During the year the usual activities conducted under the Branch of Elementary Agricultural Education were maintained—namely, instruction in agriculture in high and superior schools, agricultural nature studies in elementary schools, extension short courses in agriculture given as night-school courses during the winter months and the planning and improving of school grounds. Altogether there were 591 students in agriculture in eleven schools. Technical schools were conducted in thirty-five municipalities in the province with a staff of 221 teachers and an enrolment of 7,386 students. Instruction by correspondence was given to 250 pupils. The enrolment in technical day courses was 2,123. There were also 81 manual training and 55 domestic science centres with an enrolment respectively of 14,223 and 11,193 pupils. Classes for teachers training in technical subjects, were held on Saturdays in Vancouver and Victoria.

Medical Inspection and Special Institution and Classes.—The school for the Deaf and Blind

at Point Grey in 1925 had an enrolment of 80 pupils.

Higher Education.—(See report of university and colleges, section 12.)

School Support.—During the year 1925, the expenditure on education was \$8,329,088 of which government grants, including \$466,000, the annual grant to the provincial university, amounted to \$3,223,671. The amount paid in teachers' salaries, including \$199,918 to manual training and domestic science teachers, was \$4,666,912.

# CHAPTER III.—MISCELLANEOUS NON-PROVINCIAL ACTIVITIES

Division of Child Welfare, Dominion Department of Health.—A Department of Health was created by an Act of the Dominion Parliament in 1919. A deputy minister and an assistant deputy minister were appointed in September of the same year and medical services formerly under the direction of other departments were transferred to the New Department of Health, each service becoming a division of the new ministry under a chief. Certain new divisions were also created, the first of which was the Division of Child Welfare organized in 1920. In accordance with the letter and spirit of the whole Act which strictly recognizes the autonomy of the provinces in matters pertaining to public health, the plan of work and general policy of the division of Child Welfare is co-operation with all provincial authorities carrying on child welfare work and with all voluntary organizations carrying on or interested in this work. A direct channel for such co-operation and inter-communication is offered by the Dominion Council of Health also created by the aforementioned Act. The aim of such co-operation is to assist workers to obtain the best results and to secure general unity of purpose and harmony of method so far as these can be applied. Of special bearing on education is the plan to co-operate with ministers and departments of education in reference to the promotion of school hygiene, medical and dental inspection of schools, provision of school nurses, the special care and training of children needing special care and the instruction of teachers in normal schools on principles and methods of child welfare. Among other subjects receiving the attention of this Division are the following: children's courts, diseases of childhood, education and illiteracy, immigrant child welfare, morals and manners, nutrition and feeding, recreation, and women and children in industry. The first publication was the Canadian Mother's book issued in 1920. The Division has also issued three series of "Little Blue Books" entitled: The Mother's Series; The

Technical Education, Branch of the Department of Labour.—This Branch administers the Technical Education Act under the terms of which the sum of \$10,000,000 was made available for the payment of grants to the provincial governments for the purpose of promoting technical education in Canada during a ten-year period. The amount set aside each year varies from \$700,000 in 1919 to \$1,100,000 in 1924 and remains fixed at this amount until the expiration

of the Act in 1929. The yearly appropriations are allotted to the provinces by setting aside \$10,000 for each province and dividing the remainder in proportion to population. Grants amounting to one-half of the approved expenditures by the provincial governments are paid quarterly; thus the Dominion Government shares equally with each provincial government expenditures on secondary vocational education. Unearned amounts, to the extent of onequarter of the annual appropriation to each province, are carried forward for use during any one or more of the succeeding years.

Ontario is the only province which annually earns more money than can be paid under the terms of the Act. Alberta's expenditures exceeded the amounts paid from federal funds during the two years 1921 and 1922 but this province now has an accumulated surplus. Quebec is the only other province which has in any year earned more than the amount allotted to the province from the total annual appropriation but the unearned amounts carried forward from previous years were more than sufficient to cover the extra expenditures by the provincial

government.

The total amount paid to the provinces during the seven year period ending March 31st, 1926, was \$4,798,944.10 of which \$944,336.69 was earned in the last year. The number of municipalities conducting day classes has increased from 32 in 1919 to 65 in 1925. The centres in which evening classes are conducted now number 156, an increase of 59. The total enrolment in all vocational classes during the school year ended June 30th, 1925, was 88,024 which represents an increase of 27,478 in six years. The most important developments have been in connection with day vocational schools in which the enrolment has increased from 8,512 to 24,137, a growth of 184 p.c.

The work assisted includes pre-vocational or junior high school courses, technical, industrial, commercial, home-making and applied art courses in secondary schools, part-time and continuation classes for apprentices and employed adolescents, short-term courses for adult workers, evening classes for adults and correspondence instruction for workers in isolated districts. Agricultural education is not included because it was provided for under a separate Act which expired in March, 1924. (Director—A. W. Crawford, Department of Labour, Ottawa.)

Indian Education.—During the year ended March 31, 1925, there were in operation a total of 333 Indian schools, of which 247 were day schools, 73 residential and 13 combined public and Indian. The total enrolment for the year was 14,222 pupils, of whom 7,031 were boys and 7,191 were girls, being an increase of 350 over 1924. The enrolment was distributed as follows:—Day Schools, 7,997; Residential Schools, 6,031; and Combined, 194. The average attendance was 9,879, or an increase of 691 over the preceding year. In addition, there were about 130 Indian children being given secondary education in high schools and private institutions throughout the Dominion. The 333 Indian schools in operation during the year were conducted under the following auspices: Undenominational, 52 Day and 13 Combined; Roman Catholic, 78 Day and 39 Residential; Church of England, 72 Day and 13 Combined; Roman Catholic, 78 Day and 39 Residential; Church of England, 72 Day and 20 Residential; Methodist, 39 Day and 7 Residential; Presbyterian, 5 Day and 7 Residential; and Salvation Army, 1 Day School. The expenditure for Indian Education from Parliamentary Appropriation for the fiscal year ended March 31, 1925, was \$1,854,609. In addition to this, various bands of Indians contributed \$65,496 towards the payment of teachers' salaries, etc. (Superintendent, Russell T. Ferrier, M.A., Department of Indian Affairs.)

The Boy Scout Movement in Canada.—The Boy Scout Movement originated in England in the fall of 1907, and was incorporated by Royal Charter in 1910. It found a foothold in Canada almost as soon as Sir Robert Baden-Powell had finished his book "Scouting for Boys" in 1907. It was incorporated in Canada by an Act of Parliament in 1914, and at the end of that year there were fourteen thousand Scouts in Canada. Since then the numbers have increased rapidly and to-day there are in Canada over forty-five thousand Boy Scouts and Wolf Clubs.

The movement is organized in each Province under a Provincial Council with national headquarters at Ottawa. The Chief Scout for Canada is His Excellency Lord Byng of Vimy. The chief executive officer in the movement is the Chief Commissioner for Canada, Dr. James W.

The essential features of the Scout system are the emphasis placed on the word honour, the responsibility of Scouts through their own Court of Honour, and the patrol system. The key activity is woodcraft and in all its aspects Scouting is supposed to be a game. The movement is inter-national and embraces all creeds and classes. (For statistics see Table 106. Chief Commissioner, Dr. J. W. Robertson, Ottawa.)

Canadian Association of Child Protection Officers.—At the close of the National Conference on Child Welfare in 1920, two or three provincial Superintendents of Neglected Children and one Juvenile Court Judge gathered together and discussed the possibility of forming a separate association from that of the general council on Child Welfare in order to direct more specialized attention to the questions of neglected, dependent and delinquent children. As a result of this discussion a group composed of Juvenile Court Judges, provincial Superintendents of Neglected Children, children's aid officials, and officials in charge of industrial schools, shelters, etc., met at the Parliament Buildings, Winnipeg, on October 5th, 6th and 7th, 1921, this being the first meeting of the Canadian Association of Child Protection Officers. The second annual meeting was held in Toronto in September, 1922; the third in Winnipeg in September, 1923, and the fourth in Toronto in June, 1924. At the present time there are about 56 members on the membership roll.

The objects of the Association as declared in its constitution are:

First—The discussion of questions involved in the administration of laws relating to the protection and care of children.

Second—The securing of uniformity in these laws and in the methods of their administra-

tion and enforcement so far as advisable.

Third—Co-operation between departments charged with the administration and enforcement of these laws, and with other agencies operating in the field of child welfare. (Secretary—Judge Ethel MacLachlan, Regina, Saskatchewan.)

Canadian Council on Child Welfare.—The Council originated in a large consultative confeence called at Ottawa by the Federal Government in October 1920, as a result of recommendations from practically every National Child Welfare Agency in the Dominion. At this, and a subsequent meeting in May, 1921, the constitution and aims of the Council were agreed upon. The purpose of the Council, as set forth in the constitution is to promote in co-operation with the Child Welfare Division of the Federal Department of Health, and other agencies, the general aims of the council: by annual deliberative meetings; by activities of subsections of memberships on Child Hygiene, Child Industry, Recreation and Education, the Child in Need of Special Care and the Spiritual and Ethical Development of the Child; by affording a connecting link between the Child Welfare Division of the Department of Health and the Council's Constituent bodies; and by such further developments of the general programme of Child Welfare as may be recommended from time to time by the executive or any sub-committee thereof.

mended from time to time by the executive or any sub-committee thereof.

The Council at present is composed of 21 national, and 24 provincial and 48 municipal associations interested in child welfare effort, also of individual members. The executive consists of representatives of each of these constituent bodies. The governing council also includes the chairmen of the five subsections under which the work of the Council is carried on. Each of these sections advises on the particular problems within its field, provides the sectional programme of the annual conference and assumes responsibility for publications on its phases

of the general problem.

The Council is supported by membership fees and by a grant from the Federal Government. Activities so far have included the Annual Conference; educational lectures by its officers; publication of articles in the popular press; and publications on various phases of the Child Welfare problem. Within the last year the Council has opened offices in Ottawa, resulting in a greatly increased volume of work. The most important of its new undertakings has been the establishment of a Dominion wide system of prenatal letters, and the publications of well children examination forms. A special survey on juvenile immigration is at present, under way. A large general correspondence on Child Welfare propaganda is maintained and advisory research, statistical and legislative work in response to special request is also undertaken. (Secretary, Miss Charlotte Whitton, M.A., Plaza Building, Ottawa.)

Canadian Girl Cuides.—The Girl Guide movement was founded by Sir Robert Baden-Powell, the Chief Scout, to afford an attractive scheme of work and play whereby girls should receive a special training in character and efficiency. The training tends in four main directions: (a) character and intelligence, (b) skill and technical knowledge, (c) service for others, and practices planned for the purpose. Development of the individuality of the girl is one of the essential points.

essential points.

The movement is designed to help parents and teachers in their task of education for good citizenship. It is non-class, non-political and inter-denominational. A Guide on enrolment promises (1) to be loyal to God and the King (2) to help others at all times, (3) to obey the Guide

Law.

The Guide Law is:-

1. A Guide's honour is to be trusted.

2. A Guide is loyal.

3. A Guide's duty is to be useful and to help others.

4. A Guide is a friend to all and a sister to every other Guide.

5. A Guide is courteous.

6. A Guide is a friend to animals.

7. A Guide obeys orders.

8. A Guide smiles and sings under difficulties.

9. A Guide is thrifty.

10. A Guide is clean in thought, word and deed.

Guides were first organized in Canada in 1910. The Canadian Council of the Girl Guides Association was formed in 1912, and incorporated by Dominion statute in 1917. The Chief Commissioner for Canada is Mrs. H. D. Warren of Toronto, and the Canadian Guide Head-

quarters are at 22 College Street, Toronto.

The movement now has four distinct branches: Brownies for girls 8 to 11, Guides for girls 11 to 16, Rangers and Sea Guides for girls over 16. In December 1925, there were 597 Guide Companies, 255 Brownie Packs, 39 Ranger Companies, and 6 Sea Guide Companies, active in Canada. Each company or Pack manages its own funds but makes no contribution to Headquarters. The Canadian Council Girl Guides Association receives a grant from the Dominion Government. For statistics see Table 105.

The Canadian Red Cross Society.—The Canadian Red Cross Society has developed a peacetime service to the people of Canada in accordance with article XXV of the Covenant of the League of Nations to which Canada agreed at the Peace Conference:— 1. The first duty of the Red Cross, acting as an auxiliary to the Government is to render

help and comfort for sick and disabled ex-service men.

2. In the Junior Red Cross more than 100,000 Canadian school children in over 4,000 class rooms are banded together to play the health game; to render helpful service to others less fortunate than themselves; and to become good citizens. The organization and activities of the Junior Red Cross are dealt with in a separate report in this volume.

3. Public Health Nurses relieve suffering and by health teaching carry on an important part of the Nation's health service. The Red Cross has promoted their training for public health

service and foster their employment.

4. Red Cross Nursing Outposts bring nursing service within the reach of the families widely separated on the edges of pioneer settlement. There are 31 outposts, chiefly in the Prairie Provinces and Northern Ontario. A nursing outpost, as conducted by the Red Cross, soon becomes a health centre for the district in which it is established, and particularly in emergency and maternity cases it may perform the functions of a hospital. From it the nurse (or nurses) which the home and where processory the schools of the surrounding district and in this were visits the homes, and, where necessary, the schools of the surrounding district and in this way

is in a position to give advice on general matters of health.

5. Classes in Home Nursing have brought to over 8,000 women a knowledge of simple nursing care, of home hygiene and healthy living that the families may "keep well." The Red Cross course provides 10 periods of instruction and demonstration of about two hours each. lessons are usually taken about one week apart. Many of the Home Nursing Classes are organized through local Red Cross Branches and others through co-operating organizations such as Women's Institutes, I.O.D.E., Y.W.C.A., Women's organizations in churches and other groups. The teachers of Home Nursing Classes are usually trained nurses not actively engaged in their profession. Such nurses have rendered excellent community service at the call of the Red Cross.

6. Red Cross Seaport Nurseries for immigrant mothers and their children are conducted by the Society in the Dominion Immigration buildings at Quebec, Halifax and Saint John in co-operation with the Department of Immigration and Colonization. This Department has

expressed the following appreciation of this work of the Red Cross:—
"This welfare work of the Red Cross does not stop at the port. The trained nurse in charge has a quiet conversation with the mothers regarding their children, and finds out from them whether they wish a visit from a public health nurse. This information is forwarded by whoever is in charge at each port to the Red Cross Head Office in Toronto and from there distributed to the various centres, where arrangements are made for a representative of the Red Cross, or some other organization to visit the family. The nurseries are always open to both British and foreign families. A cup of tea is given to the tired mothers, and milk and biscuits to the children.

"The equipment and space is provided by the Department of Immigration, but the credit of the work is entirely due to the Red Cross Society. It is indeed difficult to estimate the value of the work which is done by this organization. Tired mothers are able to leave their little

flock in the nursery while they attend to their luggage and other business.

On all sides one hears nothing but praise of this work done for women and children at our

During the past five years the three nurseries have cared for over 66,000 infants and children

with follow-up work for over 12,000 families.

7. The Society publishes two monthly magazines, one for seniors the other for junior members. The purpose of these magazines and of the educational leaflet issued by the Society is to present

reliable health information in a simple manner understandable to the average reader.

8. Disaster relief preparedness consists of a skeleton organization which can be amplified in case of civil disaster. The Society has an agreement with the Department of National Defence by which, in case of disaster, tents, blankets, field kitchens, oil stoves and other necessary supplies may be issued from military stores. Disaster relief has been required in forest fires in British Columbia, Ontario and the Maritime Provinces and in crop failure districts of the Prairie Prov-

One broad effect of all the general educational work of the Society is the gradual formation of a public sentiment in favour of public health measures, thus making it easier for the Governments to apply legislation for the betterment of the health of the people. The work which the Red Cross Society has done, or has made it possible for others to do, has helped the various provinces of Canada to make great progress in the Public Health work since the Armistice. (Chief Commissioner—Lieut. Col. James L. Biggar, Toronto.)

The Canadian School Trustees' Association.—This Association was organised in Toronto at the annual convention of the Ontario School Trustees' and Ratepayers' Association of 1923.

There were fraternal delegates from most of the other Provincial Organizations.

The purpose of the provincial organization is to develop a more intelligent interest in the function and value of the school as the greatest agency in democracy for training the future generations for life and citizenship. These provincial organizations endeavour to attain this objective by means of provincial, county and township conferences. There are organizations in nearly all the counties of Ontario and in quite a few townships. The Associations of Manitoba and Saskatchewan are adding yearly to their list of municipal organizations.

The Canadian School Board Journal was started in January 1922 as the Ontario School Board Journal, being the official organ of the Ontario Association. In the succeeding year, it was endorsed by the other provincial organizations and in July 1923, the magazine was enlarged and assumed the name of The Canadian School Board Journal. It is still the property and official organ of the Ontario Association but is subscribed for by members of the other provincial

The Journal now has a circulation of six thousand copies per month. Its circulation is chiefly among members of School Boards both rural and urban. It tries to give its readers the information they require in the administration of their schools. It is a fairly well established fact today that the weaker side of our school system is the administrative. Our teachers are certified by the Department of Education, supervised in their work by inspectors, stimulated to further study by institutes and provided with summer courses for post graduate studies. On the other hand, it is seldom that members of boards of education—particularly in rural areas -come together in conference either by townships or counties to exchange views upon educational matters, or become better informed upon the science of school administration. These provincial and Dominion wide Associations are hoping, therefore, through conferences and the Canadian School Board Journal, to create a more intelligent public opinion regarding the training of youth. We believe the Public School can be made a more potent agent in fitting the youth for prosperous and happy country life. We also believe that education, particularly such as trains for the responsibility and privileges of citizenship, is vital to the success of democracy. (Secretary-Treasurer, W. M. Morris 1104 Bay St., Toronto.)

Manitoba School Trustees' Association.—Organized 1906, having held its 20th Annual Convention in Winnipeg in 1926. Secretary, Robert Love, Melita, Manitoba.

Alberta School Trustees' Association.—Sccretary, Mrs. A. H. Rogers, Ft. Saskatchewan, Alberta.

Saskatchewan School Trustees' Association.—Secretary, J. H. Cunningham, Regina, Sask.

Ontario School Trustees' Association.—Organized 1887, having held its thirty-nine annual vention in Toronto, April, 1926. President; D. B. Macpherson, Port Stanley, Ontario. Convention in Toronto, April, 1926. Sec'y.-Treas., W. M. Morris, Toronto, Ontario.

Junior Red Cross.—During the year 1925 the Junior Red Cross has been officially endorsed by two international groups of Educational experts at Paris and Edinburgh. This is a recognition of the fact that Junior Red Cross has brought into the school room a new influence which is being appreciated by practically all modern leaders in the educational world.

Numerous reports show that the Junior Red Cross in Canada is supplying the inspirations and motive necessary to put life into methods which had been developed years ago, for the methods used by Junior Red Cross were known and used years before Junior Red Cross was thought of. Dr. Nasmith, Chairman of the National Junior Red Cross Committee, visited the western

provinces in May, 1925. With provincial Red Cross representatives he interviewed Deputy Ministers of Education, Provincial Health Officers and Officials of Teachers' Federations, with a view towards securing even better co-operation with the constituted health and educational authorities than existed before.

The visit of Miss Browne, Director of the Junior Red Cross, to Europe, last summer, was the means of gathering together much valuable information relative to Junior Red Cross, and particularly in regard to this organization in other countries. A magnificent banner, inscribed from "British to Canadian Juniors," was presented to Miss Browne in England. This tangible evidence of goodwill of the British Juniors to Canadian Juniors has been the means of stimulating the Junior Red Cross movement in several Canadian provinces, where the exhibition of the banner has been the reason for calling together mass meetings of Juniors. Such meetings have been held in Quebec and New Brunswick, and it is intended that the banner will be displayed in each of the other provinces of Canada.

The program of the Junior Red Cross is being carried out in all Canadian provinces in each

of the three main activities, health, service and citizenship.

Health.—Junior members are working for health for themselves and others. They take upon themselves the obligation of putting into practice the simple rules on which healthy living is based. They drink milk and plenty of water, but no tea or coffee. They eat fresh fruit and vegetables, and in many cases, they organize a hot lunch in rural schools where it is impossible to go home for the meal. They sleep with their bedroom windows open. They keep themselves clean. They are careful to avoid passing germs on to others. Further, they help to keep the classrooms clean and sanitary.

Service.—While the service rendered by Juniors throughout Canada cannot be measured in terms of dollars and cents, the fact that 624 handicapped and crippled children have been treated in one year through the efforts of their Junior Red Cross comrades, is an indication of the very potent appeal made by this work. The contribution of Junior Red Cross as a great National service to suffering humanity can be visualized in these figures.

Citizenship.—The child who has learned to protect his own health and that of others, and who has learned to serve is essentially a good citizen. The responsibility which he must take as a member or as an officer in his club, gives him further training in citizenship. Through Junior Red Cross, the members learn not only the great lessons of good-will toward other children in their own country, but, through their international correspondence, a real feeling of comradeship is developing among the members of the Junior Red Cross throughout the world.

Special Civic Activities.—Juniors provide water-coolers and individual drinking-cups, washbasins and individual towels, libraries, flags, etc., for their own schools.

They send gifts of fruit, flowers, etc., to the sick and shut-ins in their own communities. They make garments for needy children, send Christmas boxes, provide Christmas trees. They make scrapbooks, toys, valentines, Christmas cards, Easter cards for children in hospital, and for children landing at the ports.

Interschool Correspondence.—During the last year there has been a great development in This is carried on between Junior branches in Junior Red Cross correspondence in Canada. the various provinces of Canada or between Canadian branches and those in other countries. During 1925, Canadian Juniors prepared 84 portfolios and composite letters, and received from other countries a total of 60 portfolios and composite letters. The other countries participating in this scheme of international correspondence with Canada are,—Great Britain, Australia, New Zealand, South Africa, U.S.A., Japan, France, Belgium, Spain, Norway, Austria, Czecho-Slovakia, Poland, Germany, Italy, Roumania, Latvia, and Hungary.

The National Junior Red Cross distributed more literature to provincial divisions in 1925 than in preceding years. A Canadian Posture Poster was prepared and sent out late in the year. Earlier in the year a series of five coloured wall posters reproduced from paintings by the European artist, Maggie Salzedo, were received free of charge from the Junior Section of the League of Red Cross Societies. These were distributed free of charge to the provincial divisions for use

in schools in which Junior Red Cross is organized.

The objects of Junior Red Cross are being carried out by the children and young people themselves with a minimum of guidance from the teacher-director. The class room is the unit of local Junior Red Cross organization and the teacher is the local director. Participation is, of course, entirely voluntary both on the part of the teacher and the pupils. The Junior members elect their own officers and conveners of committees and conduct their meetings according to a simplified but correct parliamentary procedure (For Statistics, see Table 104.—Director: Miss Jean E. Brown, 410 Sherbourne Street, Toronto.)

The League of the Empire.—The League of the Empire was founded in London, England, in 1901, Lord Strathcona being its first President.

Shortly afterwards a branch was formed in Toronto, Ontario, with Principal Hutton of University College as its Chairman.

The fundamental aim of the League is to bring the overseas Dominions more closely in touch with the Motherland and with each other, and to promote better understanding among all parts of the Empire by means of educational co-operation.

The League has from the first made a special effort to unite the schools of the Empire in management and in methods. In order to attain these objects the following courses have been

followed:-

- 1. Representative Gatherings.—Three conferences of delegates from all over the world have met in London to consider every phase of educational progress. The fourth Conference took place in Toronto, in August 1921, at the invitation of the Ontario Government and with the Honourable the Minister of Education as Chairman. This gathering was a great success. Over 400 delegates were present from all parts of the world. The fifth Conference, held in London in 1924 were attached the world. The fifth Conference is being held. in 1924, was attended by many Canadians. This year another Conference is being held in Paris and a party of Canadians is to attend it.
- 2. Comrades' Correspondence.—Through this branch teachers and pupils from all parts of the Empire are introduced to each other by correspondence. In the last few years thousands of Ontario children have made friendships all over the world in this way.
- 3. Exchange of Teachers.—This department of the work began in the Head Office in England in 1907, and through its efforts teachers and inspectors have been exchanged, except during the war, every year since. In the year 1925 the League had fifteen exchange teachers in Ontario, six in Quebec, two in Nova Scotia, eight in British Columbia, ten in Alberta and eight in Manitoba. This scheme has so proved its usefulness that the different departments of education have now undertaken this work themselves, but a large share of useful work in the way of introductions, information, arrangements for lodging, etc., will always remain to be done.

In the Provinces where there is a branch of the League monthly meetings, partly social and partly educational, are held and the overseas teachers are given the opportunity of hearing addresses by prominent Canadian speakers on different phases of Canadian life. Trips are arranged to places of interest and everything possible is done to acquaint them with the spirit

of Canada.

4. Travel Tours.—In 1925 a party of English teachers travelled across Canada to the Pacific Coast; another party is expected this year. Three parties of Canadians are to tour Europe this year and it is hoped that both these tours may be an annual event. (Secretary for Canada -Mrs. H. S. Strathy, 8 Earl Street, Toronto.)

The Ontario Federation of Home and School Associations.—The Home and School movement in Ontario was founded by the late Mrs. A. C. Courtice in Toronto, in March 1916, and in the province in 1919, in the faith that education needs the active co-operation of parents and teachers, of home and school. The reception of this idea and the growth of the movement have more than justified the vision of its founder. It is an organization of men and women, its ideal executive committee being composed of an equal number of men and women. The Annual Convention is held Easter week in connection with the O.E.A. of which it is a section.

There are now some 300 associations in Ontario, gathered in Councils in cities and towns, and operating as individual associations or clubs where there is only one or a small number of In the larger cities, the Councils have in affiliation from five to thirtyclubs in the vicinity. five clubs, each carrying on its work in its own school and meeting in a general session monthly or every two months for inspiration and information on special phases of their educational work. There is an increasing demand for the organization in rural schools, the rural clubs now numbering

The objects of the organization, as expressed in the Constitution, are:—
"The object of the Association shall be to promote co-operation between teachers, parents and school trustees; to get the largest possible returns to the community from the school for old and young alike; to support all progressive measures of the Local Board of Education and of the Provincial Department of Education in regard to school improvement; to inquire into educational problems, and in every way possible to create the best conditions for the training of boys and girls into good Canadian citizens. Any person who sympathizes with the object of the Association shall be eligible for membership."

The organization is of as great value in high schools and collegiate institutes as in the elementary schools, some of our cities scoring a hundred per cent in organization by having a Home

School organization in every elementary and secondary school.

While the early efforts of the majority of associations are given to the supplying of material needs of the school, such as pianos, gramophones, flags, dishes, gasplates, playground equipment, hot noon lunches, the supplying of these needs has led on to the providing of pictures and libraries and other intelligent aids, and to the formation of study groups.

The Federation's interests are presented to its members in the Ontario Home & School

Review, an 8 page publication issued quarterly, and to the general public in the "Canadian Child,

and other publications.

The endeavor to create public sentiment in favour of new and improved methods and measures being adopted, is meeting with reasonable success. There is a gratifying increase in the numbers of school principals and school trustees who ask for aid in getting the parents to

take a greater interest in their children's progress.

While there are Home & School or Parent's Associations scattered throughout almost every portion of Canada, the only provinces systematically organized are Ontario and British Columbia. The British Columbia Parent-Teacher Federation was organized about four years ago, and now numbers about one hundred associations. (The President is Mrs. J. E. Jamieson, New Westminster). The organization is doing a wonderful piece of work for the province in close co-operation with the Department of Education. (Executive Secretary, Mrs. W. H. Becker, Toronto.)

Overseas Education League.—The conception of this movement was co-incident with the visit of the British Association to Winnipeg for its annual meeting in 1909, and an exchange of educational views and ideas which purely informal at that time, gave rise to a definite desire for a clearer understanding between Great Britain and Canada in matters educational. The outcome was the first organized visit of 165 Manitoba teachers to Great Britain during the summer vacation of 1910 under the auspices of an organization which subsequently received the title of the "Hands Across the Seas" movement. Having its inception in Manitoba, it speedily gained the co-operation of other provincial educational authorities, one after another giving it official recognition and support, with Ministers of Education as members of its Dominion Council and the Deputy Ministers as provincial presidents. In 1911-12 it received the endorsation of the governments of the Dominion of Canada and Newfoundland, and the addition to its Advisory Council of the Minister of the Interior for Canada and the Prime Minister of Newfoundsoly Council of the Minister of the Interior for Canada and the Frime Minister of Newfoundland. The visit of 165 teachers to Great Britain, Ireland, Northern France and Belgium in 1910 was followed by yearly visits on a larger scale. In 1912 the number of visiting teachers reached 300, half of whom visited the Mediterranean, including Gibraltar, Malta and Egypt, on a specially chartered vessel. The visit of 1914 was interrupted by the outbreak of the war, and the activities of the movement had to be suspended until 1920. During this first period of its existence—in addition to the beneficial results of travel to the teachers participating in visits across the search tearwised in the presidence of the proposed of the provided the seas-it carried into effect a scheme for the interchange of teachers for the period of one year between Canada and other parts of the Empire, the first interchange taking place in 1913, when there was an interchange between three teachers from Manitoba and New Zealand; and by arrangement with the London County Council, thirteen teachers from various provinces in Canada were placed in London schools. A magazine devoted to the furtherance of the ideals and aims of the movement was issued monthly commencing January, 1913. A sum of \$4,000 had been raised to open a residential headquarters for overseas teachers in London when the outbreak of war interrupted further operations. In 1920, upon the return to Canada of the founder and honorary organizer, Major F. Ney, M.C., after distinguished service in the Great War, the movement was reorganized: its executive body was reconstituted, and its title was changed to the Overseas Education League. In each provincial department of education, except the Maritime provinces and in that of Newfoundland, a member of the staff was appointed provincial secretary of the Overseas Education League with the deputy minister as a member of the executive committee and the minister as a member of the advisory council. The scheme has been transferred to New Zealand, Australia and South Africa. In 1922 there were sent to England 3 teachers from British Columbia, 4 from Alberta, 1 from Saskatchewan, 3 from Manitoba, 26 from Ontario, and one from Quebec, England sending about an equal number to each

of these provinces; to Scotland, 3 teachers from Vancouver and 1 from Regina, Scotland sending 10 teachers to Canada; to New Zealand, 1 teacher from British Columbia, 1 from Manitoba and 1 from Ontario; to Australia, 4 teachers from Winnipeg, Australia sending 11 teachers to Canada.

In 1923, 1924 and 1925 a large number of exchanges were effected.

In 1924 this Organization instituted a Tour for Canadian University Undergraduates to Great Britain and Europe, when 200 students from every Province enjoyed a tour similar to that arranged for Teachers. In 1925 the programme was repeated for 180 students.

In 1925 a party of British Educationists visited Canada under the auspices of the Overseas

Education League, and travelled from Quebec to Victoria and back to Montreal, receiving at all times the greatest courtesy and hospitality from the residents of this Dominion.

It is expected that both these tours will become yearly events, in addition to the tour for

Canadian Teachers.

The beneficial tendencies of such a movement can be readily recognized. Its objects, most of which may be gathered from the foregoing account of its activities, included: the furtherance of familiarity with educational systems throughout the empire, or, through the school, the furtherance of good relationship between the different parts of the empire; and the enlistment of a wider interest in the teaching profession. To these are added the perpetuation of the memory of those who died in the war. Its activities include: the organization of official visits of teachers to different parts of the empire; the provision of special facilities for individual travel in the pursuance of special courses of study; the arrangement of interchanges of teachers and school inspectors within the empire; the establishment of a residence in London, England, for teachers from overseas; and the publication of a magazine to further the objects of the League and to provide a medium of intercourse between teachers in different parts of the Empire. (General Secretary, Major F. J. Ney, M.C., 607 Boyd Bldg., Winnipeg, Man.)

Teachers' Federations.—A marked feature of Canadian education of recent years is the rise and development of professional organizations usually called Federations or Alliances. Associations seemed to appear almost simultaneously in the East and the West; and membership in them was and is usually limited to teachers actually engaged in classroom work, although

recently there seems a widening of the membership in some provinces.

The Canadian Teachers' Federation grew out of the activities of the provincial organizations. There was a feeling among Western teachers that their particular problems could be more easily solved if they had a common council. Consequently a meeting was held in October, 1919, in the Western provinces:—Harry Charlesworth, Victoria, B.C.; T. E. A. Stanley, Calgary, Alta.; J. K. Colling, Moose Jaw, Sask.; E. K. Marshall, Winnipeg, Man.

Here were set up the beginnings of the Canadian Teachers' Federation with its thousands

of members.

Next year a meeting was held at Calgary and at this meeting Ontario was represented. It was now felt that to function effectively the organization could not be limited to the West. Since that date the Canadian Teachers' Federation has been growing in power, prestige, and influence, as well as in numbers. It will not be long before every province is represented and possibly every teacher enrolled.

Annual meetings have been held as follows:-1919-Organization in Winnipeg, Man.;

Annual meetings have been field as ionows:—1919—Organization in winingeg, Main, 1920—Calgary, Alta.; 1921—Toronto, Ont.; 1922—Saskatoon, Sask.; 1923—Montreal, P.Q.; 1924—Victoria, B.C.; 1925—Toronto, Ont.; 1926—Charlottetown, P.E.I.

The conferences have found abundance of work in studying common questions and cooperating in the solution of common problems. It has been a revelation to teachers thus to work together and to discover how much they could help one another. It gave a broad outlook and a more comprehensive plan for educational effort in Canada. Not the least effect, however, has been the reaction of the public to the teachers' organizations. Governments and school authorities have discovered that the Teachers' Federations are among the most important factors in educational effort to-day and the spirit of co-operation is the watchword from Atlantic to Pacific.

Closely associated with the growth of the Canadian Teachers' Federation has been the development of the provincial organizations.

The following are the main associations in Canada:

The Canadian Teachers' Federation.—Secretary-Treasurer, G. J. Elliott, 403 McIntyre Block, Winnipeg, Man.

#### Provincial Secretaries

British Columbia Teachers' Federation.—H. Charlesworth, 410 Campbell Bldg., Victoria, B.C.

Alberta Teachers' Alliance.—J. W. Barnett, 10701 University Ave., Edmonton, Alta. Saskatchewan Teachers' Alliance.—R. Henderson, Mayfair School, Saskatoon, Sask. Manitoba Teachers' Federation.—E. K. Marshall, 403 McIntyre Block, Winnipeg, Man. Federation of Women Teachers' Associations of Ontario.—Miss Emma Carr, 54 Proctor

Blvd., Hamilton, Ont.

Ontario Public School Men Teachers' Federation.—L. J. Colling, 98 North Barnesdale Road, Hamilton, Ont.

Ontario Secondary Teachers' Federation.—S. H. Henry, 226 Evelyn Ave., Toronto, Ont. Provincial Association of Protestant Teachers of Quebec.—Mr. R. P. Bissell, 181 Querbes Ave., Outremont, P.Q.
New Brunswick Teachers' Association.—Mr. C. T. Wetmore, Hampton, N.B.

Nova Scotia Teachers' Union.—Rev. N. M. Coady, Antigonish, N.S.

Prince Edward Island Teachers' Federation.—Miss Jessie Fullerton, Charlottetown, P.E.I. National Union of Teachers (England).—Mr. F. W. Goldstone, Hamilton House, Mabledon Place, London, W.C. 1, England.

Victorian Order of Nurses for Canada.—The Victorian Order of Nurses for Canada is a national organization founded under Royal Charter in 1897, at the time of the Diamond Jubilee, as a national memorial to Queen Victoria. The Countess of Aberdeen, wife of the Governor-General at that time, became its first President and much of the early success of the Order was due to her wonderful organizing ability and undaunted zeal. The Victorian Order having its origin, to a great extent, in the initiative of the Vice-Regal Party then in Canada, has had during its entire period of existence the patriotic and active support of all successive Vice-Regal Parties, each administration accomplishing something constructive and of importance to the advancement and development of the Order.

The Victorian Order carries on every phase of Public Health Nursing, which is defined in the Royal Charter as: "A branch of nursing service which includes all phases of work concerned with family and community welfare with bedside nursing as the fundamental principle, and developing from it all forms of educational and advisory administrative work that tends to

prevent disease and raise the standard of health in the community.

The following activities are carried on in Canada to-day by the Order: Prenatal instruction; General nursing in the home; Maternity nursing in the home including delivery care; Child Welfare; Mothers' Conferences; Well Baby Clinics; Mothercraft Classes; School Nursing; Clinics for the correction of remedial defects; Health Centres; Hospital Work; Social Service; Industrial Nursing; Home Nursing and hygiene classes; General Health education.

Field work is provided for Public Health Nursing students from the Universities and third year students from Hospital Training Schools.

The nurses belonging to the Victorian Order are highly trained members of their profession. They are carefully selected graduates of recognized training schools who have also had post-graduate training in Public Health Nursing. Since 1921 the Central Board of the Victorian Order of Nurses for Canada has granted 96 scholarships amounting to \$38,400 to nurses who have since taken a full year's postgraduate course in Public Health Nursing at Universities

offering such courses.

The Victorian Order, by attracting and carefully selecting, as it does, the highest type of Canadian womanhood, imbued with the ideal of service and equipped with technical knowledge, experience and culture, is an important factor in the national life of our country for the building up of sound Canadian citizenship. Through intimate contact with the lives of thousands of new settlers, the nurses of the Order are helping to bind these people to their adopted country, making them Canadians in heart and outlook as well as in name. To them is given an unlimited opportunity to assist in the Canadianizing of the newcomer to our country; for, in the home, where these nurses do most of their work, the personal contact or touch thus afforded, is by far the most effective and far-reaching in its results.

The number of nurses on duty at the present time is 264, and in 1925 a total of 566,952

visits were made.

There are 64 local branches of the Order. Each branch is managed by a Local Association which offers an efficient Public Health Nursing service best suited to the needs of the community. In each centre the policy of the Order is to co-operate with all other existing health agencies.

The Central Board at Ottawa acts in an advisory capacity, by means of its staff of administrative and supervisory nurses, directing and supervising the work throughout Canada, as well

as organizing new districts.

The bedside nursing service rendered by the Order is not a free service except to those who are in distress. A sliding scale of fees is adopted by each local branch, the maximum fee being equal to the actual cost of the visit. In this way expert visiting nursing service is offered to all who require it. A large part of the revenue of the Order is obtained from this source and is supplemented by grants, donations and subscriptions. Generally speaking each district finances itself, while the revenue of the Central Office is derived from the interest on an endowment fund of \$335,000, an annual grant of \$10,000 from the Federal Government, and \$2,500 from the Province of Ontario. There is in addition a fund of \$28,234.73, raised by Her Excellency, the Lady Byng of Vimy for the extension of the Order's work in districts unable, for the first year, to be self-supporting. (Hon. Secretary—W. D. Herridge, Jackson Bldg., Ottawa.) For Statistics see Table 107.

Frontier College.—The Frontier College, known formerly as the Reading Camp Association, originated in 1900 and received a provincial charter (Ontario) 1919. The purpose of its founder, Alfred Fitzpatrick, was to bring to the men of camps and to all workers in isolated places some of the advantages of the university. In pursuance of this he instituted the plan of sending university men to camps as labourers on the different forms of frontier works. These men, instructors they are called, engage during the day at the same manual tasks as the men among whom they are located. In the evenings and at spare hours they give educational instruction.

This work has extended to all the provinces. Since its inception 900 men from the different universities of Canada, as well as some from American institutions, have acted as instructors for the Frontier College. Each year sees an increasing number of graduates and research students engaging in this work. During 1925 a staff of fifty-seven was distributed throughout the Dominion in for the Frontier College. camps along railway construction, on hydro development, in the woods, and on other frontier works.

While the actual instruction imparted is usually of primary and secondary grade, there are times when university studies are also pursued. To meet the needs of men and women, largely in frontier places, otherwise deprived of educational facilities, the Dominion Government in 1922 granted the Frontier College a charter with powers to confer degrees in Arts. Through the co-operation of representative men from practically all the Canadian universities, an examining board of nearly a score has been formed.

The Frontier College is now in a position to offer definite courses of study, some of them leading to a degree. An effort has been made to adapt all such courses to the needs of those who by their environment are precluded from taking advantage of the opportunities for higher

studies already existing. (Principal, Alfred Fitzpatrick, M.A., Toronto.)

# CHAPTER IV.—HIGHER EDUCATION

Universities.—The twenty-three universities of Canada include six state controlled (New Brunswick Toronto, Manitoba, Saskatchewan, Alberta and British Columbia); four undenominational (Dalhousie, McGill, Queen's and Western) and thirteen denominational. Of the last mentioned, St. Dunstan's, St. Francis Xavier, St. Joseph's, Laval, Montreal and Ottawa represent the Roman Catholic Church; King's Bishop's and Trinity, the Church of England; Acadia and McMaster, the Baptist Church; Mount Allison and Victoria formerly represented the Methodist church. King's is in federation with Dalhousie while Victoria and Trinity are in federation with Toronto.

Table 126 of this report shows that the total staff of universities in 1925 consisted of 3,864 professors and instructors of whom 884 were in preparatory courses. The staff credited to other than preparatory courses consisted roughly of 2,992 of whom 12 must have also taught preparatory courses. Approximately 2,380 of the total staff in regular and short courses were full time and 600 part time. The information about the staff in the various faculties is only of limited value since members of the staff of one faculty may also teach in another faculty. Thus a professor in Mathematics or Physics may teach students in Arts, Pure Science, Engineering, Medicine, etc. By one university he may be reported under Arts only; by another university he may be reported under other faculties as well. It will be noticed that only rarely the total excluding duplicates is the sum of the different faculties, the reason being that the same personnel are entered under more than one faculty.

Table 127 shows that the total registration of students was 49,843. Of these, 30,302 were males and 19,541 females; 15,669 were in preparatory courses, 25,692 were in regular courses, 4,008 in short courses, 2,378 in correspondence courses and 2,531 in other courses including various extension courses. In four universities the students in short courses were also students in regular courses which explains a duplication of 535 in these figures. Of the correspondence students a large number were taking regular courses leading to degrees in Arts, etc., so that in all sense the students in regular and correspondence courses might be added giving a total of 28,070. A list of the short and extension courses with the number of students in each may be

given as follows:-

| For teachers                                               | 1,057     |
|------------------------------------------------------------|-----------|
| Preparatory                                                | 41        |
| Agriculture                                                | 371       |
| French Summer School                                       | 160       |
| Household Science                                          | 34        |
| Civics                                                     | 148<br>44 |
| Dramatic Art                                               | 476       |
| Public Health and Nurses                                   | 177       |
| Business                                                   | 187       |
| Insurance. B.A. for teachers.                              | 203       |
| Tutorial.                                                  | 321       |
| Workers' Educational Assn.                                 | 892       |
| Navigation.                                                | 24        |
| Navigation. Dairving                                       | 79        |
| Botany                                                     | 57        |
| Miscellaneous Night and Unspecified Courses                | 2,268     |
| Grand Total (See sum of short and other courses—Table 127) | 5.482     |

Table 130 shows the number of degrees by faculties, the first and graduate degrees being combined in all cases except Arts and Pure Science, Letters and Philosophy. The number of degrees should usually be considered by individual institutions rather than by totals. However, Table 130 shows that the number of first degrees in Arts, etc., cor responds closely with the number of 4th year students in fourteen universities which report the number of students by years. "First degrees" should include all classes of Bachelors' degrees, while graduate degrees refer to Masters' and Doctors'. However, there is a practice in some universities of giving different grades of Bachelors' degrees, so that the higher grade is given to holders of the lower grades. The holder of the lower grade would be considered a graduate, so that there is a danger that the higher grade is occasionally reported as a graduate degree. Again the faculty of Philosophy is in some universities an ecclesiastical faculty and its degrees are granted by the church not by the state. Those receiving a first degree in Philosophy might already hold a degree in Arts, Science or Letters, so that they would be considered graduates. Similarly a degree of B.Sc. to one already holding a B.A. or vice versa might sometimes be reported as a graduate degree. The similarity between the

numbers granted first degrees with the numbers in the fourth year in Arts, etc., shows that very few of these "Graduate" degrees can have been included in the returns of fourteen of the universities, while the footnotes in many cases show the degrees in detail. The practice of giving first degrees of different grades prevails only in few universities and these are not included with the fourteen with whose fourth year the number of first degrees is compared in Table 130. This table also shows the elimination between the first year and the fourth in Arts, Pure Science, etc. Part of this elimination is due to the fact that many students are reported in the first two years in Arts, etc.; part is due to the fact that some students in Engineering, etc., have the same academic courses in the first two years as the students in Pure Science. Where possible the students registered in Engineering were separated from the other Science students. The number of students by Academic years must, therefore, be studied subject to the caution that the elimination shown does not indicate the full dropping out of university work after two years. The difference between the total of the first four years and the total number of undergraduates is explained by partial or occasional students who register in Arts, etc., for some courses or for a short time.

Table 129 shows the number of students from places outside of the province in which the university is situated (4,097). It also shows the number of non-Canadian students included in the total registration in regular courses in Canadian universities (1,118). It is probable that the number of Canadian students in universities outside Canada at least equals the number of

non-Canadians registered in Canadian universities.

Table 142 shows that the assets of Canadian universities amounted to \$79,895,986; and the expenditure to \$10,726,541. The difference between the income and expenditure is largely explained by the non-inclusion of government aid over and above regular grants in the case of state controlled universities. It does not mean that the universities are so much in debt. An attempt was made to separate fees received for tuition, laboratory, etc., from receipts for board and lodging, mainly for the purpose of removing false impressions about the higher fees in the case of residential than in that of non-residential universities. It is clear that the larger "fees" received by residential institutions do not mean that the gross cost of attendance is greater.

Analysis of the number of students by faculties will be made in the combined report of universities and colleges below, inasmuch as certain faculties like Law, Theology, etc., are not fully represented by statistics of universities alone. The same may be said of Arts. It should always be remembered that Grade XII in the high schools is often considered as equivalent to the first year in Arts, also that several colleges give a full course in Arts. To the number of students thus represented should be added the Arts students of Junior Colleges which are now rising in Canada and which are understood to offer two years in regular Arts work (i.e. above matriculation).

Professional, Technical and Affiliated Colleges.—The number of Canadian colleges of which statistics are given in the following table is 82. In addition to these there are shown to be in operation 2 colleges of which statistics have not been obtained and one other which is included elsewhere bringing the total up to 85.

Table 132 shows that the number of the staff of colleges was 1,829; and of students was

21,367. Table 132 shows the number of students by type of college as follows:—

| Agricultural                                                                                                                         | 6  | institutions | 3,792                   | students. |
|--------------------------------------------------------------------------------------------------------------------------------------|----|--------------|-------------------------|-----------|
| Technical                                                                                                                            | 2  | "            | 1.078                   | 66        |
| Law                                                                                                                                  | 2  | 66           | 387                     | 66        |
| Dental, Pharmacy and Veterinary                                                                                                      | 3  | 66           | 687                     | 66        |
| Theological                                                                                                                          | 26 | 46           | 1,690                   | 66        |
| Affiliated for Arts, etc                                                                                                             | 9  | 66           |                         | 66        |
| Classical of which most are affiliated for arts                                                                                      | 31 |              |                         |           |
| Miscellaneous, including Commercial, Art and                                                                                         |    |              | -,                      |           |
| Military                                                                                                                             | 3  | "            | 1.434                   | . 66      |
| Affiliated for Arts, etc.  Classical of which most are affiliated for arts.  Miscellaneous, including Commercial, Art and  Military. | 31 |              | 2,395<br>9,904<br>1,434 | "         |

With the possible exceptions of two colleges which are usually included with technical schools, viz. the Institute of Technology and Art and Ontario College of Art, these are all what is usually considered senior colleges. In addition there are some junior colleges doing two years work in Arts. These have come into existence as junior colleges only recently and have not as yet been listed, their statistics having hitherto been included with those of private element-

ary and secondary schools.

Tables 134 to 140 show the number of students by faculties, it being impossible to show all the different kinds of institutions on a strictly comparable basis in one table. A summary of these four tables show 1,256 students in preparatory courses, 1,005 undergraduates in Arts, 247 graduate students, 16 in medicine (medical missionaries in theological colleges), 235 in Engineering and Applied Science, 225 in Music, 803 in Theology, 414 in Commerce, 387 in Law, 144 in Pharmacy, 374 in Dentistry, 900 in Agriculture, 256 in Education, 637 in Household Science, 63 in Veterinary Science, 3,395 in short courses, 1,457 in correspondence courses and 5,453 in All Others. Some of the students in the last three courses were not included in the total of 21,367 mentioned above since the nature of their work is more properly included under secondary technical education. A rough summary in Table 141 shows 1,256 in preparatory courses, 5,533 in regular courses, 1,457 in correspondence courses and 3,395 in short courses, some of the students being shown in more than one course.

Table 137 showst he number of students attending colleges outside their province of residence. Of 963 students thus classified 251 were from outside of Canada. The chief purpose of the table was to ascertain the number in colleges from the provinces where few or no colleges were situated.

The table shows that 21 out of the 963 were from Prince Edward Island and 145 from New Brunswick most of the latter being in colleges in Nova Scotia. The Technical and Agricultural colleges, especially the Engineering faculty of the former in Nova Scotia, are used in common by the three maritime provinces, the practice in Mt. Allison and the Nova Scotia universities being that the engineering students complete two years in Engineering in their university after which

they are admitted to the Technical College.

Table 143 shows the total assets of 41 of the colleges (excluding the Classical and certain other colleges) as \$3,495,224 of which \$910,316 was endowment, \$2,567,828 was the value of lands and buildings, and \$17,000 was the value of other property. The income was \$1,314,106. It will be noticed that the largest item of this income was government aid to technical and agricultural colleges, which are government institutions. If a reclassification of institutions is made separating institutions receiving large government aid from the others the figures for income are as follows:-

|                                                   | Supported by<br>Government<br>Aid | Not so<br>supported              | Total                                            |
|---------------------------------------------------|-----------------------------------|----------------------------------|--------------------------------------------------|
| Investments. Government aid. Fees. Other Sources. | 1,056,050<br>323,200              | \$ 378,057 1,200 440,396 596,136 | \$<br>379,462<br>1,057,462<br>763,596<br>716,997 |
| Total                                             | 1,501,516                         | 1,427,044                        | 2,928,560                                        |

It will be seen that in the case of 8 colleges the great part of the income is received from Government Aid, while in the remaining 33 colleges the income is fairly evenly distributed among investments, fees and miscellaneous sources.

Combined Statistics of Universities and Colleges.—In Order to give a fair idea of higher education it is necessary to consider the combined statistics of universities and colleges, inasmuch as the statistics of affiliated colleges are often included in those of the universities to which they are affiliated, also since courses like, Law, Theology, Agriculture, etc., are taken principally in colleges while other subjects of higher education are taken mainly in universities.

Excluding duplicates between universities and colleges the total registration of higher education was 59,160 of which 16,925 were in preparatory courses, 31,225 in regular, 3,837 in correspondence, 7,403 in short courses and some in other courses. A few students are counted in more than one course especially in regular and correspondence. Between 1,000 and 1,500 of the correspondence students were taking degree courses in Arts so that they might be included in the total of regular students making a total in regular courses of over 32,000. This figure might be considered the typical registration of Higher Education.

Table 145 shows what would seem the most important item of higher education, viz., the number of students in the various courses. Excluding preparatory courses the statistics of which are much fuller than those of the previous year, the enumeration of students by courses compare

with 1924 and 1923 as follows:-

| <u></u>                          | 1925   | 1924   | 1923   |
|----------------------------------|--------|--------|--------|
| Undergraduates in Arts, etc      | 13,552 | 12,287 | 11,630 |
| Medicine                         | 2,693  | 2,941  | 3,210  |
| Engineering and Applied Science. | 2,202  | 2,235  | 2,494  |
| Graduate Courses                 | 2,317  | 1.878  | 1,511  |
| Theology.                        | 1.690  | 1,535  | 1.564  |
| Agriculture                      | 1,081  | 1,214  | 1,353  |
| Household Science                | 1,211  | 1.084  | 1,085  |
| Education                        | 1,169  | 1,078  | 1,057  |
| fusic                            | 1,389  | 1,066  | 1.434  |
| aw                               | 846    | 930    | 953    |
| Dentistry                        | 721    | 890    | 1.175  |
| Commerce                         | 901    | 887    | 853    |
| ocial Service                    | 323    | 499    | 510    |
| Vursing.                         | 198    | 158    | 153    |
| orestry                          | 83     | 89     | 93     |
| eterinary Science.               | 80     | 88     | 103    |
| orrespondence Courses            | 3,835  | 2,941  | 1,768  |
| hort Courses for teachers.       | 1,983  | 1,835  | 2,647  |
| Short Courses for Others.        | 4.978  | 6.073  | 3,533  |

It is seen that undergraduate and graduate courses in arts, pure science, letters and Philosophy and commerce have shown a steady increase during the last three years while Medicine, Enginering and Applied Science, Agriculture, Dentistry and certain other courses or faculties have shown a steady decrease. In other courses various degrees of increases or decreases are shown and where the difference is slight it may partly be attributed to the comparative completeness of the statistics of the different years. The growth of correspondence courses is marked. Short courses for teachers are not fully represented since some institutions included summer courses that add by have the courses for the statistics of the statistics of the statistics are not fully represented since some institutions included summer courses attended by, but not exclusively designed for, teachers among "Short courses for others". least 610 students should be added to the 1,983 in short courses for teachers in 1923.

Table 144 gives a summary of the financial statistics of higher institutions, comparing certain items as between state controlled, undenominational and denominational universities and the

<sup>1 3</sup> Agricultural colleges, 1 technical, 1 higher commerce, 1 veterinary, 1 Art and 1 Military.

different classes of colleges. The total assets ascertained for universities and colleges combined amounted to \$102,562,183, the income to \$12,548,063. The difference between the expenditure and income is often fallacious since in state controlled institutions the deficit which is made up by the state should really be added to the income.

# CHAPTER V.—PRIVATE SCHOOLS

Section 13 (Tables 146 to 159) includes the statistics of two classes of private schools: (1) elementary and secondary schools which do the same class of work as ordinary day schools under public control (that is, purely academic work); and (2) business colleges, the function of which is to give training in commercial subjects, the training being of a purely vocational nature. The

distinction between the two classes is not always hard and fast, as may be seen in the table below, showing the subjects of study in the public and two kinds of private schools.

For the year ended June 1925 reports were received from 110 private elementary and secondary schools and 91 business colleges. The enrolment in the former was 13,988 (5,264 boys and 8,724 girls) of whom 3,844 out of 13,988 reported by residence, were in residence; the enrolment in the latter was 16,046 (6,380 male, 9,055 female and 611 unspecified by sex). It is noticeable that there is a preponderance of the female sex in both classes of private schools, and that in the private elementary and secondary schools females are in a majority almost of two to one.

A comparison between the subjects of study taken at these schools and at public schools is very illustrative. In the 1922 report the number taking the different subjects in order of size in the different classes of institutions was shown. following figures for 1925 retain the order of 1922 to show the changes since that year.

NUMBER TAKING THE FOLLOWING SUBJECTS, 1925

| of Size 1922                                                                                                      | Private Elementary and                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Pupils                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                    | 1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                      |

It is noticeable that in private elementary and secondary schools the order has not changed materially since 1922 except in the case of religious instruction which shifted from 25th to 6th place. Oral French has also shifted from 15th to 7th place, while European history has made some headway. On the other hand domestic science, military drill and church history have shifted downwards. The insignificance of the position held by manual training, domestic science, commercial subjects and other practical subjects is remarkable. The position of the subjects in public secondary schools is especially interesting in view of the increasing tendency from year to year in the different provinces to offer electives. This tendency seems to be favourable to French and Latin. In business colleges the size of each subject should be compared with the largest subject, typewriting. If "correspondence" be regarded as training in English over and above the English Composition and Literature it will be seen that these business colleges may be regarded as offering a considerable amount of academic training.

# APPENDIX I.—SUMMARY OF EDUCATIONAL LEGISLATION IN THE DIFFERENT PROVINCES, 1925

## PRINCE EDWARD ISLAND

The Public School Act.—Chapter I amends the Public School Act and amendments thereto by requiring that ample insurance be carried on school-house to protect holders of debentures; by empowering Board of Education to arrange with trustees re closing school and conveyance of pupils to another school; by empowering trustees to borrow money to build or repair school-house; the government may guarantee interest on debentures of \$5,000 or over.

## NOVA SCOTIA

Education Act.—Chapter 35 amends the Education Act (C. 60 P.S. 1923) with respect to qualification of voters. The resident ratepayers or their wives only vote on the election of chairman and secretary of a school meeting on questions of order and appointment of auditors, poll tax payers (including females) being qualified to vote on election of trustees. Chapter 36 amends the same Act by empowering the Provincial Treasury to pay annually to a Federal Rural High School Department a sum not exceeding five cents for each day's attendance of each enrolled high school pupil providing the aggregate day's attendance exceeds 3,000. Chapter 37 amends the same Act by providing for retiring annuities for inspectors, Normal and Agricultural college teachers who have completed thirty years of service, the annuity to be equal to one seventy-fifth of salary at retirement for each year's service and each two years' service as a public school teacher before appointment as inspector, etc. Provision is also made for retirement on disability.

The Technical Education Act.—Chapter 38 amends the Technical Education Act (R.S. 1923, C. 61) changing the title of "Principal" of the Technical College to "President".

Education of the Blind, Deaf and Deaf Mute.—Chapter 39 amends Chapters 62 and 63 (R.S. 1923) "Of the Education of the Blind" and "of the Education of Deaf or Deaf Mute," changing half-yearly to yearly payments.

#### NEW BRUNSWICK

Vocational Education Act.—Chapter 5 amends the Vocational Education Act (Sec 4, 1923) with respect to method of initiating and providing local funds.

Schools Act.—Chapter 6 amends the Schools Act (1922) increasing the amount of debentures issued by City of Fredericton. Chapter 7 amends the same Act restricting the voting at school meetings to resident ratepayers, who have paid their taxes. Chapter 8 amends the same Act by specifying that every married woman over twenty-one years of age not living separate from her husband is entitled to vote, if her husband is a ratepayer and that she is eligible for election as trustee.

Free Distribution of School Books.—Chapter 9 provides for the purchase, sale and free distribution of school books. The School Book Department to be continued; a superintendent of this department to be appointed; government empowered to authorize purchase and sale of books prescribed by Board of Education; text books to be distributed free to pupils not in advance of Grade V after July 1, 1925; necessary expenditure to be paid out of the Consolidated Revenue Fund.

#### **OUEBEC**

Public Instruction.—Chapter 40 amends several articles of R.S. 1909 respecting public instruction. One of the amendments provides that the pension of every officer of primary instruction who is on the retired list on and after January 1, 1924, fixed at the minimum of 125 dollars under article 2993 and that which is less than 300 dollars shall be increased by 5 dollars for every year he has taught over twenty and under thirty-five years until the pension reaches \$300. The maximum of \$1,050 allowed as pension to an officer of primary instruction under article 2994 is raised to \$1,200.

School Corporations.—Chapter 41 amends the Revised Statutes, 1919 respecting inspection of the accounts of School Corporations.

25391-D

Prizes in the Schools.—Chapter 42 amends R.S. 1909 respecting the distribution of prizes in the schools.

Montreal Schools.—Chapter 44 specifies the organization and duties of the Catholic Central Board to consist of seven members, two priests and five laymen, the Lieutenant-Governor in Council and Archbishop of the Archdiocese of Montreal each to appoint two, the city one and the Administration Commission of Montreal University to appoint one, the other member to be appointed by the members of the district commissions. Chapter 45 incorporates the "Central Board" (Protestant) with jurisdiction over the Protestant schools in the municipalities of Montreal, Lachine, Verdun, Coteau, St. Pierre, Westmount, St. Laurent, Mont Royal, Sault au Recollet, Pointe aux Trembles, Outremont and Hampsted; provisions are also made for further annexations. The Central Board consists of seven Protestant members. The purpose of the Central Board is to distribute evenly the cost of Protestant education in the municipalities affected, at the same time preserving the identity and so far as possible the autonomy of the various local boards. A uniform tax (10 mills) is imposed upon immoveable property within the jurisdiction of the Central Board while a uniform tax (12 mills) is imposed upon the neutral panels to be apportioned between Protestant and Roman Catholic Education as by law provided.

## **ONTARIO**

The School Law Amendment Act, 1925.—Chapter 78 amends the School Law by the following provisions. A Metropolitan School Area may be set aside by the council of any county in which there is situated a city of at least 100,000 to which said area is adjacent, the members of the school board of such area to represent the different sections included but not to exceed twelve. The Metropolitan Public School Board replaces existing public school boards in areas included. The board of a public school may provide for the transportation of pupils to or from a school used jointly by it and another board or other boards. County high school pupils are defined as pupils who reside in the county but not within the limits of a high school district (in continuation school section). Any pupil resident in a high school district and continuation school section shall be regarded as a county pupil in respect to a high or continuation school outside when such a school is reasonably accessible while the school in the county in which he resides is not, or provides for such pupil a course of study which is not offered in the school in his own district or section. Where the board of a high school situated in a city or separated town notifies the county clerk that the high school is open to county pupils on the same terms as high schools in municipalities not separated from the county, the county council may, from time to time, appoint three additional trustees for such high schools, so long as the school is open to county pupils on such terms, and such high school shall be considered a county high school. The council of a county may before the first of July in any year decide to provide for the cost of education of pupils at the high schools in the county by co-operation with the boards of high school trustees of the municipalities in the county as follows: 50 p.c. of the cost of education of resident pupils in any school to be borne by the county and 50 p.c. by the high school district; and 50 p.c. of the cost of education of county pupils to be borne by the county and 50 p.c. by the municipalities in which such pupils reside. The cost of education of resident and county pupils shall be determined as follows: Total cost per pupil per day taken as equivalent to the total amount for permanent improvement (including payment of debentures and interest) and total cost of maintenance of high school less amounts received from legislative grants and fees and from the councils of other counties for nonresident pupils, divided by the aggregate attendance of all pupils during the year. The cost of education of resident pupils is then calculated by multiplying this total cost per day by the aggregate attendance of resident pupils the same process being followed in calculating the cost of county pupils. Where there is no agreement for co-operation, the county is to pay to the board of every high school in towns not separated from the county and in villages and townships within the county, the equivalent of the legislative grant. Where the cost of maintenance of county pupils at a high school and the share of the cost of education of county pupils which the high school district paid to the county during the preceding year exceeds the amount apportioned out of legislative grant and fees, the council shall in lieu of the equivalent of the amount apportioned out of the legislature grant pay to the board a sum to be calculated as follows: The cost per pupil per day (calculated as above) during the next preceding three years is multiplied by the aggregate days' attendance of county pupils during these years and to the result is added the share of the cost of education of county pupils which the high school district paid to the county during the preceding year as included in the rates levied by the county each according to the relative equalized value and the total amount so ascertained is the sum payable by the council to the board. The amount payable by county or municipality for non-resident pupils is calculated according to the aggregate days' attendance of these pupils and in the case of other pupils the cost per pupil per day is calculated for the year for which payment is to be made. A high school district shall be under one board of examiners (for entrance examinations), the public school inspectors and high school principal being members and additional members being appointed by the public and separate school boards. The county council may also appoint the principal of one continuation school having at least two teachers as a member. Agreements may be entered into for support of continuation schools by adjoining sections under terms similar to those explained in the case of high schools. For the attendance of pupils from adjacent county their county pays eighty per cent of the cost of their education calculated as already explained.

The Teachers' and Inspectors' Superannuation Act is amended so that upon the death of a teacher or inspector his personal representative shall be entitled to receive the total amount contributed by him to the superannuation fund with 4 p.c. interest compounded half yearly.

The Public School Act (1920) is amended so as to extend the right to teachers and inspectors who were contributors to the Ryerson Fund to have these contributions refunded subject to the provisions of the Teachers' and Inspectors' Superannuation Act.

Industrial Schools.—Chapter 79, An Act respecting Industrial Schools, provides that children committed to industrial school may be sent to another approved institution. There are also other provisions such as vesting in the Crown certain lands occupied by Industrial School Association.

Boys' Welfare Board.—By Chapter 80 there is established "The Boys' Welfare Board of Ontario" consisting of thirty members with power to establish a home for boys who may be admitted thereto under its regulations regarding the age and conditions of admission, etc., conduct, and education.

#### **MANITOBA**

Education Department Act.—Chapter 17 amends this Act by providing that the Deputy Minister of Education and the Registrar of the Department be ex-officio members of the Advisory Board.

Public Schools Act.—Chapter 42 amends this Act with certain definitions affecting Secondary Schools. "Secondary School Grade" means Grades IX, X. XI, and XII either singly or in combination. "Secondary School" means any school providing instruction in any or all of the secondary grades in the district receiving special grants in aid of secondary education. amendments affect tax collector's powers, authorization of municipality to add to school districts, transportation of children, etc. It also provides for a special grant not exceeding 15 cents per day for the second year of service, and not exceeding 25 cents per day for subsequent years of service to any rural school district employing only one teacher where the same teacher is retained in charge of the school for two or more years consecutively. Chapter 43 amends the same Act with reference to assessment in unorganized territory. Chapter 44 further amends the Act in cities, so that no property qualifications are required of trustees in cities. Chapter 45 further amends the same Act with reference to government guarantee of loans. Chapter 46 further amends the Act by exempting the right of any retired teacher to Teachers' Retirement Fund of Winnipeg No. 1 from being assigned, charged or anticipated or given as security or being seized, etc. Trustees administering may refuse to recognize power of attorney granted by retired teachers with reference to right in such funds.

. The Child Welfare Act.—Chapter 3 amends this Act by granting power to make order for maintenance of child born out of wedlock against several persons.

#### **SASKATCHEWAN**

School Act.—Chapter 32 amends the Act rendering a trustee convicted of a criminal offence not eligible for nomination or election for one year after conviction.

#### **ALBERTA**

The School Act.—Chapter 55 amends this Act; among other matters, power is given to the board of every district (on consent of university and minister) to establish a college and affiliation with the University of Alberta in which may be taught work of University grade not to exceed  $\frac{25391-\nu_1^2}{2}$ 

the first two years of an Arts course. It also provides for an additional vacation of four days during Easter.

 $\overline{U}$ niversity Act.—Chapter 57 amends this Act with reference to rights to inventions, patents, trade marks, etc.

## BRITISH COLUMBIA

Public Schools Act.—Chapter 46 amends this Act by creating the position of a chief inspector of schools to inspect Normal schools, assist in co-ordinating the work of inspection and supervision of schools, conduct experimental studies in education, etc. It also provides for the conduct and maintenance of a school for the deaf and blind in the province. Provisions are also made in cases of teachers' salary in school summarily closed; also for admission to classrooms for the purpose of observation and practice teaching to pupils of Normal Schools or University Teacher-training classes.

## APPENDIX II.—CHILD LABOUR LAWS.

For several centuries the employment of children has been a subject of much legislation in Great Britain, but in the earlier part of this period the object of the legislators was to keep children fully employed, since idleness was regarded as one of the greatest existing evils, particularly in its connection with pauperism. A law of 1547, in dealing with vagrants, provided that their children who were between the ages of 5 and 14 years should be bound out as apprentices, while the Statute of Apprentices of 1562 decreed that children of working parents should ordinarily begin work not later than the age of 12. The period of apprenticeship for boys lasted until they were 24 years and for the girls until 21 years, or until marriage.

The coming of the Industrial Revolution towards the close of the 18th century very materially changed the conditions under which young persons, as well as adults, were employed; children who formerly worked in their own homes or as apprentices in those of their masters, were now employed on mechanical processes in factories. In these factories, often ill-adapted for human occupation, the labour was unremitting and physically exacting, and the children's opportunities of learning a trade to provide for their future were practically non-existent.

The new conditions were met by new legislation, but not before much hardship had been endured by the child earners, many of whom were daily working long hours at an age when they are now generally considered too young even to attend school. The movement for the regulation of child labour in factories dates from the early part of the 19th century, the first Act of this kind being passed in 1802; this, however, aimed only at improving the condition of apprentices in cotton mills. It was not until seventeen years later that an act was passed regulating the employment of children other than apprentices. The Factory Act of 1833, as well as other Acts, both before and after that year, contained further legislation correcting the worst abuses under which child earners laboured in factories, while an Act passed in 1842 was a first attempt to protect children employed in mines.

Constant improvement in working conditions for children has been effected from decade to decade in Great Britain. The latest outstanding legislation was the Fisher Education Act of 1918, which contained many important restrictions on the employment of children, as well as providing stringent school attendance laws.

Child Labour in Canada.—Industrial conditions in the earlier history of Canada did not call for child labour regulation. The children of early settlers were pressed into the hard service that life in pioneer days demanded from all hands, and it is not likely that the old idea of the sinfulness of so-called idleness was disregarded in the treatment of the young. But, as in the early days of apprenticeship in England, children were mainly employed in and about the homes and farms, where the work, though strenuous, was not attended by the wholesale evils that later inflicted so much suffering upon employees in unregulated factories.

With, the gradual extension of the factory system in this country, however, the need for protective legislation developed, and a series of provincial laws and regulations has grown up to govern the employment of children. These laws, based largely upon British legislation, are constantly being extended with the spread of industry in the various provinces. It is gratifying to note that, on the whole, the Canadian standard of child labour protection is higher than is recommended in the draft conventions and recommendations of the International Labour Conference.

Most of the laws relating to child earners are contained in provincial Acts regulating labour in factories, shops, offices and mines. Besides the laws which expressly limit or regulate child labour, the provincial School Acts are an important factor in the protection of children, since regular employment is impossible for those of the ages of compulsory school attendance. The connection between school and labour laws is particularly evident in the use of employment certificates, based on educational tests, which are a condition of the employment of young persons in most of the provinces.

The Dominion Parliament during the Session of 1924 amended the Canada Shipping Act to give effect to three Draft conventions of the International Labour Conference which relate to children. (1) Minimum age for the admission of children to employment at sea; (2) minimum age for the admission of young persons to employment as trimmers or stokers; and (3) compulsory medical examination of children and young persons employed at sea. The amendment provides that children under 14 years of age may not be employed on any vessel other than training ship or one on which members of the family only are employed; that young persons under 18 years of age may not be employed as trimmers or stokers on ships other than training ships or those propelled by other means than steam, but when a stoker or trimmer of over 18 years is not available, two young persons not less than 16 years of age may be employed; that employment of persons under 18 years of age on vessels other than those on which members of the family only are employed shall be conditional upon the production of a medical certificate renewed annually. This amendment was put in force by Order in Council from January 1st, 1926.

Table A is a comparative statement of the laws regulating child labour in the various provinces, and is based on data compiled by the Department of Labour and the Canadian Council of Child Walfare.

of Child Welfare.

# A .- Child Labour Laws of Canada

| Prince<br>Edward<br>Island.                  | Nova Scotia.                                                                                                                                                                                                                                                                | New Brunswick.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Quebec.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Ontario.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| years for 30<br>weeks for at<br>least 60% of | cities and towns, except for child over 12 years, who has passed Grade VII, or any child over 13 years who has been granted an employment certificate by Board of School Commissioners. In sections other than cities and towns school age is 7 to 14 years, but these lim- | attendance up to 14 years of age is compulsory in St. John, Fredericton, New-castle and Chatham. The school attendance Act empowersany school district to pass a resolution for compulsory school attendance, the ages to be from 6 to 16 in certain urban districts; exceptions provide that any child over 12 years, who has passed Grade VII, and any other over 13 years who has attended 60 days during 14 consecutive weeks in the preceding year, may work if necessity requires. In rural dis-                                                                                                                                         | school attendance law.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | From 8 to 14 years exemption may be granted for 6 weeks only in each term by attendance officer, on proof that child's services are required in urgent or necessary household duties or for maintenance of himself or dependant. Children between 14 and 16 years generally must attend full time classes; those whom necessity compels to work may not be employed without a work permit, and must attend partime classes for 400 hours a year.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|                                              | in mines must produce school certificate. Any child over 13 years who satisfies school commissioners that it is necessary for him to work, may be granted an employment certificate to be absent from school while engaged                                                  | any child under 16 years in cities and towns is prohibited during school hours unless the child holds a school certificate with standing equal to Grade VII, or at- tends school during six months of the year.                                                                                                                                                                                                                                                                                                                                                                                                                                | must be able to write<br>and read fluently<br>before being em-<br>ployed; and must<br>have certificates of<br>study; if children<br>without this quali-<br>fication attend night;<br>school regularly they                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | and 16 years of age<br>employed between 8<br>a.m. and 5 p.m. must<br>have home permit or<br>employment certifi-<br>cate, and must at-<br>tend, when possible,<br>part-time classes for<br>at least 400 hours a                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

To avoid the confusion that would result from giving totals different from those given in the provincial reports the figures of 1924 are used throughout for Quebec. In all cases except the primary and nursery schools the figures of 1925 are also published in the provincial reports although the 1924 figures are used in making up their summary. The 1925 figures for each of the items in the above table except items I and 7 are as follows—

General Note:

| Technical non Collegiate courses        | 10,665 | Other Colleges (regular)   | 3,403  |
|-----------------------------------------|--------|----------------------------|--------|
| Teacher-training                        | 1,771  | Universities (regular)     | 7,280  |
| Blind and Deaf                          | 698    | Monument National Lectures | 984    |
| Short courses Universities and Colleges | 2,517  | <u></u>                    |        |
| Classical Colleges                      | 9,904  | Total                      | 37,222 |

Further, to avoid confusion, the short courses for teachers at universities and colleges are entered under item 9 instead of item 3. There were 2,693 teachers in these short courses who might be added to the 10,224 in item 3 making 12,917 in all in teaching-training. There were in all about 63,000 teachers in Canada.

| 134,813<br>22,845      |             |                                     |                        | 1,896,954<br>267,797             |                                                                                                                                                                                                | 13                  |

Afin d'éviter la confusion qui résulterait de totaux différents de ceux donnés dans les rapports provinciaux, les chiffres employés pour la province de Québec sont ceux de 1924. Excepté pour les écoles primaires et maternelles, les chiffres de 1925 sont aussi publiés dans les rapports provinciaux mais ceux de 1924 sont employés dans le résumé. Les chiffres de 1925 pour chacun des item du tableau ci-dessus 1 à 7, sont comme suit:

| Cours techniques, hors des colléges | 1,771<br>698<br>2,517 | Autres collèges (réguliers). Universités (cours réguliers). Cours du Monument National. | 7.280 |
|-------------------------------------|-----------------------|-----------------------------------------------------------------------------------------|-------|

De plus, afin d'éviter la confusion, les cours abrégés des universités et collèges pour instituteurs sont entrés sous l'item au lieu de l'item 2. Ces cours ont été suivis par 2,693 instituteurs qui pourraient être ajoutés aux 10,224 de l'item 3, donnan un total de 12,917 instituteurs se perfectionnant. Il y avait en tout environ 63,000 instituteurs et institutrices au Canada.

¹ Unspecified by sex in N.B. 1136. ² Including independent as well as other primary schools. The sex was not specified separately for independent and controlled schools. ³ Including Day elementary and secondary schools; the latter includes day vocational full time pupils. ⁴ Villages, Towns, and Cities, practically all these are graded. There are, however, some pupils in graded rural schools which the above figure does not take into account. ⁵ Rural schools. There are some graded school pupils included with these, however. ⁶ Primary schools under control and independent. ¹ The financial items in Ontario include day and evening vocational schools. To the number of teachers should be added 524 in day vocational schools. These were not classified by sex. ⁶ 'Districts'. The number of municipalities was 1,780. ⁵ Estimate only. There were 5.598 rural school scitions; 25 Cities and 141 Towns with public, and 24 Cities, 73 Towns and 417 rural separate schools; 161 village public and 22 village separate schools assumed to represent so many districts; 198 continuation schools; 174 cities and towns with High Schools and Collegiate Institutes, and assuming that each city and town and each village school public and separate and each secondary school represented a school section, the total number of sections would be 6,833 as above. ¹0 In existence. The number in operation was 1,831. ¹¹ In existence. Dec. 31, 1925. ¹² Of this amount \$9,043,636 was contributed by subsidized independent schools and higher institutions. ¹² Exclusive of \$16,000 to provincial university. ¹³ Exclusive of \$16,144 Grants to the schools for the Deaf and Blind. ¹¹ Including §142,107 on Technical Education. ¹¹ Including Government expenditure on salaries of teachers of general schools and P.W.C. (\$262,095) and total supplement by districts (\$85,582). ¹¹ Exclusive of Technical schools. ¹¹ Including all Education establishments or the total enrolment of 583,905. In Primary schools alone the cost per pupil enrolled was \$35.00 and in average attendance \$45.

Classical Colleges and Independant Classical Schools and of the Normal Schools—2The figures by sex represent High Schools and Collegate Institutes only, the totals include publis in fith classes—almoldes Walkerville—4 Includes Waterfoo.—5 The school figures for Charlottetown include P.W.C. which is a provincial institution and not merely a city school. However the objection to including the H. S. pupils of this institution with the general enrolloment of the city applies to other cities as well, since the H. S. of practically all cities enroll non-resident pupils from rural districts and other urban centres.—6 includes the Institute of Technology and Art which is a provincial institution—7 including 254 in Corres. courses (Halifax) which are supervised in Halifax but are taken by students all over the province; 1,246 in technical courses and 23 in the college of Art.—8 Including 33 in Technical College and 124 in Victoria College of Art. The High School enrolment is not filled out because it would not be complete without including the High School pupils of the <sup>1</sup> Primary schools including Protestant High Schools, 1923.

1 Ecoles primaires.—Y compris "High Schools" protestants, en 1923. Les chiffres concernant les High Schools ont été laissée en blanc, parce qu'ils eussent été incomplets; en effet, ils auraient laisée de côtée les élèves des coles classiques et des écoles normales.—¹ Les rotaux de réquent qu'aix élèves des "High Schools" et des "Coles normales.—¹ Les rotaux de rentautes en les élèves de cirquient et als écoles de cirquient et als écoles de charlottetown embrassent les élèves de coles de Charlottetown embrassent les élèves de colège s'high Schools de des élèves de cette institution provinciale. Toutefoix, l'objection qu'on pourrait soulever contre l'inclusion des élèves de cette institution dans les degrés de High Schools de descripe de cette citée, s'appliquerait aussi bien à toutes les autres citées, parce que les High Schools de presque toutes les citées receivent comme élèves desenfants des districts runaux ou d'autres agglomérations urbaines.—§ v. compris l'Institut de Technologie et d'Arts, qui est une institution provinciale.— Comprenant 234 dans les cours par correspondent de l'attitut de Technologie et d'Arts, qui est une institution provinciale.— Comprenant 234 dans les cours par correspondent de l'attitut contre par correspondent de l'attitut de l'attitut de Technologie et d'Arts. qui est une institution provinciale.— Comprenant 234 dans les cours par correspondent de l'attitut de l'attitu

- 4.—Number and proportion per cent of the population 5-24 years of age reported at school for some period by sex and single years of age, by provinces, 1921
- 4.—Nombre absolu et pourcentage de la population de 5 a 24 ans, ayant fréquenté l'école plus ou moins longtemps par sexe, par âge et par provinces en 1921

(Indians excluded — Ne comprend pas les Indiens)

 <sup>&</sup>lt;sup>1</sup> Includes over 200 days.
 <sup>2</sup> Including 16 unclassified by attendance.
 <sup>3</sup> Including 1,311 unclassified by attendance.
 <sup>4</sup> Exclusive of secondary schools up to 1923.
 <sup>5</sup> Six months.
 <sup>1</sup> Comprend plus de 200 jours.
 <sup>2</sup> Comprend 16 non classifiés quant à l'assiduité.
 <sup>3</sup> Comprend 1,311 non classifiés quant à l'assiduité.
 <sup>4</sup> A l'exclusion des écoles secondaires jusqu'à 1923.
 <sup>4</sup> Six mois.

9.—Historical Summary of Enrolment and Average Attendance in Schools in Canada, by Provinces 9.—Relevé rétrospectif des élèves des écoles canadiennes et moyenne de fréquentation, par provinces

|            |                 | ŗ                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Total Num   | ber Enrolle                                                                                                                                                                                                                                                                                                                                                                                                                | ed-Nombr                           | e total des | inscription            | s—1824—19                                                                                                                                                                    | 24          |                                                                                                                                                                                                                                                                                                     |

# 10. Percentage of Population of Canada 5-17 Years of Age attending School in 1911 and 1921.

The chart opposite is intended to illustrate the progress made in school attendance between 1911 and 1921. Tables 4 to 7 will enable persons interested in the subject to make their own analyses.

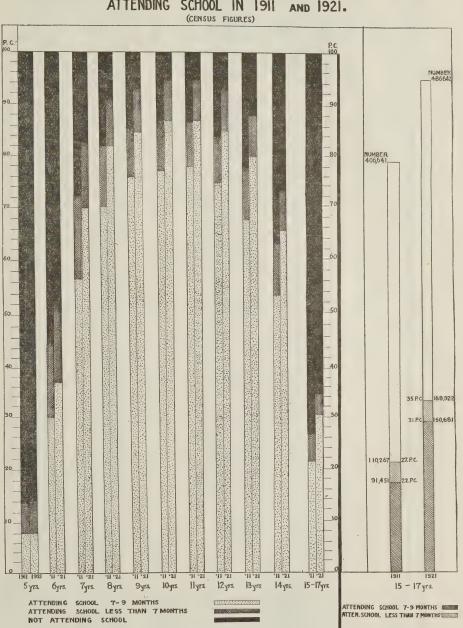

In the first part of the chart the black shows the proportion at each age not attending school; the cross hatched, the proportion attending school less than 7 months or what might be considered an inadequate period, while the dotted shows the proportion attending 7 to 9 months, or what might be considered an adequate year. A distinction should be drawn between: (1) the ages 5 and 6; (2) the ages 7 to 14 or the usual compulsory age period; and (3) the ages 15 to 17 which are post compulsory or very partially compulsory age periods. During the ages 7 to 14 the length of the black columns, or rather the decrease in this length, is of special significance. If, for example, the black at the age of 12 is compared for 1911 and 1921 it will be noticed that an improvement is shown of a decrease from 17 p.c. out of school in 1911 to 7 in 1921, or nearly 60 p.c. Further, it will be noticed that there was a larger proportion at school at the age of 13 (that is, up to the age of 14), in 1921 than at any age in 1911. The black columns at the ages of 5 and 6 and 14 to 17 have not as much significance as the other two columns. At the ages of 5 and 6 it will be noticed that improvement is not marked. In fact the cross hatched portion, especially at the age of 5, bears a greater ratio to the dotted portion in 1921 than in 1911, thus showing that attendance was less regular in 1921; while the ages subsequent to 6 years show a decided improvement in this respect. On this point the reader is referred to page 11 of the Annual Report for 1922 in which conclusions bearing on this point were based on other than census figures and before the census figures were known. In the case of the ages of 14 to 17 only the dotted and cross hatched columns are of much importance. The improvement at these ages is shown absolutely as well as relatively in the supplementary chart at the right. It should be noticed that an increase of nearly 60,000 at school at these ages is shown out of an increase in population of about 80,000. The age-grade tables i

# 10. Pourcentage de la population du Canada de 5 à 17 ans, fréquentant l'école en 1911 et 1921.

Le diagramme ci-contre constate les progrès réalisés par la fréquentation scolaire, entre 1911 et 1921. Les tableaux 4 à 7 permettront aux éducateurs d'en tirer leurs propres conclusions.

Dans la première partie du diagramme, l'espace en noir représente la proportion des enfants de chaque âge qui ne vont pas à l'école; la partie couverte de hachures représente la proportion de ceux fréquentant l'école moins de 7 mois; enfin, la partie pointillée représente la proportion des écoliers fréquentant l'école de 7 à 9 mois, c'est-à-dire une année ordinaire. Il est nécessaire d'établir une distinction entre : (1) les âges de 5 à 6 ans; (2) les âges de 7 à 14 ans, période habituelle de l'école obligatoire et (3) les âges de 15 à 17 ans, où l'école n'est plus obligatoire, ou ne l'est que relativement. Le rétrécissement des colonnes noires, représentant les enfants de 7 à 14 ans, a une signification toute spéciale. Si, par exemple, on compare cette colonne noire, représentant les enfants de 12 ans en 1911 et 1921, on remarque une amélioration notable de la situation, puisqu'en 1911, 17 p.c. des enfants ne fréquentaient pas l'école, tandis qu'en 1921, l'y en avait plus que 7 p.c., soit un gain de 60 p.c. En outre, on peut voir qu'en 1921, les enfants de 13 à 14 ans étaient à l'école en plus grand nombre qu'à tous autres âges en 1911. Les colonnes noires consacrées aux âges de 5 et 6 ans ou de 14 à 17 ans ont moins d'importance que les deux autres colonnes. On observe qu'aux âges de 5 et 6 ans l'amélioration est peu sensible. A cet égard nous renvoyons le lecteur à la page 11 du rapport annuel de 1922, où des conclusions sur ce sujet sont basées sur des chiffres autres que ceux du recensement, les données du recensement étant alors inconnues. En ce qui concerne les enfants de 14 à 17 ans, la colonne portant des hachures et la colonne pointillée ont seules une réelle importance. L'amélioration que l'on constate à ces âges est analysée, tant d'une manière absolue que d'une manière relative, dans le diagramme supplémentaire de droite. Il convient de faire ressortir qu'une augmentation de population d'environ 80,000 âmes a pour corollaire un accroissement de près de 60,000 écoliers de ces âges. Les tableaux cons

at the time the new divisions were made. The complementary grades are really high school grades, although they are not considered as secondary grades in the province, this term he board of examiners instead of from the normal schools receive their non-professional, or what would be considered in other province, their high school, training in this complementary course, while those taking their diplomas from the normal schools receive their negatives of the province, their high school, training in this complementary course, while those taking the mornal schools receive their high school training in the two and three year courses of the normal schools themselves. The nor-classification of 9,854 pupils was due to such causes as the enrolment of pupils after the 1 The inferior, intermediate and superior courses form the elementary course in Catholic schools in Quebec and correspond roughly to what were known formerly as the elementary and model The correspondence in neither case is exact since changes were made in the course of studies The non-classification in other provinces where not elsewhere non-professional, or what wound to consider an event of the normal schools themselves. The non-classification of year purcher high school training in the two and three year courses of the normal schools. The same applies to the professiant schools. courses; the complementary course consequently corresponding to the old Academy grades. explained is due to various causes, e.g., a different method of grading in some rural schools, etc.

sion. Les degrés complémentaires sont réellement des degrés de haute école, bien qu'ils ne soient pas considérés comme degrés eccondaires dans la province, ce terme n'étant appliqué qu'aux degrés coconstances et régules). Les mistuteurs qui pennent leurs diplômes du bereau des examinateurs au lieu des écoles normales recojorent leur fornation académique, qui dans as autres provinces serait celle de la halte école, dans ces cours complémentaires, tandis que ceux qui premient leurs diplomes des écoles normales elles-mêmes. Le fait que 9,854 élèves ne sont pas classifiés vient de ce qu'ils ont été inscrits après le passage de l'inspecteur quand a été faite la classifica- tion. Il nest de même pour les écoles protestantes. L'absence de de lassification dans les caux en provinces, quand elle est sans explication yient de différentes causes, comme une différence de méthode dans la classification des écoles rurales et colle des écoles urbaines, etc. <sup>1</sup> Los classes inférieure, intermédiaire et supérieure du cours élémentaire des écoles catholiques de Québec correspondent à ce qui était autrefois appelé le cours élémentaire et modèle leu cours consignate de la nouvelle divicours components intervenus dans les cours Jors de la nouvelle divicours cours par de la nouvelle divicours cours par de la nouvelle divicours de la nouvelle de la nouve

12.—Ages of pupils enrolled in Schools in Canada, 1925 or latest year reported 12.—Age de la population scolaire du Canada, chiffres de 1925 ou du dernier rapport

### 5.—SECONDARY EDUCATION

Secondary education, as distinguished from primary education is in all provinces of Canada, except in the Catholic school system of Quebec, a somewhat misleading term. In Quebec Catholic schools secondary education has a definite meaning, and refers to a system of education extending from an early age to the completion of a full course in Arts. Thus in the classical colleges, the secondary institutions for young ladies and certain other independent secondary schools the courses often extend over 8 years and correspond more or less roughly to the entrance work, 3 years of high schools work and four years of University Arts work in the other provinces. The academic training of teachers for primary schools on the other hand, is given at the primary schools and normal schools. The class of academic work done in these includes "secondary" work as understood in the other provinces, but is not so called. In the new course of studies this work is known as "primary complementary." The usage here is not radically different from that in the other provinces where we find "Teachers' (academic) Courses", and "Matriculation Courses" in the high schools. Indeed in Manitoba secondary schools, until very recently, there were found a "University Course" designed purely for prospective university students, and a "Teachers' Course" designed purely for prospective teachers. A link connecting these two was introduced at a later date and was known as the "Combined Course". In Quebec this "University Course" would be known as secondary work, while "Teachers' Course" would now be "primary complementary"; in other words primary school continuation. In all provinces this is what secondary education really is, for there is no set of secondary schools from which pupils trained elsewhere are excluded, provided that they have attained to the standard required. may be acquired even in rural one-room schools provided the teachers are qualified to teach the work. The departmental examinations held near the beginning of July in all provinces, as well as the course of study prescribed by the department, standardize the work for each province. For example a pupil, trained in a one-room rural school in Nova Scotia might write the departmental examinations for Grade XI (including university matriculation) on the same subjects and side by side with a pupil trained in one of the largest academies; and if the former pupil passed the grade as well as the latter he would be equally admitted to Grade XII in that Academy or to the first year in Arts in a University. The same applies to all other provinces although in many provinces high school work in rural schools may not be carried further than Grade IX or X.

The different kinds of institutions in which high school work is done in the different provinces

may be seen in the following table. The comparative number of pupils in each kind will indicate

the proportion of the high school work of the province it carries.

### 5.—ENSEIGNEMENT SECONDAIRE

En employant l'expression "enseignement secondaire", dans toutes les provinces du Canada, sauf Québec, on se sert d'un terme inexact et susceptible d'être mal interprété. Dans les écoles catholiques de Québec, l'enseignement secondaire est parfaitement défini; on désigne ainsi une succession d'études commençant à l'âge le plus tendre et se terminant à l'achèvement du cours de philosophie (arts). Ainsi, dans les collèges classiques, les pensionnats de jeunes filles et certaines autres institutions de cet ordre, indépendantes, souvent le programme s'étend au delà de huit ans et correspond à peu près à trois années du programme des "high schools" et quatre années des études universitaires à la faculté des Lettres dans les autres provinces. D'autre part, les instituteurs destinés à enseigner dans les écoles primaires, reçoivent leur formation d'abord aux écoles primaires, puis aux écoles normales. Les études de nature académique qu'ils y font embrassent ce que l'on appelle dans les autres provinces, le programme "secondaire", quoiqu'il n'en porte pas le nom. Dans les nouveaux programmes, ces études sont connues sous le nom de "primaires complémentaires". L'usage ici suivi ne diffère pas radicalement de celui des autres provinces, où nous trouvons dans les "high schools" des cours académiques pour instituteurs et des cours de matriculation. En fait, dans les institutions d'enseignement secondaire du Manitoba, il existait encore tout récemment un "cours universitaire" à l'usage exclusif des jeunes gens se destinant à l'université et un cours d'instituteurs, à l'usage exclusif des candidats à l'enseignement. Plus tard, on introduisit un troisième cours, destiné à combiner les deux précédents, lequel porta le nom de "cours intermédiaire". Dans Québec, ce cours universitaire entrerait dans le cadre de l'enseignement secondaire, tandis que les cours à l'usage des instituteurs seraient des cours "primaires supplémentaires", ou, en d'autres termes, le prolongement de l'école primaire. Dans toutes les provinces, c'est ce qu'est réellement l'enseignement secondaire, car il n'y existe pas d'écoles secondaires d'où soient exclus les élèves instruits ailleurs, s'ils possèdent les connaissances requises. Ces connaissances peuvent être acquises dans les écoles rurales à classe unique, pourvu que les instituteurs soient en mesure de les enseigner. Les examens obligatoires qui ont lieu au commencement de juillet dans toutes les provinces, ainsi que le programme d'études dressé par le ministère, établissent le niveau de ces connaissances dans toutes les provinces. Par exemple, un écolier sortant d'une école rurale à classe unique de la Nouvelle-Ecosse peut subir les examens officiels pour le degré XI (y compris la matriculation universitaire), sur les mêmes sujets et côte à côte avec un élève inscrit dans l'une de nos meilleures académies; et si ces deux candidats passaient l'examen avec succès, ils seraient, l'un et l'autre, admis au degré XII de cette académie ou en première année de la faculté des Lettres dans une université. Et ce que nous venons de dire s'applique à toutes les autres provinces, quoique dans plusieurs provinces, les écoles rurales ne peuvent pas préparer aux "high schools" plus loin que les degrés IX et X.

On verra dans le tableau suivant l'énumération des différentes institutions de chaque province, préparant à l'entrée dans les "high schools". Le nombre comparatif des élèves de ces

diverses catégories d'écoles indiquera la proportion des matières de haute école qu'on y enseigne.

1 This figure in those 10 students in the 38th year who might be considered any such the gares, the secondary classes included only such the gares, the secondary classes included only such the selection that the control of Secondary Classes in the state of Secondary Classes. The Institutions mentioned above the gardees, Then states of graded Schools was 55 with 199 on classes. There were 415 one-troons chools, so that 309 out of the 614 class rooms in P. E.1, were dong were the classers of the secondary grades, and the secondary grades are the secondary state of the secondary grades, are and above the work dome in Funce of Ideas rooms in the reactions of the country of the Dayartment has been to secondary grades, are also as a fina agrade XIII—4 The number of classrooms in the male country of the object of the state of the principle of the secondary pupils, the teachers, mentioned etc., effecting to the secondary pupils, the four sent is an expected as the condary pupils, the teachers in the teachers while the primary schools with the secondary pupils, the teachers who is a different significance by other provinces of Quebe from it about the primary schools, which are equivalent at least the significance of the complementary Schools, in the Addenies. Persumbly the extended to grade XI. In addition to these figures should be included the pupils in the than the secondary of the secondary schools, which are equivalent at least schools. A such as a secondary of the secondary of the secondary of the secondary schools which are equivalent at least schools. The secondary schools are secondary of the secondary schools, which are equivalent to secondary schools, which are considered to the schools and the schools and the secondary schools are secondary schools, and the secondary schools are secondary schools. The secondary schools are secondary schools, and the secondary schools, and the secondary schools, and the secondary schools. The secondary school

comme élèves des cours secondaires, cette expression ayant une signification différente dans les institutions catholiques de la province de Québec.—Le chiffre II, §11 comprend les élèves de la septième et de la huitième amées du cours primaire et dont le cours est l'équivalent des degrés IX et X, et peut-être XI. A ces chiffres il faut ajouter les élèves des écoles normales au nombre de 1,36 en 1924. Ces cours sont à la fois académiques et probable que les candidats au diplôme d'instituteur donné par le Bureau des Examinateurs ont reçu leur formation académique étant parallèle au travail des académice. Il est probable que les candidats au diplôme d'instituteur donné par le Bureau des Examinateurs ont reçu leur formation académint de la plus grande partié et peut-être la totalité de leurs études pédagogiques dans les écoles ormales.—Se Cechiffre comprend 1,517 écoliers des degrés IX et X non classifiés par degrés. sont de fait des écoles secondaires. Cela peut se constater par les chiffres qui suivent les 66 distitutions faisant rapport de leurs olisases en départements en 1926 (le numbre total des écoles de ville était de 87 avec 617 élèves. Ainsi, les 25 non comprises n'on pas déclaré de cours secondaires, étant dans des villes ou il y a déjà des hardes écoles régulières comme institutions séparées, tandis que d'autres n'ont pas déclaré le nombre de leurs classes) avaient 380 classes et 15,402 élèves, dont 2,779 dans les degrés secondaires, soit une moyenne de 43 élèves de cours secondaire par école. Seulement 11 des 65 écoles avaient moins de 28 olèves de cours cesendaire par école. Seulement 11 des 65 écoles avaient moins de 28 olèves de cours estadire moins qu'il en fait pour employer tout te temps d'un nistituteur. Ce groupe a probablement une classe pour le degré VIII ou s'enseignent les matières secondaires, est les 11 avaient une classe pour le degré VIII ou s'enseignent les matières secondaires, est les 11 avaient une classe pour le degré VIII ou s'enseignent les matières secondaires, est les 11 avaient une conseigne de sellence de sellence 14 s'enseignent de colle se sellence de 20 à 39 élèves de haute école avec une moy-enne de 4-5 salles de classe. 179 élèves en tout, et une moyenne de 30 élèves de haute école par école 13 avaient de 4 à 5 salles de classe, une moyenne de 25 élèves de haute école par école 13 avaient de 4 à 3 elles de classe, une moyenne de 25 élèves de haute école, in avaient de 20 è 3 alles de classe, une moyenne de 25 élèves de haute école 11 avaient de 20 èlèves de haute école, in avaient de 20 èlèves de haute école 11 avaient de 20 èlèves de haute école, une moyenne de 25 élèves de haute école, in avaient de 20 èlèves de haute école, une moyenne de 25 élèves de haute école 11 avaient de 20 èlèves de haute école, in avaient de 20 èlèves de haute école, une moyenne de 25 élèves de haute école 11 avaient de 20 èlèves de haute école, in avaient de 20 èlèves de haute école 20 èlèves de 11 avaient de 20 èlèves de haute école 20 èlèves de 11 avaient de 20 èlèves de haute école 20 èlèves de 11 avaient de 20 èlèves 20 èlèves de 20 èlèves de 20 èlèves de 20 èlèves de 20 èlèves 20 èl \*Le nombre de classe indique environ 76, comme domant l'enseignement secondaire dans les écoles urbaines, en plus des hautes écoles, dans la Saskatchewan, est approximanti parce que les statistiques sont collègées par institutions et non par classes. C'est pour cette raison que le nombre d'instituteurs n'est pas donné. Les classes en question fonctionnent comme des classes d'enseignement secondaire connues dans une province sous le nom de hautes écoles pures, écoles supérieures et autres écoles, comprend seulement les classes enseignant des matières secondaires. L'inscription des instituteurs ne touche que ces classes.—\* Les 9,285 et 641 como'est-à-diro des classes enseignant exclusivement des matières secondaires. Technicalement, elle ne sont pas comuse hautes écoles pour la seule raison qu'elles n'ont pas anores été classifiées officiellement et ne (ombont pas sous l'administration des hautes écoles, mais elles moyenne de 8 salles de classe, de 372 élèves dont 72 de haute école: deux de ces écoles n'ont nombre total d'écoles à classes multiples était de 57, avec 199 classes. Il y avait 415 écoles à classe mique, de sorte que 390 des 614 classes de l'île du Prince-Edouard enseignaient des matières secondaires, outre le Prince of Wales College.—4 Les écoles rurales mentionnées foit ment jusqu'au degré XII.—5 Le nombre de classes dans le cas des écoles de grammaire, des prennent les étudiants de la faculté des arts aussi bien que ceux des hautes écoles tous inscrits universités.—2 Comme on le verra par ces chiffres, ces classes secondaires ne comprennent que celles qui consacrent au moins la moitié de leur travail à des matières secondaires.—" Les instiles écoles à classe unique qui enseignent des matières secondaires: le tableau 2 montre que le sont les écoles à classe unique. L'habitude du ministère, est d'encourager l'enseignement rural secondaire quand l'instituteur est qualifié, et deux écoles rurales ont porté leur enseignetutions mentionnées ci-dessus comprennent seulement les classes des écoles à classes multiples. 21 dans les municipalités rurales: 14 dans les districts ruraux. 64.—Publicly Controlled Schools: Number of Pupils taking Certain Secondary Grade Subjects in Six Provinces,

64.—Ecoles sous le contrôle administratif: Elèves étudiant certaines matières de l'enseignement secondaire dans six provinces, en 1925

| Subjects                                                                                                                                                                                                                                                                                                                                           | Nova<br>Scotia<br>Nouvelle-<br>Ecosse                                     | New<br>Bruns-<br>wick<br>Nouveau-<br>Bruns-<br>wick                                                                                         | Ontario                                                                                                                               | Saskat-<br>chewan                                                                                                          | Alberta                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | British<br>Columbia<br>Colombie<br>Britan-<br>nique                                                                                                          | Total                                                                                                                                                               | Matières                                                                                                                                             |

Can. History. For other forms of History, see Tables 69 and 70.
British History only. For the numbers taking other forms of History, see Table 75.
Including only Ancient History given in all grades but (X) and Canadian History and civies in Grade X, see Table

76.

4 Includes only woodwork, for other forms of Manual Training, see Table 72.

5 Including Continuation, High Schools, Collegiate Institutes and Day Vocational full time pupils.

6 ENERAL NOTE—The number taking the above listed subjects include all pupils of secondary grade in N.S.; secondary pupils enrolled during the second term in N.B.; pupils in secondary schools only (not including secondary pupils in other than secondary schools) in Ontario, Saskatchewan, Alberta and British Columbia. The totals given at the foot of the table show the total enrolment in the schools presented. The number of secondary pupils not represented may be found by substracting the above totals from the totals in H.S. Grades given in Table 11

<sup>1</sup> Histoire du Canada: pour les autres formes de l'histoire, voir tableau 69 et 70. <sup>2</sup> Histoire de la Grande-Bretagne seulement. Quant aux élèves étudiant l'histoire sous d'autres formes, voir le tableau

<sup>3</sup> Histoire ancienne seulement, enseignée dans tous les degrés, sauf le degré X et l'Histoire du Canada et des devoirs

\* Histoire ancienne sequement, enseignee dans tous les degres, sam le degre X et l'Histoire du canada et des des le civiques dans le degre X. Voir tableau 76.

4 Menuiserie seulement: pour les autres travaux manuels voir tableau 72.

5 Y compris les élèves réguliers des écoles primaires supérieures des "high schools", des instituts collégiaux et des écoles professionnelles

Nota.—Les élèves étudiant les matières ci-dessus énumérées embrassent tous les élèves de l'enseignement secondaire en Nouvelle-Ecosse, tous les élèves de l'enseignement secondaire inscrits durant le second semestre au Nouveau-Brunswick et les élèves des écoles secondaires seulement (à l'exclusion de ceux qui reçoivent l'enseignement secondaire dans des écoles autres que des écoles secondaires), dans Ontario, la Saskatchewan, l'Alberta et la Colombie Britannique. Les totaux du bas du tableau indiquent la totalité des élèves inscrits aux écoles qui nous coupent. Le nombre des élèves de l'enseignement secondaire non représentés ici peut être obtenu en soustrayant les totaux ci-dessus des totaux des élèves de "high schools" donnés dans le tableau 11.

¹ The number conditioned in the H.S. Grades in Saskatchewan must not be understood as partial failures. By departmental regulations the great majority of candidates took only partial examinations so that the successful candidates at these partial examinations were necessarily conditioned in respect to the full grade. Moreover the 7,332 in grade VIII mentioned as being examined is obtained by adding those who passed and those who failed and substracting those promoted by schools. There is an assumption here that those who failed wrote the examinations.

² By departmental examinations.

² By R. To the number successful the Departmental examinations.

 N.B. To the number successful at the Departmental examinations must be added the number promoted by schools to obtain the full number of successful candidates.
 Number failed in N.S. means those who failed to receive the grade for which they wrote; in N.B. it means those who failed to receive any grade. The number conditioned obtained grades lower than those for which they wrote.

Not reported for the year.
The number who wrote the examinations was not given, but the total in Grade VIII during the year was 9.624.

2 Examens officiels.

3 N.B. Pour obtenir le nombre complet des candidats admis il faut additionner ceux ayant passé l'examen avec succès avec ceux qui font l'objet d'une promotion sans examen.

4 En Nouvelle-Ecosse les élèves figurant dans la colonne des refusés sont ceux qui n'ont pas été admis au degré auquel ils aspiraient, mais au Nouveau-Brunswick ce sont ceux dont l'échec fut absolu. Ceux admis conditionnellement ont obtenu des degrés inférieurs à ceux qu'ils postulaient.

<sup>&</sup>lt;sup>1</sup> Les élèves admis conditionnellement dans la Saskatchewan ne doivent pas nécessairement être considérés comme ayant échoué à l'examen. Conformément aux instructions du ministère, la grande majorité des candidats ne se présentèrent que pour une partie des matières, de telle sorte que, même s'ils réunissaient, leur admission n'avait qu'un caractère partiel. De plus, le nombre des 7,332 élèves du degré VIII, ayant subi l'examen est obtenu en additionnant les candidats admis et les candidats refusés, puis en soustrayant les élèves avancés sans examen. On présume ici que ceux qui n'ont pas changé de classe ont subi l'examen changé de classe ont subi l'examen.

Secondary Grades: Number of Pupils by Subjects of Study, 1911-1925-Degrés secondaires: Nombre d'élères pour chaque matière, 1911-1925

66.-Nova Scotia-Nouvelle-Ecosse

|          | BECONDART 250                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                    | 1                                 |                                                                            |

1924—P.E.I., Inc. P.W.C. 719-1,113; N.B., approx. 1,363—2,074.
1925—P.E.I., Inc. P.W.C. 659-1,087; N.B., approx. 1,498—2,171.
1 Includes the pupils of Continuation Schools, H. S. and Collegiate Inst. only. In 1924—25 in all secondary grades reported there were 37,848 boys and 44,053 girls. These included full day vocational, public, and separate schools. The figures in the tables are confined to continuation, H. S. and Collegiate Inst. for comparative purposes.

1 Comprend seulement les élèves des écoles de continuation, des hautes écoles et des instituts collégiaux. En 1924—25 leur nombre était de 37,848 garçons et 44,053 filles. Cela comprend les écoles publiques séparées et d'apprentissage. Les chiffres de ce tableau se bornent aux hautes écoles et aux instituts collégiaux pour fins de comparaison.

78 .- Ontario Schools: Occupation of Head of Family of Pupils in Secondary Schools including full time Day Vocational Schools, 1990-1925

78.—Ecoles d'Ontario: Occupation du père des élèves des écoles secondaires, y compris les écoles professionnelles 1900-1925

¹ School Sections. The number of rural school houses was 1,435.
¹ Sections scolaires. Il existait 1,435 maisons d'école rurales.
² Second term only—² 2ème semestre seulement.
² Including full time Secondary pupils. Of the pupils in Urban Schools in Ontario the continuations Schools had 10,545 pupils enrolled and 8,772 in average attendance. Of these pupils 5,807 were children of farmers, while 12,310 of the pupils in Collegiate Institutes and High Schools and 488 full time day Vocational pupils were children of farmers. The continuation schools are situated in villages and may be considered as organized primarily for the purpose of placing secondary education within the reach of rural communities; again a large number of the children of agriculturists in Collegiate Inst. and High Schools are probably from adjoining rural communities and not necessarily boarding away from home in the towns and cities where these institutions are situated. The same may be said of the pupils in public and separate village schools, and, to some extent, in High Schools in cities. The number of pupils in these village Schools was 24,877 and in town Schools 98,036. The proportion of rural children who must be attending urban centers may be estimated from the census figures of 1921 taken in conjunction with the report of the Dept. of Education for the same year, of all persons attending, 36 p.c. were from rural communities. According to the report of the Dept. of Education for the same year, of all persons attending, 36 p.c. were in attendance at rural schools. Roughly therefore 6 out of 42 or over 14 p.c., of the rural pupils were in attendance in urban schools. There were also in the neighbourhood of 600 graded schools in rural centers.

\*Leans les écoles urbaines de l'Ontario, les écoles de continuation ont 10,545 inscriptions avec une fréquentation moyenne

in rural centers.

\*\* Dans les écoles urbaines de l'Ontario, les écoles de continuation ont 10,545 inscriptions avec une fréquentation moyenne de 8,772. De ces élèves, 5,807 étaient fils on filles de cultivateurs, tandis que 12,310 élèves des instituts collégiaux et des hautes écoles et 488 élèves du jour dans les écoles de travaux manuels étaient aussi fils ou filles de cultivateurs. Les écoles de continuation sont dans les villages et ont pour objet essentiel de mettre l'enseignement secondaire à la portée des communantés rurales. Un grand nombre des élèves des instituts collégiaux et des hautes écoles viennent probablement des districts ruraux toisins et ne sont pas nécessairement des pensionnaires dans les villes ou les villages où se trouvent les écoles. Il en est de même des écoles publiques ou séparées des villages et même des villes, et jusqu'à un certain point, dans les hautes écoles des villes. Le nombre d'élèves dans les écoles de villages était de 24,877, et dans les écoles de villes, 98,036. La proportion d'élèves des districts ruraux fréquentant les écoles urbaines doit être déterminée d'après le recensement de 1921 comparé avec le rapport du ministère de l'Instruction Publique de la même année. D'après le recensement de la population rubaine, 42 p.c. de tous les élèves et étudiants vensient des districts ruraux se suivant le rapport du ministère de l'Instruction Publique, 36 p.c. de tous les élèves se trouvaient dans les écoles rurales. Or, 6 sur 42 donne un peu plus de 14 p.c. d'élèves des districts ruraux fréquentant les écoles urbaines. Il y avait aussi environ 600 écoles à classes multiples dans les centres ruraux. ruraux.

91.—School attendance of the rural and urban population 5 to 19 years of age by single years classified by months at school, 1921—(Indians excluded)

91.—Présence à l'école de la population rurale et urbaine de 5 à 19 ans, à chaque âge, classifiée par durée de fréquentation en 1921—(Indiens exceptés)
